UPDATES TO TRIENNAL HSP

- 1.1 Adjustments to Countermeasure Strategy for Programming Funds
- 1.2 Changes to Performance Plan

1.1 Adjustments to Countermeasure Strategy for Programming Funds

The FFY2024-2026 Highway Safety Plan (HSP) details the countermeasure strategy for prioritized programs areas identified by the Georgia Governor's Office of Highway Safety (GOHS). The countermeasure strategies that will supported by the FFY2024 programming funds listed in this application have not changed.

GOHS will continue to implement the countermeasure strategies listed in the FFY2024-2026 HSP.

1.2 Changes to Performance Plan

The FFY2024-2026 HSP details the traffic safety performance measure targets for FFY24, FFY25, and FFY26. The traffic safety performance measure targets were determined using a data driven approach (as required by §1300.11 (b)(3)(ii)) and the most recent data available (2017-2021 FARS and 2021 State crash data). Some target values in the triennial HSP meets the §1300.11(3)(i) code for constant or improved target compared to baseline. However, statistical projections (data-driven approach required by §1300.11 (b)(3)(ii)) and preliminary state crash data show that the performance measure target to "maintain the baseline" is overambitious and most likely will not be met.

The traffic safety performance measure targets for FFY2024 in this annual application are the same as the FY2024 targets listed in the FFY2024-2026 HSP.

Information	BIL 402AL	\$102,394.50	N	lo	No
Eligible Use of Funds	Project will fund staff and activities related to impaired driving.				

Mothers Again	Mothers Against Drunk Driving - Georgia			Project Number:	M6X-2024-GA-00-26
Project Name & Description Mothers Against Drunk Driving Georgia Support law enforcement agencies statewide and participate as a media partner to GOHS for signature traffic safety programs such as Drive Sober or Get Pulled Over.					
Countermeasure Strategy	 High-Visibility Enforcement Mass-Media Campaigns Court Monitoring 				
Organization Type	Non-Profit				
Funding	Source	Amount	Р	& A	Promised Project
Information	BIL 405d M6X	\$144,440.04	1 N	lo	No
Eligible Use of Funds	Project will support law enforcement officials during Drive Sober or Get Pulled Over, high-visibility enforcement, media events, traffic enforcement network meetings, and the law enforcement recognition event. Project will also provide court monitoring of DUI offenders.				

Mothers Against Drunk Driving - Georgia		a	Project Number:	FDL*AL -2024-GA-00-42
Project Name & Description Mothers Against Drunk Driving Georgia MADD Georgia works to end drunk driving, fight drugged driving, serve victims of these violent crimes and prevent underage drinking. We do this through statewide community activations, delivering MADD's signature Power of Me, Power of You(th), and Power of Parents programs.				
Countermeasure Strategy	Youth Programs			
Organization Type	Non-Profit			
Funding	Source	Amount	P & A	Promised Project
<i>Information</i> 405d FDL*AL \$105,702.22 No No				
Eligible Use of Funds	Project will educate communities, students, and their parents, through programs such as Power of Me, Power of You(th), and Power of Parents.			

Prosecuting Attorney's Council				Project Number:	M6X-2024-GA-00-25
Project Name & Description Traffic Safety Adjudication Program This program will provide GA traffic prosecutors and LEOs statewide with legal assistance, consultation, resource material, and training opportunities to aid in the prosecution of DUI and vehicular homicide cases.					
Countermeasure Strategy	 Deterrence: Prosecuting and Adjudication Limits on Diversion and Plea Agreements 				
Organization Type	State				
Funding	Source	Amount	P & A		Promised Project
Information	BIL 405d M6X	\$555,602.0	0 No		No
Project will fund traffic safety resource prosecutors who will provide case law updates to both law enforcement officers and prosecutors in DUI related cases. They will provide training to law enforcement officers on the proper use of expert testimony in impaired driving cases and to prosecutors on proper DUI prosecution through various types of conferences and trainings.					

Public Safety Training Center, Georgia			Project Number:	M6X-2024-GA-00-14
Project Name & Description Impaired Driving Training Programs/SFST & DRE/Phlebotomy Consists of advanced level law enforcement training programs statewide focusing on the detection, apprehension, and successful prosecution of alcohol/drug impaired drivers.				
Countermeasure Strategy	Integrated Enforcement			
Organization Type	State			
Funding	Source Amo	ount	P & A	Promised Project
Information	BIL 405d M6X \$747,2	216.53	No	No
Project will fund staff and provide training to law enforcement professionals on Standardized Field Sobriety Testing (SFST), Drug Recognition Expert (DRE), Advanced Roadside Impaired Driving Enforcement (ARIDE), and Phlebotomy. Project will also provide training on DUI case preparation and courtroom presentation.				

Public Safety,	Georgia Department of		Project Number:	M6X-2024-GA-00-87	
Project Name & Description Project Name & Description HEAT/Nighthawk DUI Task Force-North/South To more effectively address the problem related to impaired drivers. The task force will provide intense enforcement coverage of the Atlanta and Savannah area.					
Countermeasure Strategy	 Publicized Sobriety Checkpoints High-Visibility Saturation Patrols Integrated Enforcement Alcohol-Impaired Motorcyclists: Detection, Enforcement, and Sanctions 				
Organization Type	State				
Funding	Source	Amount	P & A	Promised Project	
Information	BIL 405d M6X \$	2,174,487.36	No	No	
Eligible Use of Funds	Enforcement hours will be used in Metro Atlanta and Savannah areas to conduct high-visibility enforcement of impaired driving violations. Prosecutor hours will be used to support law enforcement with the successful prosecution of impaired drivers.				

2.5 MOTORCYCLE SAFETY

Driver Service	es, Georgia Department		Project Number:	M11X-2024-GA-00-71		
	Motorcycle Safety					
Project Name & Description	The Georgia Motorcycle Safety Program works toward reducing motorcycle fatalities by educating riders and by promoting the NHTSA "Share the Road" message statewide to increase motorists' awareness of motorcycles.					
Countermeasure Strategy	 Motorcycle Rider Training Motorist Awareness of Motorcyclists 					
Organization Type	State					
Funding	Source	Amount	P & A	Promised Project		
Information	BIL 405f M11X	\$144,021.56	No	No		
Eligible Use of Funds	Project will fund an Outreach Coordinator to conduct outreach events throughout the state but specifically in the urban and mountain regions where motorcycle riders frequent. Coordinator will distribute educational items to promote the "Share the Road with Motorcycles" campaign and host an annual update for rider coaches to improve program delivery.					

See section **2.2 Communications** for more information on GOHS in-house grants implementing media approaches to support the motorcycle safety program.

2.6 NON-MOTORIZED

(PEDESTRIANS & BICYCLISTS)

Bike Walk Go	den Isles		Project Number:	BGPE-2024-GA-00-01

Savannah Ted	Savannah Technical College			ect Number:	TSP-2024-GA-00-37
Building a Legacy of Safety: The Coastal Georgia Center for Driver Safety Savannah Technical College in conjunction with The Coastal Georgia Center for Driver Safety will continue to improve its Driver's Education through integrating and using the grant funds for the Drivers safety program to continue to build on the distracted driver and alcohol-impaired training program. We will continue to build relationships within the community and grow our presence on social media.					
Countermeasure Strategy	 Mass-Media Campaign Communications and Outreach: Distracted Driving Youth Program: Underage Drinking and Drinking and Driving Prevention 				
Organization Type	College				
Funding	Source	Amount	P & A		Promised Project
Information	BIL 402TSP \$139,706.66 No No				
Eligible Use of Funds	Project will use VR Simulators, Fatal Vision goggles, social media, and other traffic safety materials to reach teen drivers on safe driving by educating them on the importance of why not to drive impaired or distracted.				

Students Against Destructive Decisions Project Number: TSP-2024-GA-01-05				TSP-2024-GA-01-05	
	Centralizing SADD's Teen Mobility Safety Efforts: Measuring Impact in the Technological Age				
Project Name & Description	SADD and the Georgia Office of Highway Safety (GOHS) have enjoyed a fruitful partnership over more than two decades. Throughout the last several years, SADD has been working to build the capacity and effectiveness of our chapters across Georgia while measuring impact. This project will focus on creating productive systems and enriching education around mobility safety.				
Countermeasure Strategy		s and Outreach:	Distracted Driving ng and Drinking and Dri	ving Preve	ention
Organization Type	Non-Profit				
Funding	Source	Amount	P & A		Promised Project
Information	BIL 402TSP \$222,371.04 No No				
Eligible Use of Funds	Project will expand the peer-to-peer SADD program in Georgia high schools, host community outreach events, pilot a program to reduce distracted walking and driving among Hispanic students, and conduct train the trainer programs throughout Georgia				

ABAC Advance	cement Foundation, Inc., The		Project Number:	TSP-2024-YA-00-02

Eligible Use of Funds	Project will fund peer-to-peer educational events to college students about the importance of driving safely and obeying the traffic laws, including impaired driving, speed, distracted, and seatbelt usage.							

405 APPLICATIONS

- 405(b) Occupant Protection (Adult & Child Passenger Safety)
- 405(c) Traffic Records
- 405(d) **Impaired Driving** (Drug & Alcohol)
- 405(e) **Distracted Driving**
- 405(f) **Motorcycle Safety**
- 405(g) **Non-Motorized** (Pedestrians & Bicyclists)
- **405(h)** Preventing Roadside Deaths

405(b) OCCUPANT PROTECTION

(ADULT & CHILD PASSENGER SAFETY)

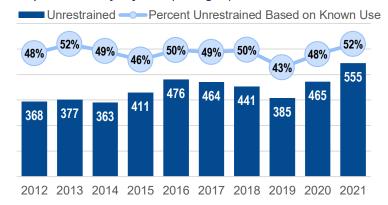

DESCRIPTION OF HIGHWAY SAFETY PROBLEMS

This section contains excerpts from the 2021 Occupant Protection Georgia Traffic Safety Facts that are pertinent to the planning of countermeasures that will reduce the number of distraction-related fatalities. To access the full report, visit: https://www.gahighwaysafety.org/georgia-traffic-safety-facts/

In 2021, there were 1,797 traffic fatalities in Georgia, of which 1,182 (66%) were occupants of passenger vehicles (PV). Of the 1,182 passenger vehicle occupants fatally injured, 555 (47%) were unrestrained, and 515 (44%) were restrained at the time of the crash. Restraint use was not known for the remaining 112 (9%) occupants. Looking only at those passenger vehicle occupants who were fatally injured, and restraint use was known, 48% were restrained, and 52% were unrestrained.

The figure to the right shows the percent and number of unrestrained passenger vehicle occupants fatally injured in traffic crashes when the restraint use was known. The percentage of unrestrained fatalities increased by three percentage points, from 48% in 2020 to 52% in 2021. The number of fatally injured passenger vehicle occupants by restraint use for 2017 to 2021 is shown in the table below.

Percent and Number of Unrestrained* Passenger Vehicle Occupants Fatally Injured (All Ages), 2012-2021

*Percent is calculated based on known restraint use. Note: The appropriate restraint system for children was not taken into consideration in the restraint classification. Source: FARS 2012–2021

Source: FARS 2017–2021

Since 2011, Georgia observed seat belt usage rate was over 90% — 9 out of 10 front seat passenger occupants were observed wearing a seat belt. According to the 2022 Georgia Seat Belt Observational Survey¹, the rate of seat belt use for drivers and front right-seat passenger vehicles² decreased by nearly 6% from 94.4% in 2021 to 89.3% in 2022. The seat belt usage rate for drivers and front seat passengers (right seating position) was nearly the same—89.2% among drivers and 90.4% among front seat passengers.

The observed safety belt usage rates were also recorded by location, driver ethnicity, driver gender, and vehicle type. According to the 2022 Occupant Protection Observational Survey:

- Observed safety belt usage was highest in the Atlanta MSA (90.3%), followed by non-Atlanta MSAs (87.5%), and rural areas (81.7%).
- Safety belt usage for white occupants was higher (90.5%) than for non-white occupants (88.2%).
- Safety belt usage was higher for women (92.2%) than for men (86.7%).
- Safety belt usage was 90.1% in passenger cars, 90.2% in vans, and 81.9% in trucks.

Observed Safety Belt Use (2013-2022) Front Seat Passenger Vehicle Occupants

*NOTE: In 2020, Georgia opted not to conduct the Seat Belt Observational Survey under the NHTSA waiver through the Coronavirus Aid, Relief, and Economic Security (CARES) Act. This waiver enabled States and U.S. Territories to use their 2019 seat belt use rate for their 2020 seat belt use rate.

Children Safety Seat Usage, 2013-2022

Source: Statewide Use of Occupants Restraints - Observational Survey of Safety Restraint Use in Georgia (2022) **NOTE: Due to the 2019 observed rate that was an outlier due to a small sample size in comparison to other years, GOHS is working collaboratively with the researchers to adjust the methodology used to conduct the annual seat belt observation survey. Part of this collaboration is to explore alternative surveying methodologies similar to surrounding states.

Observed Safety Belt Use by Location, Driver Ethnicity, Driver Gender and Vehicle Type (2017-2019, 2021-2022)*

		2017	2018	2019	2021	2022
Overall Safety Belt Use:		97.1	96.3	95.9	94.8	89.3
Location:	Atlanta MSA	97.4	96.0	96.8	97.2	90.3
	Non-Atlanta MSA	96.4	96.0	95.0	95.3	87.5
	Rural	94.8	96.8	95.0	94.0	81.7
Driver Ethnicity:	White	96.1	94.0	96.1	98.1	90.5
	Non-White	96.3	96.6	95.0	96.3	88.2
Driver	Male	94.4	94.3	94.2	93.2	86.7

	Van	97.3	97.0	97.2	96.4	90.2

Source: Statewide Use of Occupants Restraints - Observational Survey of Safety Restraint Use in Georgia (2022) *NOTE: In 2020, Georgia opted not to conduct the Seat Belt Observational Survey under the NHTSA waiver through the Coronavirus Aid, Relief, and Economic Security (CARES) Act. This waiver enabled States and U.S. Territories to use their 2019 seat belt use rate for their 2020 seat belt use rate.

¹ Rupp, Jonathan. 2022. "Statewide Use of Seat Belt Restraints: An Observational Survey of Seat Belt Use in Georgia." The Injury Prevention Research Center at Emory (IPRCE), Emory University: Atlanta, Georgia

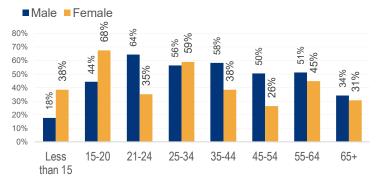

² Passenger vehicles are defined as passenger cars, light trucks (including vans, sport utility vehicles (SUV), and pickup trucks).

The figure to the right shows the percentage of PV occupants (across all seating positions) fatally injured and unrestrained in traffic crashes by age group and gender in 2021.

- 68% of fatally injured female PV occupants 15-to-20 years of age were unrestrained, compared to 44% of male PV occupants.
- 64% of fatally injured male PV occupants 21-to-24 years of age were unrestrained, compared to 35% of female PV occupants.

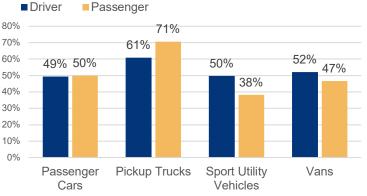

There were 258 passengers fatally injured in passenger vehicles in 2021. Fifty-six percent of the passengers fatally injured were riding in passenger cars. Among the 258 fatalities for which restraint use was known, 50% were unrestrained, but use varied by vehicle type: 71% of the passengers fatally injured in pickup trucks were unrestrained, compared to 38% in SUVs, 47% in vans, and 50% in passenger cars.

Percent of Unrestrained* Passenger Vehicle Occupants Fatally Injured in Traffic Crashes by Age and Sex, 2021

755 Male Passenger Vehicle Occupants with known age 418 Female Passenger Vehicle Occupants with known age Note: Based on known restraint use Source: FARS 2021

OCCUPANT PROTECTION PLAN

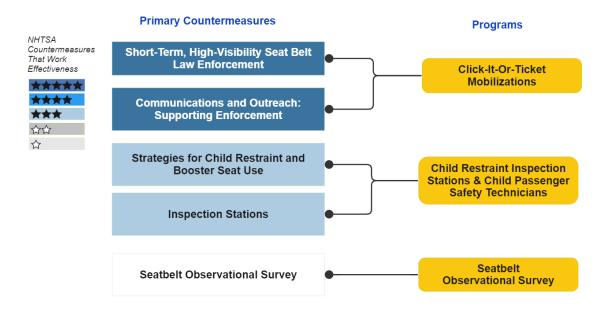

ASSOCIATED PERFORMANCE MEASURES AND TARGETS

Core	Outcome Measures	Baseline 2017-2021	Target 2020-2024
C-1*	To maintain or reduce traffic fatalities to <u>1,600*</u> (2020-2024 rolling average) by 2024.	1,600	1,600*
C-2a*	To maintain or reduce serious injuries in traffic crashes to 7,109* (2020-2024 rolling average) by 2024.	7,109	7,109*
C-2b*	To maintain or reduce serious injuries per 100M VMT to <u>5.711*</u> (2020-2024 rolling average) by 2024.	5.711	5.711*
C-3*	To maintain or reduce traffic fatalities per 100M VMT to 1.28* (2020-2024 rolling average) by 2024.	1.28	1.28*
C-4*	To maintain or reduce unrestrained passenger vehicle occupant fatalities to <u>461*</u> (2020-2024 rolling average) by 2024.	461	461*
B-1	To increase the annual observed seat belt use for passenger vehicles, front seat outboard occupants from 89.3% in 2022 to 90.0% by 2024.	89.3 (2022)	90.0

^{*} Target value meets §1300.11(3)(i) code for *constant* or *improved* target compared to baseline. However, statistical projections (data-driven approach required by §1300.11 (b)(3)(ii)) and preliminary state crash data show that the performance measure target to "*maintain the baseline*" is overambitious and most likely will not be met. Targets in light-blue, italicized font below are considered to be achievable targets that show progress or demonstrate improved outcomes.

PRIMARY COUNTERMEASURES

GOHS will fund staff and activities that use high-visibility enforcement, communications and outreach, local-level interventions, and mass-media strategies to support other traffic safety program areas. The figure below shows the planned primary countermeasures within each program area to address to address the growing number of unrestrained traffic-related fatalities, serious injuries, and crashes that occur on Georgia roadways. Together, these primary countermeasures will increase awareness and compliance to Georgia's seatbelt laws and inform the general public of the dangers of other risky driving behaviors.

