# **SUPER SPEEDER LAW**

*Speeding Will Cost You*

**Getting Tough on Illegal Speeders With  
Fines and High Visibility Enforcement**

## **GEORGIA'S SUPER SPEEDER LAW**

Georgia law HB160 went into effect on January 1, 2010 to change the way Super Speeders drive. The Super Speeder Law is designed to get tough on high-risk drivers who have been endangering other motorists and ignoring warnings to slow down. HB160 establishes new state fines to help law enforcement put the brakes on Georgia's Super Speeders.

### **WHAT IS A SUPER SPEEDER?**

Under the provisions of the law, any driver convicted of violating HB160 will be classified by the state as a "Super Speeder" and be subject to an additional fine.

### **SPEEDING WILL COST YOU IN GEORGIA!**

The law tacks on additional \$200 state fines for any driver convicted of speeding at:

- 75 MPH or more on any **two lane** road, or
- 85 MPH or more **anywhere** in Georgia.
- Failure to pay the Super Speeder fine results in an additional \$50 fine and the suspension of the offender's driving privileges and license.

## **FUNDING GEORGIA'S TRAUMA CARE SYSTEM**

Fees collected under the Super Speeder Law will be used to help fund Georgia's trauma care hospital system where approximately 60% of all trauma care patients are crash-related. Super Speeders now will help pay for the additional hospital beds where their crash victims are being treated.

### **SUPER SPEEDERS ARE DEADLY!**

- On average, there is a speed-related **death-a-day** in Georgia!
- Any time motorists drive at illegal speeds they put themselves, their passengers, other drivers and pedestrians at tremendous risk. Drivers need to remember there are safety reasons for posted speed limits.
- Speed **reduces** the amount of time needed to avoid a crash. Speed **increases** the likelihood of crashing and increases the severity of a crash once it occurs.
- Crash forces **double** on impact with every 10 mph increase in speed above 50 mph. As those crash forces increase, so do your chances of being killed or seriously injured.

***It's not about raising revenue.  
It's about raising survival  
rates on our roads!***