Unrestrained passenger vehicle fatalities and non-compliance to seatbelt laws remains a traffic safety concern in Georgia. GOHS aims to reduce the number of unrestrained passenger vehicle fatalities (C-4) and total traffic fatalities (C-1). To make progress toward this goal and address these traffic safety issues, GOHS will continue to implement the Click-It-Or-Ticket program that will encourage proper restraint use among all passenger vehicle occupants of all ages through the following primary countermeasures:

- Short-Term, High-Visibility Seat Belt Law Enforcement (5-star NHTSA effectiveness rating)
- 2. Communications and Outreach: Supporting Enforcement (5-star)

These primary countermeasures have an NHTSA rating of 5-star effectiveness and are supported by the best practices and research available. The law enforcement activities are also coupled with mass-media campaigns and well-publicized events to increase drivers' awareness and compliance with Georgia seatbelt laws. The high visibility of law enforcement both in media and on roadways reinforces safer driving practices and gives drivers an increased perception of legal consequences if they fail to comply with the law.

PLANNED PARTICIPATION IN CLICK IT OR TICKET

Click It or Ticket has been shown to be an effective campaign to bring awareness to seatbelt usage. Georgia will continue to participate in the Click It or Ticket safety campaign through high-visibility enforcement of the seatbelt laws in Georgia. Crash data will be reviewed, and hot spot enforcement will be used, including rural Georgia where seatbelt usage continues to be lower than the overall state rate.

The Georgia Governor's Office of Highway Safety coordinates two statewide, high visibility Click It or Ticket mobilizations each fiscal year. During FFY 2024, GOHS will also participate in the Click It or Ticket Border 2 Border event with our boarding states. Mobilization dates, enforcement strategies and logistics are discussed with Georgia law enforcement officers during regional traffic enforcement network meetings and communicated on the Georgia Traffic Enforcement Network (GATEN) list-serv to more than 850 law enforcement officers and prosecutors. The plan is to involve all Georgia law enforcement officers with a blanketed approach of high visibility Click It or Ticket enforcement initiatives across the entire state.

Jurisdictions that are overrepresented with unbelted fatalities are targeted with extra efforts and stepped-up night-time seat belt enforcement checkpoints. In addition to enforcement efforts during the two-week Click It or Ticket campaigns, Georgia law enforcement are encouraged, through the Regional Traffic Enforcement Networks, to maintain a philosophy of 24/7 occupant protection enforcement efforts.

FFY2024 Georgia Mobilizations*

Click it or Ticket November 22 – November 26, 2023

Drive Sober or Get Pulled Over December 13, 2023 - January 1, 2024 (National Mobilization)

Click it or Ticket Mobilization May 13 – June 2, 2024 (National Mobilization)

One Hundred Days of Summer HEAT May 13 - September 2, 2024

> CIOT Border to Border May 13, 2024

Operation Zero Tolerance June 24 - July 7, 2024

Operation Southern Slow Down July 15 – 21, 2024

Hands Across the Border August 26 – 29, 2024

Drive Sober or Get Pulled Over August 14 - September 2, 2024 (National Mobilization)

*Estimated Dates

Click It or Ticket Communications Plan

GOHS will continue to support Click It or Ticket enforcement campaigns with paid media, earned media, and social media campaigns. GOHS will run two-week Click It or Ticket radio and television campaigns during the November and May enforcement periods, conduct news conferences before the Thanksgiving and Memorial Day travel campaigns, and post content that promotes seat belt and child restraint use for all motorists. In addition to the Click It or Ticket campaign, GOHS recently began working with surrounding states in a Seats Across the States campaign that targets populations that regularly cross state lines. This campaign is not only a partnership between state agencies, but also a partnership between state law enforcement. This campaign is meant to educate parents and caregivers on best practices and on knowing the difference between state laws and being compliant with those laws. This campaign allows GOHS to include education as a part of a short term, high-visibility campaign. GOHS will include two Seats Across the States campaigns in the spring and fall of the FFY2024 fiscal year.

CHILD RESTRAINT INSPECTION STATIONS

Child restraint unuse and misuse remains a concern in Georgia. GOHS aims to reduce the number unrestrained passenger vehicle fatalities (C-4) and total traffic fatalities (C-1). To make progress toward this goal and address these traffic safety issues, GOHS will continue to implement child restraint inspection stations with technicians that will that support the dissemination and proper use of child safety seats.

The child restraint inspection stations also provide an opportunity to educate parents and caregivers on the value of proper car seat use, the restraint laws as it relates to both children and adults, and proper installation of the safety equipment. With the increase of awareness of safety practices within vehicles, parents and caregivers will adhere to these practices and the number of unrestrained fatalities for both adults and children will decrease.

The Governor's Office of Highway Safety (GOHS) will maintain a list of inspection stations on the state website. Currently there are 105 registered car seat inspection stations throughout the state of Georgia that reach both urban and rural communities. Forty-five (45) of the inspection stations are in rural communities, and sixty (60) are in urban communities. In addition to urban and rural populations, many of these car seat inspection stations reach other vulnerable populations, such as Black/African American, Hispanic, Asian, as well as high-poverty areas. When comparing demographics to the state's population, those counties with a higher percentage of a specific demographic were deemed a county with a high-risk population, especially when that demographic is historically overrepresented in crash data for fatalities and serious injuries.

Currently, ninety-eight (98) fitting stations specifically serve at-risk families. GOHS relies on many agencies to host inspection stations including health departments, police departments, fire departments, along with private, non-profit organizations. Child Passenger Safety Technicians (CPST) are available by appointment at each fitting station to assist local parents and caregivers with properly installing child safety seats and providing extra resources when necessary. The list below identifies the location and contact person at each station and is a document that is updated regularly through the GOHS website. In addition to the inspection stations, GOHS has noted that there are sixty-one additional counties represented through the Child Occupant Safety Project's mini-grant program. The mini-grant program reaches an additional forty-eight (48) rural counties and eleven (11) urban counties.

Georgia will continue to advertise the portal to health departments, fire departments, police departments, and other avenues in hopes to increase the number of registered stations. Each inspection station and event will be staffed with at least one current nationally Certified Child Passenger Safety Technician. Many inspections require an appointment.

Atlanta Fire and Rescue (AFRD) offers community events in the Metro Atlanta area to serve at-risk families. AFRD partners with other local governments, non-profit, and private businesses to educate families in Atlanta, GA, and the immediate surrounding areas. AFRD will partner with Amerigroup (a statewide Medicaid provide), Sheltering Arms (local head starts), and other organizations to ensure that all children are traveling safely. This is one of the ways that GOHS and its grantees address transportation equity through educational grant programming.

	Con	nmunity Events for	Atlanta Fire R	escue
Date	Location	Host Agency	Population	At-Risk
23-Oct	Fulton	Sheltering Arms	Urban/ Metro	Low Income/ Minority
23-Oct	Douglasville	Sheltering Arms	Urban /Metro	Low Income/ Minority
23-Oct	East Lake	Sheltering Arms	Urban/ Metro	Low Income/ Minority
23-Nov	Fulton	AmeriGroup	Urban/ Metro	Low Income/ Minority
23-Dec	Fulton	AmeriGroup	Urban/ Metro	Low Income/ Minority
24-Jan	Fulton	AmeriGroup	Urban/ Metro	Low Income/ Minority

24-Apr	Fulton	Sheltering Arms	Urban /Metro	Low Income/ Minority
24-May	DeKalb	AmeriGroup	Urban/ Metro	Low Income/ Minority
24-Jun	Fulton	AmeriGroup	Urban/ Metro	Low Income/ Minority
24-Jul	DeKalb	Sheltering Arms	Urban/ Metro	Low Income/ Minority
24-Aug	Fulton	AmeriGroup	Urban/ Metro	Low Income/ Minority
24-Sep	DeKalb	Sheltering Arms	Urban/ Metro	Low Income/ Minority

In compliance with the National Certification program, all CPST courses (listed in the next section) will end with a seat check event on the final day and are included in the total number of events.

Total number of planned inspection stations and/or events in the State

214

Total number of planned inspection stations and/or events in the State serving each of the following population categories: Urban, Rural, At-Risk

Populations Served – Urban

107

Populations Served - Rural

83

Populations Served – At-Risk

146

Inspection stations should be located statewide and available to most of the state population. In the city of Atlanta, the fire department consistently operates 15 inspection stations located in lower socioeconomic areas throughout the city and these stations are open to the public by appointment. The GA Department of Public Health's regional coordinators are networking across their regions to increase the number of inspection stations in both rural and urban areas. The regional coordinators are actively working with the state CPS coordinator to register fitting stations across Georgia.

When comparing county demographics to the state's population, those counties with a higher percentage of a specific demographic were deemed a county with a high-risk population, especially when that demographic is historically overrepresented in crash data for fatalities and serious injuries. Data taken from www.census.gov is updated annually in order to determine the risks of the counties being served. Another factor that is considered is the poverty level. Lower socioeconomic factors can be a contributing factor in unrestraint use, and it also indicates that a higher percentage of the population may not be able to afford the correct child restraint. Those counties with a population below 50,000 are defined as rural counties. The breakdown of those demographics is listed in the table below. Highlighting these demographics demonstrates that GOHS makes every attempt to locate and promote inspections stations in areas where the need is the greatest.

Demographic breakdown of counties participating in inspections stations and/or mini-grant program.

County	Population	% Asian	% Hispanic	% Black /African	% American	% White Alone,	Population	Population

CHILD PASSENGER SAFETY TECHNICIANS

GOHS will continue to support and fund agencies that educate the public on Child Passenger Safety (CPS). They will provide education to increase the number of Child Passenger Safety Technicians (CPST's) throughout the state and recertification training to retain CPST's. Child restraint use includes training parents and caregivers on all stages of restraint use from rear-facing only to booster seat to seat belt.

As in the past, this countermeasure continues to play a major role in establishing a well- functioning highway safety culture in which public/political attention is given to motor vehicle crashes, injuries, and fatalities relating to children. The overall availability of CPS technicians throughout a state is a consideration in both maintaining inspection stations and educating parents and caregivers. Both retaining current CPST's and training new CPST's at underserved locations is an important part of maintaining the effectiveness of this countermeasure. The total number of certified technicians and instructors is fluid and changes, as classes are held continuously throughout the year. Currently, there are 1,299 certified technicians, 75 certified instructors and three instructor candidates for a total of 1,377 qualified personnel that can assist with car seat needs in their communities. The Child Occupant Safety Project (COSP) will hold the following classes throughout the FFY24 in order to maintain or increase the number of CPST's to **maintain a sufficient number** of child passenger safety technicians throughout the state of Georgia. Additional training is included to retain the number of CPST's and increase child passenger safety awareness.

The Department of Public Health- Child Occupant Safety Project (DPH) staff will continue to operate using a regional model for statewide outreach and education. Regional coordinators will attend local Emergency Medical Services Regional Councils, Emergency Medical Services-Children, and/or Regional Trauma Advisory Council Meetings, Family Connections Meetings, local traffic enforcement network meetings, and other local networking opportunities. Connections made during these meetings will be leveraged into **recruitment opportunities** for future CPST Courses. The GA Department of Public Health (DPH) is planning to have 24 CPST classes averaging 15 students per class. For **retention purposes**, DPH staff will host more than 20 CEU classes throughout the state, providing multiple opportunities for technicians to attend in-person recertification sessions. In addition to these classes, DPH will also provide additional training to hospitals and special needs training to technicians. Regional coordinators will maintain a local list-serv to advertise local lasses and community check events to ensure technicians have ample opportunities to gain their seat-checks and community events required to maintain their certification. The CPS coordinator at GOHS will maintain a statewide list-serv to support the work of the GOHS grantees.

In addition to COSP, the Atlanta Fire Rescue Department (AFRD) will hold classes that will increase the number of CPST's in the Metro-Atlanta, which are urban communities. These technicians will be available to provide education and hands-on support to low-income and/or minority communities. AFRD partners with other local governments, non-profit, and private businesses to educate families in Atlanta, GA, and the immediate surrounding areas. AFRD will partner with Amerigroup (a statewide Medicaid provide), Sheltering Arms (local head starts), and other organizations to ensure that all children are traveling safely. This is one of the ways that GOHS and its grantees address transportation equity through educational grant programming.

Estimate of the total number of classes and the estimated total number of technicians to be trained in the upcoming fiscal year to ensure coverage of child passenger safety inspection stations and supporting events by nationally Certified Child Passenger Safety Technicians

Estimated total number of classes:

80

Total number of technicians trained:

870

QUALIFYING CRITERIA FOR LOW RANGE STATE:

In 2022, the Georgia seat belt usage rate for drivers and front right seat passengers of cars, trucks, sports utility vehicles (SUVs) and vans/ mini vans was 89.3%, a decrease of 5.6% from 2021. By dropping below the 90 percent rate, Georgia became a lower seat belt use rate State, as determined by NHTSA. Therefore, in accordance with 23 CFR 1300.21(e), In addition to High seat belt use rate criteria, GOHS will submit as part of its annual grant application documentation demonstrating that it meets at least three of the following additional criteria, in accordance with part 1 of appendix B to this part. Georgia submits as part of the 405b application, the three additional criteria listed: **Primary enforcement seat belt use statute, Seat Belt Enforcement, and High-Risk Population Countermeasure Programs.**

PRIMARY ENFORCEMENT SEATBELT USE STATUTE

GA Code § 40-8-76.1 (2020)

- a. As used in this Code section, the term "passenger vehicle" means every motor vehicle, including, but not limited to, pickup trucks, vans, and sport utility vehicles, designed to carry 15 passengers or fewer and used for the transportation of persons; provided, however, that such term shall not include motorcycles; motor driven cycles; or off-road vehicles or pickup trucks being used by an owner, driver, or occupant 18 years of age or older in connection with agricultural pursuits that are usual and normal to the user's farming operation; and provided, further, that such term shall not include motor vehicles designed to carry 11 to 15 passengers which were manufactured prior to July 1, 2015, and which, as of such date, did not have manufacturer installed seat safety belts.
- b. Each occupant of the front seat of a passenger vehicle shall, while such passenger vehicle is being operated on a public road, street, or highway of this state, be restrained by a seat safety belt approved under Federal Motor Vehicle Safety Standard 208.
- c. The requirement of subsection (b) of this Code section shall not apply to:
 - 1. A driver or passenger frequently stopping and leaving the vehicle or delivering property from the vehicle, if the speed of the vehicle between stops does not exceed 15 miles per hour;
 - 2. A driver or passenger possessing a written statement from a physician that such person is unable, for medical or physical reasons, to wear a seat safety belt;
 - A driver or passenger possessing an official certificate or license endorsement issued by the appropriate agency in another state or country indicating that the driver is unable for medical, physical, or other valid reasons to wear a seat safety belt;
 - 4. A driver operating a passenger vehicle in reverse;
 - 5. A passenger vehicle with a model year prior to 1965;
 - 6. A passenger vehicle which is not required to be equipped with seat safety belts under federal law;
 - 7. A passenger vehicle operated by a rural letter carrier of the United States Postal Service while performing duties as a rural letter carrier;
 - 8. A passenger vehicle from which a person is delivering newspapers; or
 - 9. A passenger vehicle performing an emergency service.
- d. The failure of an occupant of a motor vehicle to wear a seat safety belt in any seat of a motor vehicle which has a seat safety belt or belts shall not be considered evidence of negligence or causation, shall not otherwise be considered by the finder of fact on any question of liability of any person, corporation, or insurer, shall not be any basis for cancellation of coverage or increase in insurance rates, and shall not be evidence used to diminish any recovery for damages arising out of the ownership, maintenance, occupancy, or operation of a motor vehicle.
- e. 1. Except as otherwise provided in paragraphs (2) and (3) of this subsection, a person failing to comply with the requirements of subsection (b) of this Code section shall not be guilty of any criminal act and shall not be guilty of violating any ordinance. A violation of this Code section shall not be a moving traffic violation for purposes of Code Section 40-5-57.
 - 2. A person failing to comply with the requirements of subsection (b) of this Code section shall be guilty of the offense of failure to wear a seat safety belt and, upon conviction thereof, may be fined not more than \$15.00; but, the provisions of Chapter 11 of Title 17 and any other provision of law to the contrary notwithstanding, the costs of such prosecution shall not be taxed

nor shall any additional penalty, fee, or surcharge to a fine for such offense be assessed against a person for conviction thereof. The court imposing such fine shall forward a record of the disposition of the case of failure to wear a seat safety belt to the Department of Driver Services.

- 3. Each minor eight years of age or older who is an occupant of a passenger vehicle shall, while such passenger vehicle is being operated on a public road, street, or highway of this state, be restrained by a seat safety belt approved under Federal Motor Vehicle Safety Standard 208. In any case where a minor passenger eight years of age or older fails to comply with the requirements of this paragraph, the driver of the passenger vehicle shall be guilty of the offense of failure to secure a seat safety belt on a minor and, upon conviction thereof, may be fined not more than \$25.00. The court imposing such a fine shall forward a record of the court disposition of the case of failure to secure a seat safety belt on a minor to the Department of Driver Services.
- 4. Probable cause for violation of this Code section shall be based solely upon a law enforcement officer's clear and unobstructed view of a person not restrained as required by this Code section. Noncompliance with the restraint requirements of this Code section shall not constitute probable cause for violation of any other Code section.

SEATBELT ENFORCEMENT

In accordance with 23 CFR 1300.21 (e)(3) Seat Belt enforcement- Georgia can demonstrate sustained enforcement throughout the fiscal year that will promote seat belt and child restraint enforcement. This has been provided in the list of sustained mobilizations that will be held throughout the FFY24 year. These mobilizations involve law enforcement agencies throughout the state of Georgia, including those geographic areas where 70 percent of the combined unrestrained fatalities and serious injuries occurred. The Traffic Enforcement Networks (TEN) consistently educate and push the sustained enforcement of the seatbelt and child restraint laws of Georgia and participation in the Click It or Ticket mobilizations during monthly meetings. The list below shows law enforcement agencies that have conducted sustained enforcement of the seatbelt and child restraint laws within Georgia over the previous 2 years. Through the TEN's, GOHS will continue to encourage a 24/7 focus on seatbelt enforcement. In conjunction with the TEN's, the Georgia State Patrol (GSP) provides sustained enforcement focusing on seatbelts and child restraints on a statewide basis. GOHS will continue to review the crash data and work to create new partnerships in areas where high unrestrained serious injuries and fatalities occur.

147 out of 159 Georgia counties have law enforcement agencies that participate in reoccurring efforts throughout the year to promote seat belt and child restraint use. These counties where this type of sustained enforcement occurs, account for 95% of all unrestrained passenger vehicle occupant traffic fatalities between 2017-2021.

Sustained Seat Belt and Child Restraint Enforcement

GOHS funds and support law enforcement agencies to implement reoccurring initiatives and campaigns throughout FY2024 to **promote** seat belts and child restraint enforcement. These projects include the Traffic Enforcement Networks (pictured below) which covers law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70% of Georgia's unrestrained PV occupant fatalities and serious injuries occurred.

These TEN law enforcement projects are described in Section 2.9 Police Traffic Services. Additionally, other law enforcement sub-recipients also implement sustained seat belt and child restraint enforcement monthly throughout the grant year—Highway Enforcement of Aggressive Traffic (HEAT) and High Visibility Enforcement (HVE) – also described in Section 2.9 Police Traffic Services.

HIGH RISK POPULATION COUNTERMEASURE PROGRAMS

Georgia has implemented data-driven programs to improve seat belt and child restraint use for three atrisk population groups, **Drivers on Rural Roadways**, **Unrestrained Nighttime Drivers**, **and Teenage Drivers**. GOHS works with multiple partners in achieving this measure. In addition to working with Students Against Destructive Decisions to increase awareness of the importance of teenagers wearing their seatbelt, GOHS works with the Department of Public Health in increasing awareness of their occupant protection program, known as the Child Occupant Safety Project (COSP). This program is pivotal in reaching rural communities, specifically reaching parents/caregivers in a lower socioeconomic demographic. This program has 8 regional coordinators stretched across the state to educate the public on the importance of making sure occupants are properly restrained. The regional coordinators also actively participate in the traffic enforcement network meetings to help encourage law enforcement to conduct seatbelt enforcement during the nighttime and daytime hours.

GOHS will continue to coordinate Child Passenger Safety Week, which is September 15-21, 2024. In determining locations to host events, GOHS will look at data related to those fatalities or serious injuries of children under eight, who were unrestrained at the time of the crash. In the past, this data has indicated that locations could be either urban or rural locations. As data is provided, GOHS will also determine if there are locations in surrounding areas that are overrepresented and underserved, in which it may be beneficial to provide additional education to the community.

The additional coverage that Traffic Enforcement Networks provide to rural communities and nighttime drivers addresses both rural road users and unrestrained nighttime drivers. The Georgia Traffic Enforcement Networks host network meetings throughout the state and are generally concluded with an enforcement component such as a road check or concentrated patrols. These events are often held in the evening, resulting in nighttime enforcement. While some counties are urban, most counties participating are in rural areas. The Traffic Enforcement Networks understand that in addition to speeding and distraction, the lack of seat belt use is determining factor in survivability during a crash.

EXECUTIVE SUMMARY

Georgia's Traffic Records Program is critical to effective safety programming, operational management, and strategic planning. In cooperation with local, regional, and federal partners, Georgia maintains a traffic records system that supports data-driven, science-based decision-making that is necessary to identify problems, deploy and evaluate countermeasures, and efficiently allocate resources.

The Georgia Traffic Records Coordinating Committee (TRCC) was created for the purpose of developing and implementing effective programs that improve the timeliness, accuracy, completeness, uniformity, integration, and accessibility of state traffic safety data needed to identify priorities for federal, state, and local highway and traffic safety programs; evaluate the effectiveness of such efforts; link state data systems, including traffic records and systems that contain medical, roadway, and economic data; improve the compatibility and interoperability of state data systems with national data systems and the data systems of other states; and to enhance the agency's ability to observe and analyze national trends in crash occurrences, rates, outcomes, and circumstances.

The Governor's Office of Highway Safety (GOHS) received the 2019 Traffic Records Assessment on June 17, 2019. The Georgia TRCC continues to utilize the Traffic Safety Information System funding, received FFY 2006 - FFY 2021 from the National Highway Traffic Safety Administration (NHTSA) under Section 405(c), to allocate funds for traffic records projects activities directly related to the problem identification, performance targets, and countermeasure strategies for Georgia traffic records improvements as well as to advance the TRCC's mission to maximize the overall quality of traffic safety data and analysis based on state traffic records data across all six core data systems. Georgia's TRCC continues to support current traffic records projects, identify new projects, and establish performance measures for each core data system to address the recommendations provided in the 2019 Traffic Records Assessment.

The Georgia Traffic Records Strategic Plan highlights the progress made, describes the traffic records projects and activities that will continue to improve the core data systems, and is a part of the request for continued NHTSA funding for FFY 2022-2024. This plan is a living document and will require regular review. Any updates needed to the strategic plan are completed by the Technical Committee of the TRCC and presented to the Traffic Records Executive Committee for final approval. The FFY 2022-2024 Traffic Records Strategic Plan was approved by the Traffic Records Executive Committee on June 18, 2021.

TRAFFIC RECORDS SYSTEM OVERVIEW

The Georgia traffic records system assist the traffic safety community in implementing programs and countermeasures that reduce motor vehicle crashes, deaths, and injuries. Data-driven improvements rely on Georgia's traffic records system to identify opportunities to improve highway safety, measure progress, and systematically evaluate countermeasure effectiveness. An effective traffic records system can identify and assess factors that result in traffic fatalities and injuries, evaluate the effectiveness of prevention and intervention measures, and guide the deployment and utilization of enforcement and educational programs.

Georgia's traffic records data is critical to effective safety programming, operational management, and strategic planning. In cooperation with local, regional, and federal partners, Georgia maintains a traffic records system that supports data-driven, science-based decision-making that is necessary to identify problems, deploy and evaluate countermeasures, and efficiently allocate resources.

Georgia's traffic records system is the culmination of the combined efforts of collectors, managers, and users of data. Collaboration and cooperation between these groups can improve data and ensure it is used in ways that provide the greatest benefit to traffic safety efforts. Thoughtful, comprehensive, and uniform data use and governance policies can improve service delivery, link business processes, maximize return on investments, and improve risk management.

Georgia's Traffic Records Program strives to assure that all highway safety partners can access accurate, complete, integrated, and uniform traffic records in a timely manner. Georgia traffic records provide the foundation for traffic safety programming and will continue to fund projects through the Georgia Traffic Records Coordinating Committee (TRCC) that are appropriately prioritized, data-driven, and evaluated for effectiveness.

Traffic Records System Components

Georgia's traffic records system consists of data about Georgia's roadway transportation network and the people and vehicles that use it. This data is critical to effective safety programming, operational management, and strategic planning. Georgia's traffic records system includes the collection, management, and analysis of traffic safety data. It is comprised of six core data systems— Crash, Driver, Vehicle, Roadway, Citation and Adjudication, and Injury Surveillance—as well as the organizations and people responsible for them.

The Georgia Department of Transportation (GDOT) is the agency responsible for crash reporting. The Georgia Electronic Accident Reporting System (GEARS) is developed and maintained by LexisNexis. GEARS serves as a portal into the State of Georgia's repository for traffic crash reports completed by Georgia law enforcement agencies. All crashes are gathered into a single statewide database; however, the methods of input vary. Crashes are entered electronically through the State user interface, transmitted via third party vendors, or submitted via paper reports. Currently, approximately 95% of the state's crash reports are transmitted electronically.

Roadway

The Georgia Department of Transportation (GDOT) is the agency responsible for collecting and maintaining the roadway information system for the State. GDOT maintains approximately 18,000 miles of state-owned highways and ramps. This mileage represents roughly 14.8% of the 121,500 miles of public roads in Georgia. Roadway and traffic data elements are maintained within a statewide linear referencing system (LRS) using Esri's Roads and Highways software to integrate data from multiple linear referencing system networks to get a comprehensive view of Georgia roadways. Through this system, GDOT maintains data on all 121,500 miles of public road and enables linkages between road, traffic data, crash, and other databases.

The Georgia Department of Driver Services (DDS) has the custodial responsibility for the driver data system. The driver system maintains commercially licensed driver data as well as critical information including driver's personal information, license type and endorsements, including all issuance dates, status, conviction history, and driver training. The State's driver data system receives input from process flow documents from other data systems, including the reporting of citations from the Georgia Electronic Citation Processing System (GECPS).

Citation & Adjudication

The State of Georgia has a non-unified court system where local courts are autonomous. These courts account for most traffic adjudications within the State. As a result, courts use Case Management Software that is proprietary and, for the most part, is not interoperable with other courts in the State. However, through the Georgia Electronic Conviction Processing System (GECEPS) at the Division of Driver Services, Georgia courts can securely and accurately transmit conviction data electronically to the State. This is a major step in overcoming the difficulties of a variety of systems that are not interoperable.

Vehicle

The Georgia Department of Revenue (DOR) Motor Vehicle Division has custodial responsibility for the State vehicle records. Georgia's vehicle system — Driver Record and Integrated Vehicle Enterprise System (DRIVES) — is an inventory of data that enables the titling and registration of each vehicle under the State's jurisdiction to ensure that a descriptive record is maintained and made accessible for each vehicle and vehicle owner operating on public roadways. Vehicle information includes identification and ownership data for vehicles registered in Georgia. Information on vehicle make, model, year of manufacture, body type (extracted from VIN), and adverse vehicle history (title brands) is maintained.

Injury Surveillance

The Georgia Department of Public Health (DPH) is responsible for the Injury Surveillance System (ISS). Georgia's comprehensive Injury Surveillance System (ISS) has data readily available from five core components: pre-hospital emergency medical services (EMS), trauma registry, emergency department, hospital discharge, and vital records. These datasets enable a wide variety of stakeholders to both efficiently and effectively evaluate and prioritize motor vehicle crash related needs, such as issues related to data quality and reliable application to address patient severity, costs, and outcomes. The ISS is supported through 3 databases: (a) the State's Georgia Emergency Medical Services Information System (GEMSIS) Elite database system as Georgia's pre-hospital care reporting system, (b)the Online Analytical Statistical Information System (OASIS) that enables public and professional access to DPH's data warehouse of the latest Hospital Discharge, ER Visit, and Death data, and a formal

Trauma Registry maintained for all designated trauma center data and records. These records are uploaded into the CDC data query program WISQARS.

Traffic Records System Data Attributes

Quality traffic records data exhibiting the six primary data quality attributes—timeliness, accuracy, completeness, uniformity, integration, and accessibility—is necessary to improve traffic safety and effectively manage the motor vehicle transportation network, at the Federal, State, and local levels. Such data enables problem identification, countermeasure development and application, and outcome evaluation. Continued application of data-driven, science-based management practices can decrease the frequency of traffic crashes and mitigate their substantial negative effects on individuals and society.

Timeliness

Timeliness reflects the span of time between the occurrence of some event and the entry of information from the event into the appropriate database. Timeliness can also measure the time from when the custodial agency receives the data to the point when the data is entered into the database.

Accuracy

Accuracy reflects the number of errors in information in the records entered in a database. Error means the recorded value for some data element of interest is incorrect. Error does not mean that the information is missing from the records. Erroneous information in a database cannot always be detected.

Completeness

Completeness reflects both the number of records that are missing from the database (e.g., events of interest that occurred but were not entered into the database) and the number of missing (blank) data elements in the records that are in a database.

Uniformity

Uniformity reflects the consistency among the files or records in a database and may be measured against some independent standard, preferably a national standard.

Integration reflects the ability of records in a database to be linked to a set of records in another of the six core databases—or components thereof—using common or unique identifiers.

Accessibility

Accessibility reflects the ability of legitimate users to successfully obtain desired data. Accessibility is measured in terms of customer satisfaction.

TRAFFIC RECORDS COORDINATING COMMITTEE (TRCC)

Mission and Vision

The mission of the Georgia Traffic Records Coordinating Committee (TRCC) is to provide a forum for agencies involved in highway safety to communicate with each other and develop a joint approach to improving highway safety data. The specific objective is to evolve an overall traffic records system that is an integration of current stand-alone systems into a coherent whole; one that produces complete, accurate, and timely reports for each type of traffic record and that fully supports the identification, parameterization, and mitigation of highway safety problems of any nature.

Georgia's TRCC strives to create a traffic records system that is technically state-of-theart and fully integrated. Analyzing reliable and accurate traffic records data is central to identifying traffic safety problems and designing effective countermeasures to reduce injuries and deaths caused by crashes.

The TRCC is governed by the principals and guidelines outlined within the Georgia TRCC Charter. This foundational document describes the powers and duties of the committee as specified in enabling state legislation. This authorization empowers each member to officially participate in the state's TRCC and leverage resources, streamline processes, integrate systems, and focus on strategic investments.

Note: The Georgia TRCC Charter is included in the Appendices.

Structure, Composition, and Function

TRCC Executive & Technical Committees

Georgia's TRCC consist of two committees — the Technical Committee and the Executive Committee. Both committees are comprised of a multidisciplinary membership that includes data owners, operators, collectors and users of traffic records and public health and injury control data systems, highway safety, highway infrastructure, law enforcement and adjudication officials, emergency medical services, injury control, driver licensing, and motor carrier agencies and organizations. The Executive Committee specifically consist of the chief executive officers (commissioners, directors, administrators, etc.) of those federal, state, and local member agencies that are responsible for major components of the Georgia Traffic Records System or their designated agent. All federal, state, and local agencies with a direct role in highway safety are eligible for membership in the Technical Committee. Other agencies may be members at the discretion of the Technical Committee.

The Executive Committee members hold positions within their agencies that enable them to establish policy, direct resources within their areas of responsibility, and set the vision and mission for the TRCC. The Executive Committee reviews and approves actions proposed by the Technical Committee and assists with identifying/providing resources. The Chairman of the Executive Committee is the Director of the Governor's Office of Highway Safety, Allen Poole. The TRCC Executive Committee convenes at least twice a year and whenever there is business to be conducted.

The Technical Committee is responsible – as defined by the Executive Committee – for the oversight and coordination of the state's traffic records system. The Technical Committee performs all planning, conducts all investigations, and prepares all project plans necessary to realize the mission and vision of the TRCC. The Chairman of the Technical Committee and Georgia Traffic Records Coordinator is Tanya Renaud with the Georgia Governor's Office of Highway Safety. The TRCC Technical Committee meets at least six times a year and whenever there is business to be conducted. Additionally, this committee meets in conjunction with CODES (Crash Outcome Data Evaluation System). CODES provides data integration and data accuracy to the TRCC by engaging data owners, developing a data linkage plan, accessing data quality, preparing data, performing data linkage, evaluating linkage results, recalibrating methods, selecting linked records, and conducting analysis of the traffic records data.

Together, the two tiers of the TRCC are responsible for developing strategies, coordinating implementation, and tracking progress of programs and projects detailed in the TRCC's strategic plan.

Note: The Georgia TRCC meeting dates and Georgia TRCC Executive and Technical Committee membership by name, title, home organization and the core safety database represented are included in the Appendices.

TRCC Subcommittees

An additional common structural feature of Georgia's TRCC are subcommittees — both permanent and ad-hoc. Permanent subcommittees are established by Georgia's TRCC to address issues, such as data integration, which are specific to a subset of the membership and will remain as issues for the foreseeable future. For FFY 2020 and onward, the TRCC Technical Committee created a subcommittee to develop data fact sheets for the Strategic Highway Safety Plan emphasis areas to inform traffic safety professionals and the public on traffic safety issues and resources in Georgia. Ad-hoc committees are often established to bring together subject matter experts charged with making recommendations to the full TRCC on an issue that would otherwise occupy too much time to be practically managed in the usual TRCC meeting context. For FFY 2020, the TRCC Technical Committee established an ad-hoc committee to update the serious injury definition.

TRAFFIC RECORDS ASSESSMENT

Fixing America's Safety Surface Transportation Act (FAST ACT) legislation requires States to conduct or update an assessment of its highway safety data traffic records system every 5 years to qualify for 405(c) grant funding. Georgia's most recent Traffic Records Assessment was completed on June 17, 2019 by the National Highway Traffic Safety Administration, Technical Assessment Team. Recommendations from the result of the 2019 Georgia Traffic Records Assessment are listed below.

2019 RECOMMENDATIONS

Crash Recommendations

- 1. Improve the data quality control program for the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- 2. Improve the interfaces with the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory

Vehicle Recommendations

- 3. Improve the data dictionary for the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- 4. Improve the data quality control program for the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- 5. Improve the interfaces with the Vehicle data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.

Driver Recommendations

- Improve the data quality control program for the Driver data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- 7. Improve the interfaces with the Driver data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.

Roadway Recommendations

8. Improve the applicable guidelines for the Roadway data system to reflect

- best practices identified in the Traffic records Program Assessment Advisory.
- 9. Improve the data dictionary for the Roadway data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- 10. Improve the data quality control program for the Roadway date system to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- 11. Improve the procedures/process flows for the Roadway data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.

Citation/Adjudication Recommendations

- 12. Improve the applicable guidelines for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- 13. Improve the data dictionary for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- Improve the description and contents of the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- 15. Improve the procedures/process flows for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.

Injury Surveillance Recommendations

- Improve the data quality control program for the Injury Surveillance systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.
- 17. Improve the interfaces with the Injury Surveillance systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.

Appendix 1: Georgia TRCC Charter

Georgia's Traffic Records Coordinating Committee (TRCC) Charter

1 Traffic Records Definition

Traffic Records are those records and databases residing in all agencies and jurisdictions that are or could be useful in identifying Highway Safety problems, formulating programs to mitigate these problems, and evaluating the results of these programs. These Traffic Records are not necessarily under the control of TRCC members, nor are they necessarily targets of the TRCC's improvement projects. These Traffic Records include, but are not limited to:

- a. Primary Databases, which contain data directly bearing on crashes, causes, and consequences:
 - Crash Reports
 - Fatal Accident Reporting System (FARS)
 - EMS Patient Care Reports
 - Hospital In-Patient Discharge Reports
 - Trauma Registry
 - Traffic Citations
 - Motor Carrier Safety Inspection Reports
 - Driver Records
 - Death Certificate Records
 - Injury Surveillance (DPH/OEMS)
- b. Supporting Databases, which provide location specific, context, or other supporting data:
 - Road Characteristics File, describing relevant parameters of roads
 - Statewide and jurisdiction specific road maps, including both geometric parameters and standard names and route designations for all roads
 - Vehicle Title and Registration Records

These various Traffic Record types will be referred to hereafter as Traffic Record Systems (or information systems) if referring to the processes of collecting, communicating, storing, and analyzing the data; or as a record or database if referring to the data itself.

2 Rationale for a TRCC

The individual records of the Traffic Record databases identified above originate from local or state agencies, and statewide databases are maintained by a State agency or, in some cases, are non- existent. Responsibility for the various components (collection, storage, etc.) of many of these Traffic Record Systems, at both the state and local level, is spread among many agencies with very different primary functions or missions.

In order for these various Traffic Record databases to be useful in addressing highway safety problems, the exchange of data between agencies, and integration of data between various information systems must be both possible <u>and</u> efficient. Since these information systems were independently developed over the last several decades, data sharing is barely, if at all, possible, and is certainly not efficient.

Each of the agencies involved with these Traffic Record Systems have their own missions and priorities. Communication between the involved agencies is typically limited to those subjects of direct mutual interest. For this reason, and because each agency is funded and held responsible only for its own mission, cooperation between agencies is also usually limited to known mutual interests. These agencies typically have limited knowledge of each other's organization, operations, information systems, and data needs.

The solution, assuming willing partners, is a forum in which each agency involved with Traffic Records can periodically meet to discuss their missions, organizations, operational processes, information system activities, data products, data needs, etc. The overall objective of these exchanges is to find ways for the agencies to work more synergistically, i.e., to accomplish their missions more effectively and efficiently than is possible if each act strictly on its own.

This is especially critical for those Traffic Record Systems whose components and users are spread across many local and state agencies, e.g., Crash Reports, Traffic Citations, and EMS Run Records. The TRCC is the forum for accomplishing this inter-agency communication and developing a team approach to improving highway safety information.

3 Background

Traffic Records Coordinating Committees, or their equivalents with other names, exist in many states. In 1997, the Transportation Efficiency Act for the 21st Century (TEA-21) and implementing Federal regulations established a program to encourage the formation of TRCCs in all States, this is usually referred to as Section 411. Section 411 allowed grants to States that would establish multidisciplinary (agencies with all involved functions) TRCCs and commit them to the goal of improving the State's traffic record systems. An audit of the State's traffic record systems was conducted to identify areas that needed improvement, and a strategic plan was required to define how the State would go about improving its traffic record systems. The Section 411 grants were available for a maximum of six years, expiring in federal FY 2003. Georgia received three years of Section 411 grants for its TRCC.

Georgia had a TRCC during the years 2000 through 2003. While that TRCC made significant progress in some areas, it was not able to produce a comprehensive and coordinated program for improving Georgia's Traffic Records. Many of the TRCC's problems can be directly attributed to the lack of a charter, formal structure, or procedural rules. This situation resulted in an inability to formulate recommendations, present these recommendations to member agencies' management, and obtain member approval and funding for the recommendations. This TRCC was effectively disbanded in early 2003.

In 2005, a reconstituted TRCC was established. If this TRCC is to be effective, its mission, structure, and procedures must be formalized. In addition, the methods by which the committee will influence its members must be determined, and approaches to funding and implementing recommended programs must be defined. These are the purposes of this document.

4 TRCC Mission

The mission of the TRCC is as follows:

"The Traffic Records Coordinating Committee will provide a forum for agencies involved in highway safety to communicate with each other and develop a joint approach to improving highway safety data. The specific objective is to evolve an overall Traffic Records System that is an integration of current stand-alone systems into a coherent whole; one that produces complete, accurate, and timely reports for each type of traffic record and that fully supports the identification, parameterization, and mitigation of highway safety problems of any nature."

5 Traffic Records Vision

This vision statement describes the <u>desired</u> state of Georgia's Traffic Records at some unspecified point in the future. Member agencies are not committed to a specific timeline for achievement of this vision.

Georgia's Traffic Record Systems should be technically state-of-the-art and fully integrated with each other. To support this objective:

- Relevant records of events (crashes, citations, etc.), vehicles, roadways, and individuals(with appropriate protection of privacy rights) within all systems should be capable of being linked to provide a more complete picture of events, circumstances, causes, and consequences.
- The data within all systems should be consistent, compatible, integrated, and similar data items should be comparable.
- Each of Georgia's Traffic Record Systems should produce complete, accurate, and timely reports. For most of the Primary Databases, achievement of this objective requires:
- Reports should be prepared electronically, potentially at the location of the event being reported, and error detection and correction should be performed at the time of report preparation.
- Reports should be processed and electronically communicated as soon as possible after collection to both local and statewide databases as appropriate.
- Reports should be entered into the appropriate databases, local and state, as soon as possible after receipt.
- Individual reports should be available to legitimate and authorized users as soon as possible after entry into the appropriate databases.

Georgia's Traffic Record Systems should allow users to quickly identify emerging highway safety problems and issues, as well as quantify trends in highway safety statistics. Mitigation strategies can be developed and implemented in a time frame appropriate for both urgent problems and undesirable trends. Follow-up evaluations can be conducted to determine the effectiveness of mitigation strategies. This objective would be implemented by automated and manually activated analysis tools that can:

- Access all Traffic Records Systems,
- Identify associated records across all Traffic Records Systems.
- Integrate data from all associated records and databases, and

 Produce comprehensive and easily understood reports/views of the events, causes, and consequences associated with specific emerging problems or statistical trends.

6 TRCC Structure, Function and Composition

1.1.1 TRCC Structure and Composition- the State traffic records coordinating committee:

- 1. Is chartered
- 2. Meets at least three times annually
- 3. Has a multidisciplinary membership that includes owners, operators, collectors, and users of traffic records and public health and injury control data systems highway safety, highway infrastructure, law enforcement and adjudication officials, and public health, emergency medical services, injury control, driver licensing, and motor carrier agencies and organizations; and at least one member represents each of the following core safety databases:
 - (A) Crash
 - (B) Citation or adjudication
 - (C) Driver
 - (D) Emergency medical services or injury surveillance system
 - (E) Roadway
 - (F) Vehicle
- 4. Has a designated TRCC coordinator

2.1.2 TRCC Functions- The traffic records coordinating committee shall-

- Have authority to review the State's highway safety data and traffic records systems and any changes to such systems before the changes are implemented;
- Consider and coordinate the views of organizations in the State that are involved in the collection, administration, and use of highway safety data and traffic records systems, and represent those views to outside organizations;
- 3. Review and evaluate new technologies to keep the highway safety data and traffic records system current; and
- 4. Approve annually the membership of the TRCC, the TRCC coordinator, any change to the State's multi-year Strategic Plan, and performance measures to be used to demonstrate quantitative progress in the accuracy, completeness, timeliness, uniformity, accessibility, or integration of a core highway safety database.

3.1.3 TRCC Functions- The traffic records coordinating committee shall-

- Have authority to review the State's highway safety data and traffic records systems and any changes to such systems before the changes are implemented.
- Consider and coordinate the views of organizations in the State that are involved in the collection, administration, and use of highway safety data and traffic records systems, and represent those views to outside organizations.
- 3. Review and evaluate new technologies to keep the highway safety data and traffic records system current; and
- 4. Approve annually the membership of the TRCC, the TRCC coordinator, any change to the State's multi-year Strategic Plan, and performance measures to be used to demonstrate quantitative progress in the accuracy, completeness, timeliness, uniformity, accessibility, or integration of a core highway safety database.

The TRCC shall consist of two committees, which shall be referred to as the Executive Committee and the Technical Committee. The responsibilities, membership, officers, and procedures of each are addressed hereafter.

Executive Committee

4.1.4 Membership

The Executive Committee shall consist of the chief executive officers (Commissioners, Directors, Administrators, etc.) of those Federal, State and Local member agencies that are responsible for major components of the Traffic Records System, or their designated agent. Designated agents must have direct access to and be able to speak for the chief executive officer, at least after consultation, on any issue before the Executive Committee.

Members of the Executive Committee shall include, but not be limited to, the following agencies:

- Governor's Office of Highway Safety
- Department of Transportation
- Department of Driver Services
- Department of Public Health
- Department of Revenue
- Department of Public Safety
- Georgia Association of Chiefs of Police
- Georgia Sheriffs Association
- Administrative Office of the Courts
- Prosecuting Attorneys' Council

- National Highway Traffic Safety Administration
- Federal Highway Administration
- Federal Motor Carrier Safety Administration

5.1.5 Responsibilities

The Executive Committee shall perform all executive functions necessary to realize the TRCC's mission and vision. In particular, the Executive Committee shall consider recommendations of the Technical Committee, decide whether the recommendations shall be implemented, and if the decision is to implement, assist with identifying/providing resources. In addition, the Executive Committee may unilaterally promulgate changes it deems necessary to improve the Technical Committee, including its membership, responsibilities, officers, and procedures. The Executive Committee shall review and approve any changes to the Traffic Records Strategic Plan.

6.1.6 Officers

The officers of the Executive Committee shall consist of the Chairman and the Traffic Records Coordinator (hereafter referred to as the Coordinator). The permanent chairman of the Executive Committee shall be the Director of the Governor's Office of Highway Safety. The Chairman shall be responsible for calling meetings of the Committee and setting the agenda. The Coordinator shall be responsible for making meeting arrangements, preparing and publishing minutes, and coordinating all interactions between the Executive and Technical Committees.

7.1.7 Procedures

The Executive Committee shall meet at least quarterly and whenever necessary to consider recommendations from the Technical Committee or to conduct other necessary committee business. The Executive Committee shall establish any formal procedures it deems necessary to accomplish its responsibilities. The Executive Committee shall approve annually the membership of the TRCC, the selected TRCC Coordinator, and any changes to the Strategic Plan.

Technical Committee

8.1.8 Membership

All Federal, State and Local agencies with a direct role in highway safety are eligible for membership in the Technical Committee. Other agencies may be members at the discretion of the Technical Committee.

Federal agencies eligible for membership include, but are not limited to:

National Highway Traffic Safety Administration Federal Highway Administration Federal Motor Carrier Safety Administration

The state agencies eligible for membership include, but are not limited to:

- Governor's Office of Highway Safety
- Department of Driver Services
- Department of Transportation
- Department of Public Safety

- Department of Public Health
- Department of Revenue
- Administrative Office of the Courts
- Prosecuting Attorneys' Council
- Georgia Bureau of Investigation
- Georgia Brain and Spinal Injury Trust Fund Commission

The categories of local agencies eligible for membership include, but are not limited to:

- Police Departments and Sheriff Offices
- EMS Providers
- Road/Street and Traffic Engineering

Data Users eligible for membership include, but are not limited to:

- University researchers,
- · Highway safety advocacy groups

The actual membership is based on voluntary participation. However, the TRCC must strive to have a membership of all listed Federal and State agencies and a representative number of local agencies in the listed categories. A desirable number of local agencies would be roughly equal to the number of State Agencies.

The Technical Committee shall consist of those managers, or their representatives, responsible for traffic records systems components that exist within each member agency or for which the member has oversight responsibility. In general, the members of the Technical Committee should be technically oriented, from their agency's perspective, and able to actively contribute to the work of the committee. Specific categories for members of the Technical Committee are as follows:

- Representatives, who are the formal representatives of their agency or organization to the Technical Committee, who are expected to attend all meetings and participate in all consensus building efforts.
- Voting Representatives are the representatives of those member agencies who
 may vote on recommendations before the Technical Committee, and who are
 responsible for coordinating their agency's position and casting their agency's
 vote(s).
- Member agency employees, who may participate in any and all meetings and discussions as desired by their Representative.
- Guests, who are not employees of any member agency, but have been invited by a member agency, the Chairman, or the Coordinator. Guests may participate in meetings and discussions as desired by the member agency inviting them.

A Representative and one or more alternates shall be selected by each member agency. In the absence of an official designation, the senior (position) individual of the agency at any meeting is assumed to be the Representative of that agency. The Representative of each state and local member agency, or an alternate if the Representative is absent, is the Voting Representative.

9.1.9 Responsibilities

The Technical Committee shall perform all planning, conduct all investigations, and

prepare all project plans necessary to realize the mission and vision of the TRCC. Specifically required products of these activities are detailed in section 7.E of this document. Other products may be produced as necessary to fill these responsibilities.

10.1.10 Officers

The Technical Committee shall have the following officers:

- A Chairman that is responsible for calling meetings, preparing and distributing an agenda, guiding the meetings in accordance with the agenda, assuring that minutes are kept, and otherwise assuring that the committee's business is conducted in accordance with established procedures.
- A Traffic Records Coordinator (or Coordinator), who must be technically competent in all aspects of Traffic Records Systems, and who is responsible for preparing the strategic plan, planning for annual technical objectives, preparing agenda items dealing with technical issues, and otherwise guiding the committee in achieving its mission.

The Chairman and Coordinator are selected in accordance with Technical Committee procedures outlined in the following section. These may be a single individual or two separate individuals.

7 Technical Committee Procedures

These procedures address the most common needs of the Technical Committee, i.e., selection of the Chairman and Coordinator, conduct of meetings, making decisions on issues before the committee, making recommendations for improving Traffic Records System components under the members' control, and adopting new or modified procedures.

Selection of the Chairman

The chairman of the Technical Committee shall be selected from the following options, as recommended by vote of the Voting Representatives and approved by the Executive Committee: The Coordinator may serve as the Chairman, or Member agencies may appoint one of their Representatives to serve as chairman on a rotating basis.

If, after the initial selection, a change is desired, the Voting Representatives may decide annually which option to select for the upcoming federal fiscal year (October through September). If the rotating Chairmanship is selected, the rotation sequence among member agencies must be determined at that time and cannot be revoked until the rotation is completed except by unanimous agreement among the rotating member Representatives.

Conduct of Technical Committee Meetings

Technical Committee meetings shall be held at least quarterly and whenever there is business to be conducted. The time and place of the next meeting shall be established at the end of each meeting. The meetings should be held on a standard day of the month and time of day to the degree possible.

after a meeting. The minutes shall contain a list of all attendees, indicating the agency represented. The minutes shall document all major issues discussed, the key points of the discussion, any actions taken, any decisions made, and recommendations formed with respect to the issues. The minutes of each meeting shall be formally reviewed, corrected, and approved at the next meeting.

Technical Committee meetings shall be conducted in accordance with Robert's Rules of Order.

Decisions shall be made by consensus of all present <u>member Representatives</u>, when possible, unless specified otherwise in these procedures. If consensus cannot be reached for formal recommendations to the Executive Committee, decisions shall be made by vote of the Voting Representatives. No formal recommendations may be made, or votes taken unless a quorum is present. A quorum is defined to be 50% of current Voting Representatives or an authorized alternate. All official decisions are by a simple majority of the vote unless otherwise explicitly required in written procedures for the business at hand.

The Chairman and Coordinator have no vote on business matters before the Technical Committee, except in the case of a tie. The Chairman shall cast the tie-breaking vote on non-technical and Technical Committee procedure matters. The Coordinator shall cast the tie-breaking vote on technical matters. Each state member and local member category has the number of votes assigned elsewhere in this document.

Number of Votes Assigned Member Agencies

For the purposes of voting on issues before the Technical Committee, the following member Agencies, or categories of member agencies, are assigned the number of votes indicated.

- Governor's Office of Highway Safety 1 vote
- Department of Driver Services 1 vote
- Department of Transportation 1 vote
- Department of Public Health, Injury Prevention 1 vote
- Department of Public Health. Office of EMS and Trauma 1 vote
- Department of Public Health, Office of Health Indicators for Planning 1 vote
- Department of Public Safety 1 vote
- Police Departments 1 vote
- Sheriff Offices 1 vote
- Administrative Office of the Courts 1 vote
- Prosecuting Attorneys' Council 1 vote
- Local Traffic/Road Engineering Agencies 1 vote
- Local EMS Providers 1 vote

Technical Committee. Members of the categories (Local Enforcement, Traffic Engineering, EMS Providers, etc.) must decide among themselves how to cast their votes. There must be at least two members of the category present or having provided written voting instructions in order to cast two votes. If only a single member agency of the category is present, and no written voting instructions are available from absent member(s), only one vote may be cast. If the issue to be voted upon has no direct impact on an agency, they may not be permitted to vote. Those cases will be determined by the Chairman on an issue-by-issue basis.

Voting/non-voting status and the assigned number of votes for each member/category may be changed as with any other Technical Committee procedure, i.e., any member, the Chairman, or the Coordinator may propose a change, the recommendation must be approved by the current voting members, and the Executive Committee must approve the change.

Subcommittees

From time to time, subcommittees will be required to conduct the more detailed aspects of the Technical Committee's business. Establishment of a subcommittee shall require the approval of the member Representatives. After approval, the individuals to serve on these subcommittees will be selected jointly by the Chairman and Coordinator. The Chairman shall have final authority if the subcommittee will address a non-technical matter. The Coordinator shall have final authority if the subcommittee will address a technical matter. To the degree feasible and appropriate, all categories of member agencies should be represented on subcommittees.

Traffic Record System/Component Recommendations

The Technical Committee shall recommend a long-range Strategic Plan and year-to-year specific improvement projects for the State's Traffic Record Systems; both aimed at achieving the vision set forth herein. In many, if not most cases, the specific projects involve multiple agencies and multiple components of at least one Traffic Records System. In all cases, one or more member agencies must agree to the recommended project and find a way to implement the improvement.

The primary Technical Committee recommendations to member agencies shall take the form of a single long-range Strategic Plan and an Annual Plan each year identifying specific projects to be addressed that year.

The Strategic Plan is developed once, approved by the Technical Committee's Voting Representatives, and updated annually along with the Annual Plan.

Once a complete and approved Strategic Plan is in place, the procedure for accomplishing this objective is:

 In November of each year, the Coordinator prepares an update to the Strategic Plan(if needed), a draft Annual Plan for the upcoming year, and a report of progress and status for the current year's activities. These items are Page | 129

- submitted to the Technical Committee at its November meeting. Funding requirements for each proposed program and suggested responsibility shall be included in the draft Annual Plan.
- During the November-December time frame, each Voting Representative shall present the draft Annual Plan to their agency's management and determine the agency's position on those elements directly affecting the agency. Primary and alternate funding possibilities shall specifically be addressed in these discussions. The Coordinator should be involved in these discussions when beneficial.
- The Technical Committee shall deliberate the content of the Annual Plan at its December meeting. Results of internal agency discussions shall be presented. Finally, the Technical Committee shall determine changes to be made to the Annual Plan.

The Coordinator shall make the required changes and provide to all member Representatives as quickly as possible. The Technical Committee shall vote on the Plan at its January meeting. The approved Plan shall be sent to the Executive Committee, with a formal request from the Chairman and Coordinator for support of the program.

During the course of the year, if either the Technical Committee or a member agency feels the need for additional recommendations, a similar process shall be followed, i.e.:

- The requested recommendation shall be presented to the Technical Committee by the Chairman, Coordinator, or member Representative who has identified theneed.
- The Coordinator, working in concert with the originator, shall investigate and develop necessary documents, plans, etc. needed to formalize the recommendation.
- The recommendation shall be presented internally to each member agency by the agency's Representative to develop a position, identify funding needs and possible sources, etc., as appropriate. The originator and/or Coordinator should be involved as beneficial.
- The Technical Committee shall deliberate the recommendation at its next meeting, receive input from all member Representatives, and determine necessary changes.
- After making all required changes, the Coordinator shall distribute the recommendation to all member Representatives as soon as possible. The Technical Committee shall decide on the recommendation at the next Technical Committee meeting.
- Approved Recommendations shall be sent to the Executive Committee, with a formal request from the Chairman and Coordinator for approval and support.

When time is critically short, the above process can be shortened through the use of email for distribution of documents, and votes by either or both the Technical and Executive Committee may be conducted via e-mail.

8 **Certification and Signature**

I hereby certify that this is the current TRCC Charter, as approved by the TRCC Executive Committee.

Appendix 2: Georgia TRCC Members

Georgia Traffic Records Executive Committee				
Georgia Governor's Office of Highway Safety	Allen Poole, Director, TRCC Executive Committee Chairman			
Georgia Department of Transportation Core Data System(s): Crash & Roadway	Russell McMurry, Commissioner			
Georgia Department of Driver Services Core Data System: Driver	Spencer Moore, Commissioner			
Georgia Department of Public Health Core Data System: Injury Surveillance	Lisa Dawson, Director of Injury Prevention			
Prosecuting Attorneys' Council of Georgia Core Data System: Adjudication	Peter J. Skandalakis, Executive Director			
Georgia Department of Revenue Core Data System: Vehicle	Robin Crittendon, Interim Commissioner			
Georgia Department of Public Safety Core Data System(s): Crash & Citation	Col. Chris Wright, Commissioner			
Georgia Association of Chief Police Core Data System(s): Crash & Citation	A.A. "Butch" Ayers, Executive Director			
Georgia Sheriffs Association Core Data System(s): Crash & Citation	J. Terry Norris, Executive Director			
Administrative Office of the Courts (AOC) Core Data System: Citation & Adjudication	Darron J. Enns, Esq., Policy Analyst			
National Highway Traffic Safety Administration (NHTSA)	Carmen Hayes, NHTSA Region 4, Regional Administrator			
Federal Highway Administration (FHWA)	Moises Marrero, Georgia Division Administrator			
Federal Motor Carrier Safety Administration (FMCSA)	Danny McPeters , Georgia Division Administrator			

Georgia Traffi	c Records Technical Committee
Georgia Department of Transportation Core Data System(s): Crash & Roadway	Dave Adams, State Safety Program Manager Brian Vann, Assistant State Safety Data Manager
Georgia Department of Driver Services Core Data System: Driver	Selena Norris, Business Process Analysis Manager Mechelle Cooper, GECPS, Court Auditor
Georgia Department of Public Health Core Data System: Injury Surveillance	Office of EMS and Trauma David Newton, Director, GA Office of EMS & Trauma Cassie Longhart, EMS Data Manager Dipti Patel, GEMSIS System Administrator Renee Morgan, Trauma Program Director Danlin Luo, Trauma Epidemiologist
	Office of Health Indicators for Planning (OHIP) David Austin, Director of Data Quality & Analysis Team
	Injury Surveillance and Prevention Program Lisa Dawson, Director, Injury Prevention Elizabeth Head, Deputy Director, Injury Prevention Denise Yeager, CODES Manager and Lead/Data Evaluation Patricia Daniel, CODES Quality Assurance Specialist Phillip Hudson, Program Consultant
Georgia Department of Revenue Core Data System: Vehicle	Keith Thomas , Senior Manager, Motor Vehicle Application Development & Support
Injury Prevention Research Center @ Emory (IPRCE) Core Data System: Injury Surveillance	Dr. Jonathan Rupp, IPRCE Executive Associate Director
Judicial Council of Georgia / Administrative Office of the Courts Core Data System: Citation & Adjudication	Ben Luke, Chief Technology Officer
LexisNexis	Bob Dallas, Consultant
University of Georgia	Elliot Daimler, Traffic Safety Research and Evaluation Group
National Highway Traffic Safety Administration	Vacant, Region 4 Program Manager
Georgia Governor's Office of Highway Safety	Eshon Poythress, Strategic Planning Operations Manager Tanya Renaud, Georgia Traffic Records Coordinator Roger Hayes, Director, Law Enforcement Services Emerson Lundy, Law Enforcement Liaison Shenee Bryan, Contracted Epidemiologist

Appendix 4: FFY 2022 Traffic Records Projects

These projects will address the 2019 Traffic Records Assessment recommendations in progress.

	Project Title	Status	Lead Agency	405c TR Funded
	Georgia Traffic Records Program	In Process	GOHS	Yes
Project Description	This project uses NHTSA Section 405(c) funds to fund the GOHS GA Traffic Records program staff and traffic records information systems' projects to improve the timeliness, accuracy, completeness, uniformity, integration, and accessibility of Georgia's traffic records data.			
Project Objective	To improve the accuracy, timeliness, accessibility, integration, & uniformity of the Georgia traffic records information system			
Traffic Records System Components	Entry OF C			

	Project Title	Status	Lead Agency	405c TR Funded
	OEMS GEMSIS Elite	In Process	Georgia Department of Public Health	Yes
Project Description	The Georgia Office of EMS and Trauma (OEMS) developed the Georgia Emergency Medical Services Information System (GEMSIS) as Georgia's prehospital care reporting system. This project uses NHTSA Section 405c funds to maintain the Georgia Emergency Medical Services Information System (GEMSIS) in NEMSIS v3.4.0, to archive the NEMSIS 2.2.1 data, begin work to prepare GEMSIS for NEMSIS v3.5., maintain GEMSIS Datamart, and progress towards achieving the time-to-care metric through deterministic linking of EMS data.			
Project Objective	To improve the accuracy of EMS patient care reports via GEMSIS Elite training and to link EMS data on patients with critical injuries in motor vehicle crashes with GDOTs crash database via deterministic data linking of crash, EMS and trauma registry reports using the system of care armbands.			
Traffic Records System Components				

	Project Title	Status	Lead Agency	405c TR Funded
	GECPS Outreach	In Process	Georgia Department of Driver Services	Yes
Project Description	This project provides a secure and accurate method of electronic transmission of conviction data from Georgia courts to the State within 10 days of adjudication as well as trains and educates courts on the Georgia Electronic Conviction Processing System (GECPS) for this purpose. This project continues to support Georgia courts and law enforcement by continuing to provide additional functionality/enhancements to the GECPS system for electronic submission of conviction processing.			0 days of Georgia Electronic This project by continuing to
Project Objective	Reduce error rates by identifying and targeting courts that require additional training and technical assistance by studying errors and by attending to court support requests.			
Traffic Records System Components				

	Project Title	Status	Lead Agency	405c TR Funded
	Support for CODES Crash Data Linkage	In Process	Georgia Department of Public Health	Yes
Project Description	The Georgia Crash Outcome Data Evaluation System (CODES) project uses probabilistic techniques to link crash data, injury surveillance data and other traffic records data. This project creates linked data for analysis by Georgia's highway safety partners to improve the accuracy and integration of the state's traffic records data in direct support of NHTSA's performance measure criteria. This provides a path for public health, highway safety, and other partners to collaborate on the prevention of crashes.			
Project Objective	To develop and maintain relationships with data owners, users, and injury prevention stakeholders to link crash data and other injury surveillance data as well as to promote the creation and use of integrated datasets.			
Traffic Records System Components	EM7			

	Project Title	Status	Lead Agency	405c TR Funded	
	LEA Technology Grant GACP	In Process	Georgia Association Chiefs of Police	Yes	
Project Description	The GACP will provide select law enforcement agencies with computer hardware (mobile data units) needed to submit crash reports electronically to the state through the GEARS system. This project will also provide funds for the mounting of these units into patrol vehicles as well as printers to be placed in the vehicles for the purpose of printing electronic crash reports.				
Project Objective	To improve crash reporting accuracy by law enforcement agencies through electronic crash reporting that will validate, detect, and prevent errors at the point ofdata entry. Improve the timeliness of crash reports submitted to GEARS by replacing paper records with electronic records.				
Traffic Records System Components	Emys Eyns				

	Project Title	Status	Lead Agency	405c TR Funded
	OASIS	In Process	Georgia Department of Public Health	Yes
Project Description	The Online Analytical Statistical Information System (OASIS), DPH's query system, provides online access to data visualizations. Data services to partners are supported using the departmental data warehouse with stewardship of the latest Hospital Discharge, ER Visit, Death, Population and MV Crash data (if authorized by GDOT). Value-additions included data quality controls, calculated variables such as injury severity scores, and geography variables. Updates will include injury severity cross-validations and population changes due to Census 2020.			. Data lata e, ER Visit, DT). Value- s such as ll include
Project Objective	To improve the accessibility, completeness, and quality of Georgia's traffic records system by enhancing the OASIS data repository with additional health and demographic indicators, updated data sets, cross-source quality checks and new ways of visualizing data.			
Traffic Records System Components				

	Project Title	Status	Lead Agency	405c TR Funded
	Numetric	In Process	Georgia Department of Transportation	No
Project Description	Georgia is developing tools through Numetric to improve the analysis of the state's crash database. This software data analytics application provides graphical, tabular, and spatial tools to explore crash data in a GIS interface to pinpoint the root causes of crashes and identify the best countermeasures. Additionally, network screening is offered to rank segments, curves, and intersections by the attributes that matter most to Georgia traffic safety stakeholders as well as access to workbooks with customizable static reports, dashboards, and analytics tools.			
Project Objective	To improve the user experience and advance the state's ability to analyze data and identify appropriate countermeasures as well as enable our law enforcement liaisons to work with individual law enforcement agencies to improve the timeliness, accuracy, and completeness of their crash reports.			
Traffic Records System Components	Entry 2)		

	Project Title	Status	Lead Agency	405c TR Funded	
	DRIVES	In Process	Georgia Department of Revenue Georgia Department of Driver Services	No	
Project Description	The Georgia Department of Revenue (DOR) and the Department of Driver Services are implementing a joint modernization system, known as Georgia DRIVES (Driver Record and Integrated Vehicle Enterprise System), to transform the way Georgia provides driver licensing, vehicle registration, and titling system services.				
Project Objective	To ensure consistent customer data and improve the accuracy of driver information between the two agencies that support driver functions.				
Traffic Records System Components		9			

	Project Title	Status	Lead Agency	405c TR Funded
	NHTSA Technical Assistance Program - Statewide EMS Reassessment	In Process	GOHS	No
Project Description	This program uses NHTSA Section 402 TR funds to fund the NHTSA Technical Assistance (TA) Program Statewide EMS Reassessment in Georgia.			
Project Objective	To assess and evaluate Georgia's current EMS system effectiveness in relation to the original EMS assessment, subsequent EMS program modifications, and integration of new technology or nationally accepted standards.			
Traffic Records System Components				

Appendix 5: Performance Measures

Note: Crash records include crash occupants (drivers, passengers, and pedestrians).

CRASH	Performance Measure	Definition
Accuracy	Percent of crash records with an A injury linked to a hospital record with a defined serious injury by AIS	Number of A crash records that link to a hospital discharge record with a maximum AIS score of 3 or higher/total number of crash records
Integration	Total (percent) of crash records linked to ED only records	Number of crash records linked to an ED record/total number of crash records
	Total (percent) of crash records linked to hospital discharge records	Number of crash records linked to a hospital discharge record/total number of crash records
	Total (percent) of crash records linked to EMS records	Number of crash records linked to EMS records/total number of crash records
	Total (percent) of linked crash records with an A injury	Number of linked crash records with an A injury/total number of A crash records
	Number of traffic records data systems linked with crash records	
VEHICLE		
Integration	Total (percent) of vehicle records linked to crash records	Number of vehicle records linked to a crash records/total number of vehicle records
DRIVER		
Integration	Total (percent) of driver records linked to crash records	Number of driver records linked to a crash record/total number of driver records
CITATION/ADJU	DICATION	
Integration	Total (percent) of citation records linked to driver records	Number of citation records linked to a driver record/total number of citation records
INJURY SURVEI	LLANCE - EMS	
Accessibility	Number of users accessing Biospatial, GEMSIS Elite, and NEMSIS data for quality improvement or research	

Accuracy	Percent of EMS records with no errors in critical data elements (e.g., for eResponse.08 – Type of Dispatch Delay, you cannot answer both "Technical Failure" and "None/No Delay")	Number of EMS records with no errors in critical data elements/total number of EMS records Will implement validation rules for dispatch delay, response delay, scene delay, transport delay, and turn-around delay to address conflicting values.
Completeness	Percent of unknowns or blanks in critical data elements for which unknown is not an acceptable value	Reduce the number of unknown values by establishing validation rules that do not allow unknown or blank responses to patient location and facility destination
Integration	Total (percent) of EMS records linked to ED/hospital and crash records	Number of EMS records linked to an ED/hospital and crash record/total number of EMS records
Timeliness	Percent of EMS records submitted to the state within 24 hours of call completion	Number of EMS records submitted to the state within 24 hours of call completion/total number of EMS records
Uniformity	Percent of EMS records compliant to NEMSIS and Statedata submission standards	Number of EMS records compliant to NEMSIS and Statedata submission standards/total number of EMS records

INJURY SURVEI	LLANCE - TRAUMA REGISTRY	
Accessibility	Number of users who have access to Biospatial, NTDB, and OASIS data for quality improvement or research	
Accuracy	Percent of Trauma Registry records with no errors in critical data elements	Number of Trauma Registry records with no errors in critical data elements/total number of trauma records
Completeness	Percent of unknowns or blanks in critical data elements of Trauma Registry for which unknown is not an acceptable value	

Integration	Total (percent) of Trauma Registry records linked to EMS records	Number of Trauma Registry records linked to EMS records/total number of Trauma Registry records
Timeliness	Percent of trauma records submitted to the state within 60 days of patient discharge	Number of trauma records submitted to the state within 60 days of patient discharge/total number of Trauma records
Uniformity	Percent of Trauma Registry records compliant to National Trauma Data Standards	Number of Trauma Registry records compliant to National Trauma Data Standards/total number of Trauma Registry records
INJURY SURVE	ILLANCE – ED/HOSPITAL RECORDS	
Integration	Total (percent) of ED/hospital records linked to EMS and crash records	Number of ED/hospital records linked to EMS and crash records/total number of ED/hospital records
Uniformity	Percent of shared fields that are uniformly defined	Number of ED/hospital records that have a common definition, list of valid values and format/total number of Vital Records
Accuracy	Percent of ED/hospital records with a hospital defined serious injury by AIS	Number of ED/hospital records that link to a hospital discharge record with a maximum AIS score of 3 or higher/total number of ED/hospital records
INJURY SURVE	ILLANCE – STATE VITAL RECORDS	
Integration	Total (percent) of Vital Records (death) linked to crash records	Number of Vital Records linked to a crash record/total number of Vital Records
Uniformity	Percent of shared fields that are uniformly defined	Number of Vital Records that have a common definition, list of valid values and format/total number of Vital Records

Appendix 6: Update to Traffic Records Assessment Recommendations

	GEORGIA TRAFFIC RECORDS ASSESSMENT RECOMMENDATIONS JUNE 2022							
DATA SYSTEM	REC NUMBER	RECOMMENDATION	Non-Implemented	Some Progress	Significant Progress	Complete	NOTES	
	1	Improve the data quality control program for the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.			X		Georgia has developed several additional data quality control queries to identify data errors for each law enforcement agency in the state. The queries are run each month, and error rates are shared with agencies through our law enforcement liaisons. The queries were built through collaboration between the GDOT, GOHS and the TRCC Technical Committee. SHSP and HSIP have been coordinated and the required reports have been completed to fulfil required recommendations. Note: Refer to FFY 2022 Traffic Records Projects Numetric and LEA Technology Grant GACP.	
Crash	2	Improve the interfaces with the Crash data system to reflect best practices identified in the Traffic Records Program Assessment Advisory.			X		Georgia has advanced our partnership with Numetric Inc. This software data analytics application provides graphical, tabular, and spatial tools to improve user experience and advance the state's ability to analyze data and identify appropriate countermeasures. We have added a public dashboard and provided access to the full software suite to our highway safety partners. GDOT has updated the boundary data, updated the social vulnerability index data, added the 2021 data, improved query definitions (such as distracted driving), and conducted multiple training sessions over the previous year. Note: Refer to FFY 2022 Traffic Records Projects Numetric and LEA Technology Grant GACP.	

GEORGIA TRAFFIC RECORDS ASSESSMENT RECOMMENDATIONS JUNE 2022 REC Some Significant **DATA SYSTEM Progress Progress NUMBER** Complete RECOMMENDATION Non-Implemented **NOTES** Improve the data The Georgia Department of Revenue (DOR) deployed a dictionary for the Vehicle major transformation of its' business systems in January data system to reflect best 3 Χ 2021. Georgia DRIVES (Driver Record and Integrated practices identified in the Vehicle Enterprise System) will modernize the vehicle Traffic Records Program registration and titling system and integrate this system Assessment Advisory. with the Department of Driver Services System. This project is currently in the implementation phase. Program Assessment Keith Thomas, Senior Manager, Motor Vehicle X 4 Advisory. Vehicle Application Development & Support at the Georgia Department of Revenue will be assigning a DOR team member to actively participate in the TRCC. We look forward to periodic quality reports at our FFY 2023 TRCC Improve the interfaces Technical Committee meetings as well as a potential with the Vehicle data opportunity for the TRCC to offer support for needed DOR system to reflect best Χ 5 vehicle record system enhancements as we move practices identified in the towards addressing the 2019 Traffic Records Assessment Traffic Records Program Vehicle Recommendations. Assessment Advisory.

GEORGIA TRAFFIC RECORDS ASSESSMENT RECOMMENDATIONS JUNE 2022 REC Significant Some **DATA SYSTEM NUMBER Progress Progress** RECOMMENDATION Non-Implemented Complete **NOTES** Georgia deployed a major transformation of its' Improve the data quality business systems in coordination with the Georgia control program for the Department of Revenue in January 2021. The new system, Driver data system to Driver Record and Integrated Vehicle Enterprise System 6 reflect best practices Χ (DRIVES) incorporated all driver related data and identified in the Traffic processes into a single system. The DRIVES system Records Program provides programmatic controls to help ensure data is Assessment Advisory. properly created, updated, and shared. Timeliness measures are calculated by taking the monthly averages. Error rate measures are calculated by Driver taking the average number of citations rejected per month. DDS saw an improvement of 5% in CDL citation Improve the interfaces submission timeliness and an overall improvement of with the Driver data 3% in citation submission timeliness for Commercial system to reflect best and Non-Commercial submissions combined. These 7 X practices identified in the improvements can be attributed to the weekly training Traffic Records Program and audits conducted by the DDS staff. DDS conducted Assessment Advisory. trainings for 703 clerks and 91 Judges. DDS also conducted 75 court audits. The submission error rate from the courts over the last 12 months is 2.97%. All DDS interfaces have been modernized and reflective of current industry best practices.

GEORGIA TRAFFIC RECORDS ASSESSMENT RECOMMENDATIONS JUNE 2022 REC Significant Some **DATA SYSTEM NUMBER Progress Progress** RECOMMENDATION Non-Implemented Complete **NOTES** Over the past year, Georgia has updated traffic data and Improve the applicable removed most overlapped segments in GIS. We have guidelines for the loaded our intersection locations for initial screening Roadway data system to and evaluation. We have updated our crash mapping 8 reflect best practices Χ approach to focus on crash severity. These changes are identified in the Traffic being loaded our Numetric platform that is being used by records Program more than 400 users statewide. Assessment Advisory. Note: Refer to FFY 2022 Traffic Records Projects Numetric. Improve the data dictionary for the Georgia is reviewing the attributes and updating process Roadway data system to documents and the data dictionary to ensure that our 9 reflect best practices Χ editing processes are reflective of the standards of MIRE. identified in the Traffic MIRE implementation continues as planned. Records Program Note: Refer to FFY 2022 Traffic Records Projects Numetric. **Roadway** Assessment Advisory. Improve the data quality control program for the Georgia has updated their process documents to include Roadway date system to a more defined/thorough QC process so that all updating 10 reflect best practices Χ is aligned with federal standards. MIRE implementation identified in the Traffic and documentation is ongoing. Note: Refer to FFY 2022 Traffic Records Projects Numetric. Records Program Assessment Advisory. Improve the procedures/process flows for the Roadway data Georgia has updated their process documents so that all 11 system to reflect best Χ updating is aligned with federal standards. practices identified in the Traffic Records Program Assessment Advisory.

	GEORGIA TRAFFIC RECORDS ASSESSMENT RECOMMENDATIONS JUNE 2022							
DATA SYSTEM	REC NUMBER	RECOMMENDATION	Non-Implemented	Some Progress	Significant Progress	Complete	NOTES	
	12	Improve the applicable guidelines for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.						
	13	Improve the data dictionary for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program					In FFY 2021, the TRCC Technical Committee acquired a new member, Ben Luke, Chief Technology Officer at the Judicial Council of Georgia/Administrative Office of the Courts. Through the active participation of the JC/AOC in	
Citation/ Adjudication	14	Improve the description and contents of the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.	Х				the TRCC, we look forward to citation/adjudication updates at our FFY 2022 TRCC Technical Committee meetings as well as a potential opportunity for the TRCC to offer support for needed AOC traffic records projects through networking with other members of the TRCC as we move towards addressing the 2019 Traffic Records Assessment Vehicle Recommendations.	
	15	Improve the procedures/process flows for the Citation and Adjudication systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.	x					

	GEORGIA TRAFFIC RECORDS ASSESSMENT RECOMMENDATIONS JUNE 2022							
DATA SYSTEM	REC NUMBER	RECOMMENDATION	Non-Implemented	Some Progress	Significant Progress	Complete	NOTES	
Injury Surveillance	16	Improve the data quality control program for the Injury Surveillance systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.		X			The Office of EMS and Trauma has a variety of linked platforms that provides data related to injuries to all vested stakeholders. These components include access to direct or uploaded record entries from GEMSIS Elite for EMS (existing in NEMSIS v2.2 and v3.4 platforms). Trauma registry data is now being submitted to Biospatial for data visualization. The integration of Biospatial has allowed the visualization of EMS data and Trauma Registry data for all EMS, Trauma Centers, The Department of Public Health, and all other vested stakeholders. Data is collected from the hospital's emergency departments, discharge records, trauma registry, and vital records through the OASIS dashboard. The OASIS (Online Analytical Statistical Information System) offers access to summarized data to the public and professional audience. The trauma registry's current data set is NTDB compliant and available for analysis that includes severity. The reports are provided on request and for focused projects. The registry has a formal data dictionary but presently offers a limited means of EMS interface. It should be noted that the OEMS/T is in the process of implementing a new platform that will link Trauma and EMS data and will be available to Trauma Facilities. The trauma registry has made it easier to maintain data for all designated trauma facilities, and records are uploaded into the CDC data query program (WISQARS). Note: Refer to FFY 2022 Traffic Records Projects - OEMS GEMSIS Elite, OASIS, and Support for CODES Crash Data Linkage. The FFY 2022 quantitative progress reports are included in Appendix 7.	
	17	Improve the interfaces with the Injury Surveillance systems to reflect best practices identified in the Traffic Records Program Assessment Advisory.		X			The OEMS/T is currently working on implementing a new arm band initiative which will allow for the deterministic linking of EMS data with crash records and hospital records. The OEMST is currently in the phase of pulling in all stakeholders who will be part of pilot testing the new arm band initiative. We are in the process of education, training, and preparing those involved for the pilot test to begin. Note: Refer to FFY 2022 Traffic Records Projects - OEMS GEMSIS Elite, OASIS, and Support for CODES Crash Data Linkage. The FFY 2022 quantitative progress reports are included in Appendix 7.	

Appendix 7: Quantitative Progress Reports

Impacted	OTHER specify:							
Performance	Narrative Description of the Measure							
Measure used to								
track	The average time from call completion of a 911 call to the time the incident is received in							
Improvement(s)	GEMSIS Elite will improve.							
	This performance measure will look at the difference (in hours) between the EMS unit back in service (eTimes.13) and when the incident record has been entered or imported into GEMSIS Elite. The goal is for all 911 calls to be present in GEMSIS Elite within 24 hours of the call completion. The above criteria allow individual hospitals the ability to access patient care reports in a more timely manner, for better continuity of care.							
Relevant Project(s)	Title, number and strategic Plan page reference for each Traffic Records System improvement							
in the State's	project to which this performance measure relates							
Strategic Plan	OEMS GEMSIS Elite, FFY 2022-2024 Georgia Traffic Records Strategic Plan, p. 27							
Improvement(s)	Narrative of the Improvement(s)							
Achieved or Anticipated	From April 2021 to March 2022 the total number of incidents equaled 1,937,496 the average submission time equaled 95.39 hours, which is a decrease of 63.6% from the baseline.							
	Part of this improvement is due to the push by the Office of EMS and Trauma (OEMST) to get data into the system within 24 hours of call completion, and during COVID-19, OEMST published an Emergency Rule requiring EMS agencies to submit data within 24 hours. While this was secondary to the pandemic response, these changes showed proof that data could be entered and received by GEMSIS Elite in a more timely manner. The OEMST has formally adopted these data submission rules as part of the Department of Public Health rules and regulations.							
Specification of how	Narrative Description of Calculation / Estimation Method							
the Measure is calculated / estimated	The measure is calculated by obtaining the average number of hours between the EMS unit is back in service (eTimes.13) and when the incident record has been entered or imported into GEMSIS Elite.							

Date and Baseline	Baseline: April 1, 2020 – March 31, 2021
Value for the	PCRs entered = 1,743,552
Measure	Average time to enter 911 records: 149.98 hours

Completeness Validation Rule Example(s): The following rules address the completeness of the data submitted to GEMSIS Elite.

- Rule ID: 483 = Incident Street Address (eScene.15) is required (1 point)
- Rule ID: 486 = Unit Cancelled Date/Time (eTimes.14) is required on cancellations (1 point)
- Rule ID: 491 = Destination County (eDisposition.06) is required on transports (1 point)
- Rule ID: 492 = Destination Zip Code (eDisposition.07) is required on transports (1 point)

Uniformity Validation Rule Example(s): The following rules address the uniformity of the data by ensuring that the times listed on patient care reports are in a logical sequence based on the element definition.

- Rule ID: 440 = PSAP Call Date/Time (eTimes.01) Out of Sequence (1 point)
- Rule ID: 441 = Unit Notified by Dispatch Date/Time (eTimes.03) Out of Sequence (1 point)
- Rule ID: 442 = Unit En Route Date/Time (eTimes.05) Out of Sequence (1 point)
- Rule ID: 443 = Unit Arrived on Scene Date/Time (eTimes.06) Out of Sequence (1 point)
- Rule ID: 444 = Arrived at Patient Date/Time (eTimes.07) Out of Sequence (1 point)

Updated Validation Rules to Address Accuracy, Completeness, Timeliness, and Uniformity

Updates were made to current eTimes validation rules to improve documentation related to unit incident times are as follow:

- Rule ID: 440 = PSAP Call Date/Time (eTimes.01) out of sequence (1 point) (Tested Rule for upcoming NEMSIS v3.5.0 conversion)
- Rule ID: 445 = Patient Arrived at Destination Date/Time (eTimes.11) out of sequence (1 point) (Rule updated to no longer compare eTimes.11 to eTimes.08).
- Rule ID: 2499 = Date/Time Vital Signs Taken (eVitals.01) must occur before unit back in service time (eTime.13) (Rule inactive)
- Rule ID: 3019 = Date-Time Vital Signs Taken (eVitals.01) must occur before destination Patient Transfer of Care (eTimes.12) (1 point) (Rule created to replace previous rule 2499 to improve accuracy, completeness, and timeliness due to inaccurate documentation of vitals)

Improvement(s) Achieved or Anticipated	Narrative of the Improvement(s) The overall average validity score improved from a baseline of 97.61 to the current value of 98.59. This improvement comes during the midst of COVID-19, when more validation rules were added (thereby increasing the chances that the validity could go down). The Office of EMS and Trauma has focused heavily on improving the data that is submitted to GEMSIS Elite. Our focus has been frequent training and communication with licensed EMS agencies and their respective software vendors.

<<END >> FY2022-2024 GEORGIA TRAFFIC RECORDS STRATEGIC PLAN

405(d) IMPAIRED DRIVING (DRUG & ALCOHOL)

According to FARS 2018-2020 data, there were 0.29 alcohol-impaired driving fatalities per 100M VMT in Georgia; therefore, Georgia is considered a "low-range" state and eligible for the 405(d) funding for FFY2024. See Appendix B for signed assurances.

405(e) **DISTRACTED DRIVING**

DESCRIPTION OF HIGHWAY SAFETY PROBLEMS

This section contains excerpts from the 2021 Distracted Driving Georgia Traffic Safety Facts that are pertinent to the planning of countermeasures that will reduce the number of distraction-related fatalities. To access the full report, visit: https://www.gahighwaysafety.org/georgia-traffic-safety-facts/

The Injury Prevention Research Center at Emory University conducted a roadside observational survey of driver distraction—over 34,000 observations across 400 sites within 20 Georgia counties between May and July 2022. According to the 2022 Georgia Distracted Driving Observational Survey³, 16.8% of all drivers were observed to have some form of distraction while operating a motor vehicle (i.e., talking, texting, dialing, or eating). This suggests that at any point in time or location on Georgia roadways, at least 1 out of 6 drivers may be distracted. Unlike seatbelt observations, drivers are not constantly distracted throughout their travel time—each distracted driving observation is a snapshot of time and place.

In 2021, 54% of motor vehicle traffic crashes fit the criteria of having at least one confirmed or suspected distracted driver. This finding aligns with naturalistic driving studies that used video cameras and sensors installed in vehicles to determine driver risk factors seconds before a crash. According to a multi-state naturalistic study, 51.93% of all crashes involved distracted, non-impaired drivers.⁴

Among the drivers involved in motor vehicle traffic crashes, 2% were confirmed to be distracted seconds before the crash, 28% were suspected of distraction⁵, and 24% were <u>un</u>distracted drivers—the other 47% of drivers were not involved in distraction-related crashes. Most distraction-related crashes involved other vehicles—

- 75% of all distraction-related crashes involved at least one other vehicle besides the distracted driver.
- 25% of all distraction-related crashes were singlevehicle crashes that only involved the distracted driver's vehicle.

Furthermore, among all single-vehicle crashes, 64% involved at least one confirmed or suspected distracted driver. Among all multi-vehicle crashes, 51% involved at least one confirmed or suspected distracted driver.

Percent of All Traffic Crashes that were Distraction-Related, 2021

Traffic Measure	2021
Crashes	
Distraction-Related Crashes	54%
Confirmed distraction- related crashes	4%
Suspected distraction- related crashes	49%
<i>Not</i> distraction-related crashes	47%
Drivers	
Drivers involved in distraction-related crashes	54%
Confirmed distracted driver	2%
Suspected distracted driver	28%
<u>Un</u> distracted driver	24%
Other drivers <u>not</u> involved in distraction-related crashes	47%

⁵ See Data Considerations for more information on the suspected-distracted driving definition established by the GDOT and CODES

Distraction-Related Traffic Fatalities and Serious Injuries

In 2020, 50 fatal crashes involved at least one confirmed distracted driver (3.0% of all fatal crashes) in 2021. In these confirmed distraction-related crashes, 56 fatalities occurred (3.1% of all traffic-related fatalities). The true number of distraction-related fatal crashes and fatalities is likely much higher. The table below shows the number and percent of confirmed distraction-related fatal crashes and traffic fatalities between 2017 and 2021.

Although it is challenging for law enforcement to determine whether distraction is a contributing factor in a fatal crash, the police crash report may be the only source available for this information. Therefore, the number of confirmed distraction-related fatalities and serious injuries are usually underreported.

Confirmed Distraction-Related Fatal Crashes and Traffic Fatalities, 2017-2021

	Fatal Crashes				Fatalities		
Year	Total Fatal	Confirmed Distraction-Related		Total Traffic Confirmed Distraction		raction-Related	
	Crashes	Number	Percent	Fatalities	Number	Percent	
2017	1,440	75	5.2%	1,540	82	5.3%	
2018	1,408	59	4.2%	1,505	65	4.3%	
2019	1,378	43	3.1%	1,492	43	2.9%	
2020	1,522	55	3.6%	1,664	61	3.7%	
2021	1,670	50	3.0%	1,797	56	3.1%	

Source: FARS 2017-2021

In 2021, **29%** of all serious injury⁶ crashes involved at least one driver *confirmed or suspected* of distraction. The number of serious injuries that involved a *confirmed* distracted driver increased by 2%— from 347 serious injuries in 2020 to 354 in 2021.

The figure shows the percent of fatalities or serious injuries involving at least one confirmed distracted driver by person type in 2021.

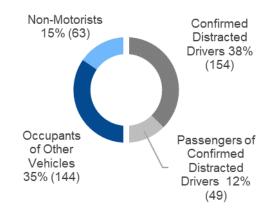

- 50% were in the confirmed distracted driver's vehicle (represented by gray in the figure).
 - 38% were distracted drivers themselves.
 - 12% were passengers of the distracted driver.
- 50% were occupants of other vehicles or non-motorists (represented by blue in the figure).
 - 35% were occupants of other vehicles *not* operated by the distracted driver.
 - 15% were non-motorists (i.e., pedestrians or bicyclists).

Almost two-thirds of *confirmed* distracted drivers involved in motor vehicle crashes did not have passenger occupants with them in the vehicle—64%. Thirty-six percent of confirmed distracted drivers had other passenger occupants riding with them.

Percent of Persons Fatally or Seriously Injured in Confirmed Distraction-Related Crashes by Person Type, 2021

Distracted vehicle

<u>Un</u>distracted vehicle or non-motorists

56 Fatal Injuries **354** Serious Injuries Source: FARS 2021, CODES 2021

⁶ Suspected serious injuries are reported by law enforcement and used when any injury, other than fatal injury, prevents the injured person from walking, driving, or normally continuing the activities the person was capable of before the injury occurred.

ASSOCIATED PERFORMANCE MEASURES AND TARGETS

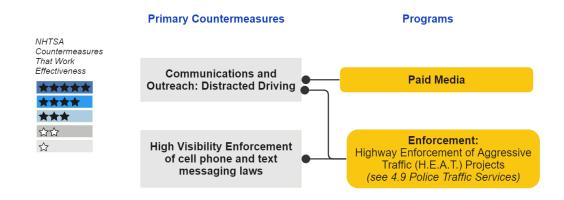

Core Outcome Measures		Baseline	Target
Core	Core Outcome Measures		2020-2024
C-1*	To maintain or reduce traffic fatalities to <u>1,600*</u> (2020-2024 rolling average) by 2024.	1,600	1,600*
C-2a*	To maintain or reduce serious injuries in traffic crashes to <u>7,109*</u> (2020-2024 rolling average) by 2024.	7,109	7,109*
C-2b*	To maintain or reduce serious injuries per 100M VMT to <u>5.711*</u> (2020-2024 rolling average) by 2024.	5.711	5.711*
C-3*	To maintain or reduce traffic fatalities per 100M VMT to 1.28* (2020-2024 rolling average) by 2024.	1.28	1.28*
C-9*	To maintain or reduce the number of young drivers involved in fatal crashes to 198* (2020-2024 rolling average) by 2024.	198	198*
SHSP-2	To reduce the number of distraction-related fatalities from 61 (2017-2021 rolling average) to <u>56</u> (2020-2024 rolling average) by 2024.	61	56

^{*} Target value meets §1300.11(3)(i) code for *constant* or *improved* target compared to baseline. However, statistical projections (data-driven approach required by §1300.11 (b)(3)(ii)) and preliminary state crash data show that the performance measure target to "*maintain the baseline*" is overambitious and most likely will not be met. Targets in light-blue, italicized font below are considered to be achievable targets that show progress or demonstrate improved outcomes.

PRIMARY COUNTERMEASURES

The Georgia Governor's Office of Highway Safety will continue to apply for Section 405(e): Distracted Driving Grant Application if the state meets the eligibility criteria. The 405(e) annual application has more detailed information on preventing distracted driving countermeasures, projects, programmatic activities, sub-recipients, and other information as required. However, this section of the triennial HSP provides an overview of the prevention of distracted driving primary countermeasures that will be implemented during the FFY24-FFY26 period.

GOHS plans to continue the Paid Media and Enforcement efforts to prevent and deter distracted driving. The figure below shows the planned primary countermeasures within each program to address the growing number of distraction-related crashes, serious injuries, and fatalities on Georgia roadways.

Paid Media

Distracted driving and other risking driving behaviors remains a concern in Georgia. Nearly half of all motor vehicle traffic crashes fit the criteria of having at least one confirmed or suspected distracted driver. GOHS aims to reduce the number of distraction-related fatalities (SHSP-2). To make progress toward this goal and address these traffic safety issues, GOHS will continue to implement Paid Media Campaigns and Enforcement strategies that will that reinforce safe driving practices and deter risky driving behaviors. The primary countermeasure for Paid Media is Communications and Outreach on Distracted Driving (1-star NHTSA effectiveness rating).

While this countermeasure has a NHTSA rating of less than 3-star effectiveness, the public outreach efforts through paid, earned, and owned media will be strategically aligned with the law enforcement high-visibility enforcement campaigns. Together, the campaign and enforcement efforts will deliver age-appropriate and culturally appropriate media content will remind drivers of the deadly dangers and the legal consequences of using handheld devices while driving.

The estimated FFY24-FFY26, 3-year allocation of federal funds for Distracted Driving is \$4,500,000.00 (405e).

Communications and Outreach: Distracted Driving

The 'hands-free' law makes it illegal for drivers to have a phone in their hand or supported by their body when on the road, including when the vehicle is stopped for a traffic device. GOHS will continue to support the 'Connect2Disconnect' distracted driving awareness enforcement campaign with a month long buy during National Distracted Driving Awareness Month in April. GOHS will also develop a statewide media campaign using outdoor, radio, television, and digital media to promote compliance with hands-free laws and the importance of avoiding distractions behind the wheel. GOHS will continue to partner with state agencies, local communities, and highway-safety related non-profit groups to promote distracted driving awareness and prevention with earned media events and year-round social media content.

Hands Free Georgia/Hands Free for Safety/Know When to Hit Send: Georgia's 'handsfree' law is encouraging, and more lives can be saved by increasing compliance with the hands-free law. GOHS' countermeasure message strategy is to target young adult drivers, including those between the ages 16-to-24, where cell phone use is the highest. This public information and education campaign will continue statewide with paid, earned, and owned media.

While surveys show virtually all drivers know about the state's hands-free law, the increase in persons killed in crashes involving distracted drivers shows the continued need for educational and awareness messaging to increase compliance with the new distracted driving law. The goal of paid media campaigns to support enforcement mobilizations and increase compliance which could lead to a further decrease in crashes, injuries, and deaths.

Enforcement

See 2.9 Police Traffic Services for project level information.

QUALIFYING CRITERIA FOR A DISTRACTED DRIVING AWARENESS GRANT:

Georgia sample Distracted Driving questions from the State's driver's license examination:

Question #2

The Hands-Free GA Law pertains to which of the following:

- All drivers regardless of age.
- Older Drivers
- Drivers under the age of 21
- Drivers over the age of 21

Question #10

Driving requires your full attention:

- True
- False

Question #15

If a driver is convicted of violating the Hands-Free GA Law, they will:

- All of the answers.
- Pay a fine of at least \$ 50.
- Accumulate at least one point on their license.

Question #48

The Hands-Free GA Law makes it illegal to do the following, while operating a motor vehicle in GA:

- Watch, record, or broadcast a video or movie
- Physically hold or support any wireless device
- Write, send, or read an email or text
- All of the answers

QUALIFYING CRITERIA FOR A DISTRACTED DRIVING LAW GRANT:

Georgia Legal citation to the State statute demonstrating compliance with the requirements:

Georgia Code: 40-6-241. Distracted driving; restrictions on operation of wireless telecommunications devices and stand-alone electronic devices; penalty; exceptions.

- (a) As used in this Code section, the term:
- (1) "Stand-alone electronic device" means a device other than a wireless telecommunications device which stores audio or video data files to be retrieved on demand by a user.
- (2) "Utility services" means and includes electric, natural gas, water, wastewater, cable, telephone, or telecommunications services or the repair, location, relocation, improvement, or maintenance of utility poles, transmission structures, pipes, wires, fibers, cables, easements, rights of way, or associated infrastructure.
- (3) "Wireless telecommunications device" means a cellular telephone, a portable telephone, a text-messaging device, a personal digital assistant, a stand-alone computer, a global positioning system receiver, or substantially similar portable wireless device that is used to initiate or receive communication, information, or data. Such term shall not include a radio, citizens band radio, citizens band radio hybrid, commercial two-way radio communication device or its functional equivalent, subscription-based emergency communication device, prescribed medical device, amateur or ham radio device, or in-vehicle security, navigation, or remote diagnostics system.
- **(b)** A driver shall exercise due care in operating a motor vehicle on the highways of this state and shall not engage in any actions which shall distract such driver from the safe operation of such vehicle.
- (c) While operating a motor vehicle on any highway of this state, no individual shall:
- (1) Physically hold or support, with any part of his or her body a:
- (A) Wireless telecommunications device, provided that such exclusion shall not prohibit the use of an earpiece, headphone device, or device worn on a wrist to conduct a voice-based communication; or
- (B) Stand-alone electronic device;
- (2) Write, send, or read any text-based communication, including but not limited to a text message, instant message, e-mail, or Internet data on a wireless telecommunications device or stand-alone electronic device; provided, however, that such Prohibition shall not apply to:
- (A) A voice-based communication which is automatically converted by such device to be sent as a message in a written form; or
- (B) The use of such device for navigation of such vehicle or for global positioning system purposes;
- (3) Watch a video or movie on a wireless telecommunications device or stand-alone electronic device other than watching data related to the navigation of such vehicle; or
- (4) Record or broadcast a video on a wireless telecommunications device or stand-alone electronic device; provided that such prohibition shall not apply to electronic devices used for the sole purpose of continuously recording or broadcasting video within or outside of the motor vehicle.
- (d) While operating a commercial motor vehicle on any highway of this state, no individual shall:
- (1) Use more than a single button on a wireless telecommunications device to initiate or terminate a voice communication; or
- (2) Reach for a wireless telecommunications device or stand-alone electronic device in such a manner that requires the driver to no longer be:

- (A) In a seated driving position; or
- (B) Properly restrained by a safety belt.
- (e) Each violation of this Code section shall constitute a separate offense.

(f

- (1) Except as provided for in paragraph (2) of this subsection, any person convicted of violating this Code section shall be guilty of a misdemeanor which shall be punished as follows:
 - (A) For a first conviction with no conviction of and no plea of nolo contendere accepted to a charge of violating this Code section within the previous 24 month period of time, as measured from the dates any previous convictions were obtained or pleas of nolo contendere were accepted to the date the current conviction is obtained or plea of nolo contendere is accepted, a fine of not more than \$50.00, but the provisions of Chapter 11 of Title 17 and any other provision of law to the contrary notwithstanding, the costs of such prosecution shall not be taxed nor shall any additional penalty, fee, or surcharge to a fine for such offense be assessed against a person for conviction thereof;
 - (B) For a second conviction within a 24 month period of time, as measured from the dates any previous convictions were obtained or pleas of nolo contendere were accepted to the date the current conviction is obtained or plea of nolo contendere is accepted, a fine of not more than \$100.00, but the provisions of Chapter 11 of Title 17 and any other provision of law to the contrary notwithstanding, the costs of such prosecution shall not be taxed nor shall any additional penalty, fee, or surcharge to a fine for such offense be assessed against a person for conviction thereof; or
 - (C) For a third or subsequent conviction within a 24-month period of time, as measured from the dates any previous convictions were obtained or pleas of nolo contendere were accepted to the date the current conviction is obtained or plea of nolo contendere is accepted, a fine of not more than \$150.00, but the provisions of Chapter 11 of Title 17 and any other provision of law to the contrary notwithstanding, the costs of such prosecution shall not be taxed nor shall any additional penalty, fee, or surcharge to a fine for such offense be assessed against a person for conviction thereof.
- (2) Any person appearing before a court for a first charge of violating paragraph (1) of subsection (c) of this Code section who produces in court a device or proof of purchase of such device that would allow such person to comply with such paragraph in the future shall not be guilty of such offense. The court shall require the person to affirm that they have not previously utilized the privilege under this paragraph.
- (g) Subsections (c) and (d) of this Code section shall not apply when the prohibited conduct occurred:
- (1) While reporting a traffic accident, medical emergency, fire, an actual or potential criminal or delinquent act, or road condition which causes an immediate and serious traffic or safety hazard;
- (2) By an employee or contractor of a utility services provider acting within the scope of his or her employment while responding to a utility emergency:
- (3) By a law enforcement officer, firefighter, emergency medical services personnel, ambulance driver, or other similarly employed public safety first responder during the performance of his or her official duties; or
- (4) While in a motor vehicle which is lawfully parked.

Information	BIL405e M8X	\$1,166,000.00	No	No		
Eligible Use of Funds	Funds will be used to conduct multi-media campaigns in fall 2023 and spring 2024 during National Distracted Driving Awareness Month. GOHS will also run statewide billboards on interstates and other major highways educating motorists on how the hands-free law is saving lives. GOHS will also use the month of April to run hands-free law educational messages on radio and television stations.					

405(f) MOTORCYCLE SAFETY

DESCRIPTION OF HIGHWAY SAFETY PROBLEMS

This section contains excerpts from the 2021 Motorcycles Georgia Traffic Safety Facts that are pertinent to the planning of countermeasures that will reduce the number of motorcyclist fatalities.

To access the full report, visit: https://www.gahighwaysafety.org/traffic-safety-facts-sheets/.

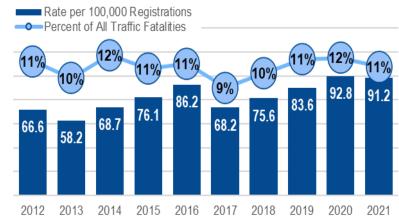

In 2021, there were 1,797 fatalities that occurred in motor vehicle traffic crashes on Georgia roadways – the largest number of traffic fatalities since 2006. The 194 motorcyclist fatalities that occurred in 2021 represented 11% of all traffic fatalities and is the highest number of motorcyclist fatalities experienced in the past decade.

Between 2020 and 2021, motorcycle registrations increased by 3% (from 206,834 to 212,788), and motorcyclist fatalities increased by 1% (from 192 to 194). As a result, the rate of motorcycle fatalities decreased by 2%, from 92.8 to 91.2 motorcycle fatalities per 100,000 motorcycle registrations.

The surveillance sources show an increase in motorcyclists with serious injuries between 2020 and 2021:

- Motorcyclist serious injuries reported by law enforcement increased by 2%.
- The number of motorcyclists transported to a hospital facility by the Emergency Medical Services (EMS) increased by 37%.
- Motor vehicle traffic-related emergency room-only visits involving motorcyclists increased by 30%, and hospitalizations more than doubled (a 121% increase).

Rate and Percent of Motorcyclist Fatalities, 2012-2021

Source: FARS 2012-2021; FFY2014-FFY2019 DOR Annual Reports; DOR 2019-2021

Rate and Percent of Motorcyclist Traffic Fatalities, 2012-2021

	Total	Georgia Registered Motorcycles	Motorcyclist Fatalities		
Year	Traffic Fatalities		Number	Percent of All Traffic Fatalities	Rate per 100,000 Registrations
2012	1,192	201,206	134	11%	66.6
2013	1,180	199,287	116	10%	58.2
2014	1,164	199,445	137	12%	68.7
2015	1,432	199,796	152	11%	76.1
2016	1,556	199,504	172	11%	86.2
2017	1,540	203,783	139	9%	68.2
2018	1,504	203,639	154	10%	75.6
2019	1,491	203,343	170	11%	83.6
2020	1,664	206,834	192	12%	92.8
2021	1,797	212,788	194	11%	91.2

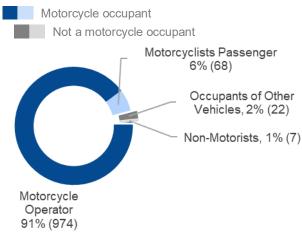

Note: Motorcycle registrations include commercial and non-commercial motorcycles. Source: FARS 2012–2021; FFY2014-FFY2019 DOR Annual Reports; DOR 2019-2021

Out of the 4,085 crashes that involved motorcyclists, 60% were multi-vehicle crashes (involving other vehicles that were not a motorcycle vehicle body type), 36% were single vehicles (involving only one motorcycle), and 4% were crashes involving two or more motorcycles. Sixty-six percent of motorcyclist serious injuries and 62% of all motorcyclist fatalities occurred in multiple-vehicle crashes.

The figure shows the percent of fatalities or serious injuries among all persons involved in crashes with at least one motorcyclist in 2021. Among all the serious injuries involving motorcyclists:

- 97% rode on a motorcycle (represented by blue in Figure).
 - 91% were the motorcycle operator
 - 6% were motorcycle passengers
- 3% were occupants of other vehicles or non-motorists (represented by gray in Figure).
 - 2% were occupants of vehicles that were *not* a motorcycle vehicle body type.
 - 1% were non-motorists (i.e., pedestrians or bicyclists).

848 Serious Injuries **194** Fatal Injuries Source: CODES 2021, FARS 2021

Motorcycle operators losing control is the top contributing factor among motorcyclists involved in single-vehicle crashes. In 2021, 62% of operators lost control of their motorcycles before they collided with another object that was not another vehicle. The top contributing factors among motorcycle operators involved in multi-vehicle crashes were following too closely (34%) and risky/aggressive driving (25%). The top factors for other drivers involved in multi-vehicle crashes with motorcyclists were failure to yield (49%) and following too closely (18%). This does not imply that the motorcycle operators or other drivers caused the crash either by their actions or failure to act.

Top Contributing Factors with Crashes Involving Motorcyclists by Number of Vehicles Involved and Person Type, 2021

	Single Vehicle Crashes		Two-Vehicle Crashes			
	Motorcyclists		Motorcyclists		Other Drivers	
Rank	Description	% of all operators	Description	% of all operators	Description	% of all drivers
1	Operator lost control	62%	Following too close	34%	Failed to yield	49%
2	Speeding	23%	Risky/aggressive driving	25%	Following too close	18%
3	Risky/aggressive driving	10%	Speeding	14%	Risky/aggressive driving	14%
4	Under the influence of alcohol and/or drug	7%	Failed to yield	10%	Changed lanes improperly	9%

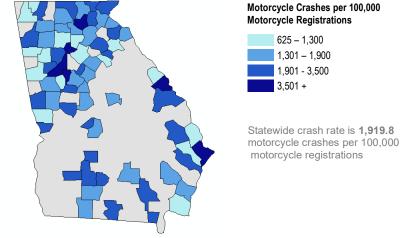

Source: CODES 2021; FARS 2021

Types of Motorcycle Crashes by County

The figure shows the motorcycle crash rate for counties with ten or more motorcycle crashes in 2021 and their deviation from the statewide percent of motorcycle crash rate (1,919.8 motorcycle crashes for every 100,000 motorcycle registrations).

The majority of all motorcycle crashes occur in north Georgia. Generally, there are higher motorcycle crash rates in Atlanta Region and rural counties along the North Carolina, South Carolina, and Alabama border. Nine percent of all motorcycle operators involved in Georgia traffic crashes had a license from another state – five percent were licensed from a bordering state (Alabama, Florida, North Carolina, South Carolina, or Tennessee).

Motorcycle (MC) Crashes per 100,000 MC Registrations for Counties with 10+ MC Crashes, 2021

QUALIFYING CRITERIA: MOTORCYCLIST AWARENESS PROGRAM

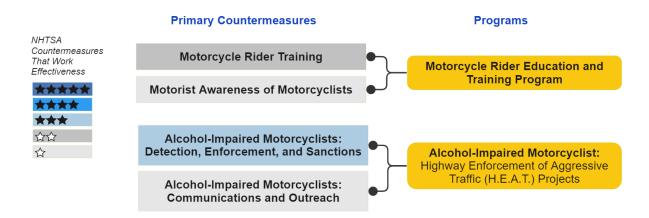

ASSOCIATED PERFORMANCE MEASURES AND TARGETS

Core	Core Outcome Measures		Target
		2017-2021	2020-2024
C-1*	To maintain or reduce traffic fatalities to <u>1,600*</u> (2020-2024 rolling average) by 2024.	1,600	1,600*
C-2a*	To maintain or reduce serious injuries in traffic crashes to <u>7,109*</u> (2020-2024 rolling average) by 2024.	7,109	7,109*
C-2b*	To maintain or reduce serious injuries per 100M VMT to <u>5.711*</u> (2020-2024 rolling average) by 2024.	5.711	5.711*
C-3*	To maintain or reduce traffic fatalities per 100M VMT to 1.28* (2020-2024 rolling average) by 2024.	1.28	1.28*
C-5	To maintain or reduce alcohol-related fatalities to <u>371</u> (2020-2024 rolling average) by 2024.	371	371
C-7*	To maintain or reduce motorcyclist fatalities to <u>167*</u> (2020-2024 rolling average) by 2024.	167	167*
C-8	To maintain or reduce un-helmeted motorcyclist fatalities to <u>15</u> (2020-2024 rolling average) by 2024.	15	15

^{*} Target value meets §1300.11(3)(i) code for *constant* or *improved* target compared to baseline. However, statistical projections (data-driven approach required by §1300.11 (b)(3)(ii)) and preliminary state crash data show that the performance measure target to "*maintain the baseline*" is overambitious and most likely will not be met. Targets in light-blue, italicized font below are considered to be achievable targets that show progress or demonstrate improved outcomes.

PRIMARY COUNTERMEASURES

GOHS plans to continue two (2) programs in the Motorcycle Safety program area: Motorcycle Safety Program and the Alcohol-Impaired Motorcyclist HEAT Project. The figure below shows the planned primary countermeasures within each program to address the growing number of motorcycle-related traffic crashes, serious injuries, and fatalities on Georgia roadways.

Motorcycle Rider Education and Training Program

Motorcyclists' involvement in traffic-related crashes remains a growing concern in Georgia. According to the Georgia Traffic Safety Facts 2021 Motorcycle Fact Sheet, nearly half (47%) of motorcycle operators involved in crashes were riding without a valid motorcycle designation (Class M or MP) on their driver's license at the time of the crash. GOHS aims to reduce the number of motorcyclist fatalities (C-7) and un-helmeted motorcyclist fatalities (C-8). To make progress toward this goal and address these traffic safety issues, GOHS will continue to implement the Motorcycle Rider Education and Training Program and fund agencies to train motorcyclists on safe riding practices and promote motorcycle safety and awareness through two primary countermeasures:

- 1. Motorcycle Rider Training (2-star NHTSA effectiveness rating)
- 2. Motorists' Awareness of Motorcyclists (1-star)

While these primary countermeasures have an NHTSA rating of less than 3-star effectiveness, motorcycle rider programs and communication strategies to spread awareness are encouraged and supported by the Uniform Guidelines for State Highway Safety Program (Guideline No. 3). The training and education program also addresses rider licensing, proper use of personal protective equipment (e.g., helmet use and other protective clothing gear), rider conspicuity, impaired driving, and motorist awareness.

Motorcycle Rider Training

The GOHS will support and fund agencies that implement Motorcycle Rider Education and Training Programs. These training programs require certified motorcycle coaches who engage in continual professional development and recertification training to teach novice or experienced riders about motorcycle safety. The retention and ongoing recruitment of motorcyclist safety training instructors are critical elements of a sustainable program. The program helps improve motorcyclists' knowledge of relevant traffic laws, crash avoidance, and other highway safety issues. The rider education programs will reach people ages 17 and up and of all experience levels across Georgia. Motorcycle training sites are available across Georgia (in various

metropolitan, urban, and rural areas) to reach the largest number of licensed motorcyclists and those wishing to become licensed. With this proper rider training administered by certified coaches, new riders are less likely to be involved in a crash, and experienced riders can hone their basic and crash-avoidance skills. The lessons taught in this program can impact riders from novice to experienced and help decrease the number of motorcyclist crashes, injuries, and fatalities throughout Georgia.

Motorists' Awareness of Motorcyclists

GOHS continues to support the statewide and local efforts implementing the *Motorists' Awareness of Motorcyclists* countermeasure strategy. This is a crucial element of education because a majority of Georgia motorcycle crashes involve other vehicles that are not motorcycles (64%), while a smaller percentage (36%) are single-vehicle motorcycle crashes. The GOHS will partner with sub-receipts to conduct education and outreach that promotes the "Share the Road with Motorcycles" messaging that encourages motorist awareness of motorcycles. This messaging targets all roadway users of all ages—from teen novice drivers to older experienced drivers who operate all other vehicle types that are not motorcycles. Additionally, GOHS will support messaging efforts in counties that have the highest number of multi-vehicle crashes that involve motorcyclists. These statewide and county-level social media campaigns, outreach events, educational materials and ads, and information run on the DDS' Motor Vehicle Network screens at the customer service center locations (which are in every region of Georgia) will directly target Georgia motorists statewide with "Share the Road" messaging that can help decrease the number of motorcyclist crashes, injuries, and fatalities in the state.

The name and organization of the head of the designated State authority over motorcyclist safety issues is **Mr. Spencer Moore, Commissioner of the Georgia Department of Driver Services.**Georgia's motorcyclist awareness program was developed in coordination with the Georgia Department of Driver Services and the Georgia Governor's Office of Highway Safety (see Appendix B for certification).

The table below shows the number of motorcycle crashes that were multi-vehicle and single vehicle by county. In 2021, there were a total of 2,630 multi-vehicle and 1,455 single-vehicle motorcycle crashes in the state of Georgia. More than half of all multi-vehicle crashes that involve a motorcycle (54%, 1,414 out of 2,630) occurred in the eleven counties highlighted in the chart below.

^{*} Target value meets §1300.11(3)(i) code for *constant* or *improved* target compared to baseline. However, statistical projections (data-driven approach required by §1300.11 (b)(3)(ii)) and preliminary state crash data show that the performance measure target to "*maintain the baseline*" is overambitious and most likely will not be met. Targets in light-blue, italicized font below are considered to be achievable targets that show progress or demonstrate improved outcomes.

PRIMARY COUNTERMEASURES

GOHS plans to continue two (2) programs in the Motorcycle Safety program area: Motorcycle Safety Program and the Alcohol-Impaired Motorcyclist HEAT Project. The figure below shows the planned primary countermeasures within each program to address the growing number of motorcycle-related traffic crashes, serious injuries, and fatalities on Georgia roadways.

Alcohol-Impaired Motorcyclist: HEAT Projects

Alcohol-impaired motorcyclists involved in traffic-related crashes remain a growing concern in Georgia. Over the past five years, nearly one-fifth of all motorcycle operators fatally injured had a positive blood alcohol concentration (BAC). GOHS aims to reduce the number of motorcyclist fatalities (C-7) and reduce the number of alcohol-related fatalities (C-5). To make progress toward this goal and address these traffic safety issues, GOHS will continue to implement the Alcohol-Impaired Motorcyclist: HEAT Projects and fund law enforcement agencies to reduce alcohol-impaired motorcycling and support communication and mobilization campaigns that spread awareness through two primary countermeasures:

- 1. Alcohol-Impaired Motorcyclists: Detection, Enforcement, and Sanctions (3-star NHTSA effectiveness rating)
- 2. Alcohol-Impaired Motorcyclists: Communications and Outreach (1-star)

The Detection, Enforcement, and Sanctions countermeasure has an NHTSA rating of 3-star effectiveness and is supported by the best practices and research available. Other law enforcement-related activities include high visibility enforcement to deter speeding and other risky driving behaviors and enforce laws related to helmet use. The Communications and Outreach countermeasure is encouraged and supported by the Uniform Guidelines for State Highway Safety Program (Guideline No. 3).

Alcohol-Impaired Motorcyclists: Detection, Enforcement, and Sanctions
The Governor's Office of Highway Safety will partner with state and local law enforcement agencies to enforce the impaired driving laws across the state. GOHS recognizes that law enforcement plays an extremely important role in overall highway safety in the state of Georgia. Campaigns such as the 100 Days of Summer HEAT (Highway Enforcement of Aggressive Traffic) and Drive Sober or Get Pulled Over, with participation from the GOHS H.E.A.T. teams and H.V.E. programs, have proven that high-visibility enforcement of Georgia's impaired driving laws is the key to saving lives and reducing injuries on Georgia's roadways. Coupled with a

high-visibility media campaign to go along with the enforcement, GOHS will increase awareness of the dangers of impaired driving.

Alcohol-Impaired Motorcyclists: Communications and Outreach
GOHS will use paid and social media during Motorcycle Safety Awareness Month in May to
promote drivers sharing the road with motorcyclists with "Look Twice" and sober operation of
motorcyclists by all riders. GOHS will also use social media to promote sober motorcycle
operation and "Share the Road" and "Be Seen" messages to reduce all types of motorcyclerelated crashes, deaths, and injuries. The "Look Twice" paid media campaign in May will
promote the increase of motorcycles on the roads as the weather gets warmer.

<u>Share the Road:</u> As part of a speed and impaired driving countermeasure message strategy, GOHS uses paid media funds when available to target motorists in Georgia's secondary audience with awareness messages such as "Share the Road," "Look Twice, Save A Life" to remind motorists to yield when required by law for motorcyclists. Funds are used to pay for a statewide radio/television campaign in March when traffic data shows a 67% increase in persons killed in motorcycle crashes from February to March and a second campaign in May to increase public awareness on sharing the road with motorcycles during "National Motorcycle Safety Awareness Month."

The Motorcycle Communications Outreach countermeasure goal is to discourage motorcyclists from riding impaired through times of the year when motorcycle use is highest, including May, which NHTSA has designated as Motorcycle Safety Awareness Month.

In 2021, there were 141 confirmed alcohol-impaired motorcyclist operators involved in crashes and 84 operators suspected of alcohol impairment. This accounts for 6% of all motorcycle crashes. The chart below shows the total number of motorcycle crashes in 2021 which involved an impaired operator (225 operators confirmed or suspected of alcohol impairment). Each year, GOHS will continue to focus high-visibility enforcement and other motorcycle safety efforts in counties with the highest counts of alcohol-related crashes among motorcycle operators.

405(g) **NON-MOTORIZED**

(PEDESTRIANS & BICYCLISTS)

Georgia is eligible for the 4015(g) funding for FFY2024. According to FARS 2021 data, 20.39% of all traffic-related fatalities were non-motorists (pedestrian and bicyclists).

405(h) PREVENTING ROADSIDE DEATHS

DESCRIPTION OF HIGHWAY SAFETY PROBLEMS

Georgia's Move-Over Law, Ga. Code §40-6-16, was enacted in July 2016 and requires motorists travelling in in the lane adjacent to the shoulder to move-over one lane (or reduce speed) when emergency and utility vehicles are stopped on the side of the highway and operating in an official capacity. These vehicles include all first responders, utility vehicles, Department of Transportation vehicles, wreckers, and Highway Emergency Response Operator (HERO) units tending to a motor vehicle crash incident.

According to AAA-Georgia⁷, each year there are nearly 350 roadside fatalities (people struck and fatally injured outside a disabled vehicle). Additionally, AAA-Georgia reports that nearly one out of every four drivers are unaware of the Move Over laws in Georgia. While the focus of the Move-Over Law has remained on emergency vehicles, the risk of attending a stopped or disabled vehicle on the roadside is significant for all road users. These road users by include motorist (or pedestrians) on roadside that are attending a disabled or stopped vehicle—changing a tire, refueling gas, or attending another vehicle repair need.

ASSOCIATED PERFORMANCE MEASURES AND TARGETS

Because roadside fatalities include all road users—and not just emergency vehicles—there can be challenges in categorizing which fatal crashes are considered to be roadside fatalities. An investigation of crash cases (precrash and contributing factor fields) is necessary to develop a standardized definition of roadside crashes. A standard definition used to systematically extract fatality data, can lead to more strategic programmatic initiatives and accurate monitoring the impact of these programmatic efforts. Since the 'roadside fatality' definition that is and inclusive of all roadway users is not yet available, specific traffic safety performance measure for roadside fatalities was not developed.

Core Outcome Measures		Baseline	Target
			2020-2024
C-1*	To maintain or reduce traffic fatalities to <u>1,600*</u> (2020-2024 rolling average) by 2024.	1,600	1,600*
C-2a*	To maintain or reduce serious injuries in traffic crashes to <u>7,109*</u> (2020-2024 rolling average) by 2024.	7,109	7,109*
C-2b*	To maintain or reduce serious injuries per 100M VMT to <u>5.711*</u> (2020-2024 rolling average) by 2024.	5.711	5.711*
C-3*	To maintain or reduce traffic fatalities per 100M VMT to 1.28* (2020-2024 rolling average) by 2024.	1.28	1.28*

^{*} Target value meets §1300.11(3)(i) code for *constant* or *improved* target compared to baseline. However, statistical projections (data-driven approach required by §1300.11 (b)(3)(ii)) and preliminary state crash data show that the performance measure target to "maintain the baseline" is overambitious and most likely will not be met. Targets in light-blue, italicized font below are considered to be achievable targets that show progress or demonstrate improved outcomes.

AAAA Georgia, "AAA Launches "Move Over for Me" Campaign to Protect All Drivers on the Roadside" (June 16, 2023). Available at: https://media.acg.aaa.com/aaa-launches-move-over-for-me-campaign-to-protect-all-drivers-on-roadside.htm

PRIMARY COUNTERMEASURES

The Georgia Governor's Office of Highway Safety will continue to apply for Section 405(h): Preventing Roadside Deaths Grant Application if the state meets the eligibility criteria. The 405(h) annual application has more detailed information on preventing roadside deaths countermeasures, projects, programmatic activities, sub-recipients, and other information as required. However, this section of the triennial HSP provides an overview of the primary countermeasures for preventing roadside deaths that will be implemented during the FFY24-FFY26 period.

GOHS begin a new program area to address the number of traffic-related fatalities, serious injuries, and crashes that occur on Georgia's roadsides—Preventing Roadside Deaths.

Preventing Roadside Deaths

Roadside crashes, especially those involving emergency vehicles or motorists outside of a disabled vehicle, is a growing concern in Georgia. Recently, there have been much media attention on the roadside traffic-related incidents—some of which has been captured by law enforcement bodycam. Most of these media and viral videos involve emergency responders, tows trucks, DOT works, construction works, or other public service vehicles. There are other countless incidents that involve other road users that are not emergency responders. Since GOHS is still working to standardize the definition of "roadside fatalities" to include these other non-emergency vehicles, GOHS aims to reduce the number of overall traffic-related fatalities (C-1), serious injuries (C-2), and pedestrian injuries/fatalities (C-10a/b) that occur on roadsides. To make progress toward this goal and address these traffic safety issues, GOHS will continue to support sub-recipients that will provide communications and outreach that supports enforcement of Georgia's Move-Over laws. GOHS will also support the pilot program that encourages compliance with the Move-Over law through Driver Assistance Technology. This program will implement new countermeasure that are not yet rated by NHTSA's Countermeasures that Work.

Community & Outreach: Supporting Enforcement

GOHS works to increase the awareness Georgia's Move-Over laws through communications and outreach events. GOHS will launch "Move-Over" campaigns that will appear on social media, and during law-enforcement-hosted community events. Additionally, the campaign effort will extend to other stakeholder groups that are also impacted by motorist who do not adhere to the Move-Over law—towing industries, lineman/utility trucks, DOT workers, construction workers, and other public service providers. These statewide campaigning efforts will deliver age-, cultural-, and industrial-appropriate content to prevent risky driving behaviors and encourage motorist to move over or slow down to prevent roadside crashes, injuries, and fatalities.

PLANNED USE OF GRANT FUNDS

Enforcement of Move-Over Law through Driver Assistance Technology

GOHS will implement a pilot program to that uses digital technology to prevent death and injury from crashes involving motor vehicles striking other vehicles, first responders, and individuals stopped at the roadside. Georgia and participating law enforcement agencies (e.g., HEAT and Georgia State Patrol Nighthawks) will deploy digital technology software that will alert approaching vehicles of what is ahead. This pilot program will equip first responders' vehicles with the ability to send digital alerts to approaching vehicles that will provide the advance notice necessary to safely pass stopped vehicles along the road. By slowing down or moving over, the number of roadside pedestrian deaths will reduce by encourage the compliance of the Move-Over law. These law enforcement sub-recipients will also participate in the "Slow Down, Move Over" campaign via local media and using other social media assets. As this is a statewide pilot program, ongoing monitoring will be captured in monthly electronic reports to track the effectiveness and impact of the program. The reports will show the key programmatic performance indicators including the total number of drivers that were alerted and roadside traffic-related incidents attended to by the pilot participants.

Section 4

STATE CERTIFICATIONS & ASSURANCES

Appendix A to Part 1300 – Certifications and Assurances for Highway Safety Grants

Appendix B to Part 1300 – Application Requirements for Section 405 and Section 1906

Appendix C – Cost Summary

Appendix D - Equipment Request

Appendix A to Part 1300—Certifications and Assurances for Highway Safety Grants

[Each fiscal year, the Governor's Representative for Highway Safety must sign these Certifications and Assurances affirming that the State complies with all requirements, including applicable Federal statutes and regulations, that are in effect during the grant period. Requirements that also apply to subrecipients are noted under the applicable caption.]

	Georgia	2024
State:	3.401.81m	Fiscal Year: ²⁰²⁴

By submitting an application for Federal grant funds under 23 U.S.C. Chapter 4 or Section 1906, Public Law 109-59, as amended by Section 25024, Public Law 117-58, the State Highway Safety Office acknowledges and agrees to the following conditions and requirements. In my capacity as the Governor's Representative for Highway Safety, I hereby provide the following Certifications and Assurances:

GENERAL REQUIREMENTS

The State will comply with applicable statutes and regulations, including but not limited to:

- 23 U.S.C. Chapter 4—Highway Safety Act of 1966, as amended;
- Sec. 1906, <u>Public Law 109-59</u>, as amended by Sec. 25024, <u>Public Law 117-58</u>;
- 23 CFR part 1300—Uniform Procedures for State Highway Safety Grant Programs;
- <u>2 CFR part 200</u>—Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards;
- <u>2 CFR part 1201</u>—Department of Transportation, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.

INTERGOVERNMENTAL REVIEW OF FEDERAL PROGRAMS

The State has submitted appropriate documentation for review to the single point of contact designated by the Governor to review Federal programs, as required by Executive Order 12372 (Intergovernmental Review of Federal Programs).

FEDERAL FUNDING ACCOUNTABILITY AND TRANSPARENCY ACT (FFATA)

The State will comply with FFATA guidance, *OMB Guidance on FFATA Subaward and Executive Compensation Reporting*, August 27, 2010, (https://www.fsrs.gov/documents/OMB_Guidance_on_FFATA_Subaward_and_Executive_Compensation_Reporting_08272010.pdf) by reporting to FSRS.gov for each sub-grant awarded:

- Name of the entity receiving the award;
- Amount of the award;

- Information on the award including transaction type, funding agency, the North American Industry Classification System code or Catalog of Federal Domestic Assistance number (where applicable), program source;
- Location of the entity receiving the award and the primary location of performance under the award, including the city, State, congressional district, and country; and an award title descriptive of the purpose of each funding action;
 - o Unique entity identifier (generated by **SAM.gov**);
- The names and total compensation of the five most highly compensated officers of the entity if:
 - (i) the entity in the preceding fiscal year received—
 - (I) 80 percent or more of its annual gross revenues in Federal awards;
 - (II) \$25,000,000 or more in annual gross revenues from Federal awards; and (ii) the public does not have access to information about the compensation of the senior executives of the entity through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986;
- Other relevant information specified by OMB guidance.

NONDISCRIMINATION

(applies to subrecipients as well as States)

The State highway safety agency [and its subrecipients] will comply with all Federal statutes and implementing regulations relating to nondiscrimination ("Federal Nondiscrimination Authorities"). These include but are not limited to:

- *Title VI of the Civil Rights Act of 1964* (42 U.S.C. 2000d *et seq.*, 78 stat. 252), (prohibits discrimination on the basis of race, color, national origin);
- <u>49 CFR part 21</u> (entitled Non-discrimination in Federally-Assisted Programs of the Department of Transportation—Effectuation of Title VI of the Civil Rights Act of 1964);
- <u>28 CFR 50.3</u> (U.S. Department of Justice Guidelines for Enforcement of Title VI of the Civil Rights Act of 1964);
- The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, (42 U.S.C. 4601), (prohibits unfair treatment of persons displaced or whose property has been acquired because of Federal or Federal-aid programs and projects);
- Federal-Aid Highway Act of 1973, (23 U.S.C. 324 et seq.), and Title IX of the Education Amendments of 1972, as amended (20 U.S.C. 1681-1683 and 1685-1686) (prohibit discrimination on the basis of sex);
- Section 504 of the Rehabilitation Act of 1973, (29 U.S.C. 794 et seq.), as amended, (prohibits discrimination on the basis of disability) and 49 CFR part 27;
- The Age Discrimination Act of 1975, as amended, (42 U.S.C. 6101 et seq.), (prohibits discrimination on the basis of age);
- The Civil Rights Restoration Act of 1987, (Pub. L. 100-209), (broadens scope, coverage, and applicability of Title VI of the Civil Rights Act of 1964, The Age Discrimination Act of 1975 and Section 504 of the Rehabilitation Act of 1973, by expanding the definition of the terms "programs or activities" to include all of the programs or activities of the

- Federal aid recipients, subrecipients and contractors, whether such programs or activities are Federally-funded or not);
- Titles II and III of the Americans with Disabilities Act (42 U.S.C. 12131-12189) (prohibits discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing) and 49 CFR parts 37 and 38;
- Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations (preventing discrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations);
- Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency (requiring that recipients of Federal financial assistance provide meaningful access for applicants and beneficiaries who have limited English proficiency (LEP));
- <u>Executive Order 13985</u>, Advancing Racial Equity and Support for Underserved Communities through the Federal Government (advancing equity across the Federal Government); and
- Executive Order 13988, Preventing and Combating Discrimination on the Basis of Gender Identity or Sexual Orientation (clarifying that sex discrimination includes discrimination on the grounds of gender identity or sexual orientation).

The preceding statutory and regulatory cites hereinafter are referred to as the "Acts" and "Regulations," respectively.

GENERAL ASSURANCES

In accordance with the Acts, the Regulations, and other pertinent directives, circulars, policy, memoranda, and/or guidance, the Recipient hereby gives assurance that it will promptly take any measures necessary to ensure that:

"No person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity, for which the Recipient receives Federal financial assistance from DOT, including NHTSA."

The Civil Rights Restoration Act of 1987 clarified the original intent of Congress, with respect to Title VI of the Civil Rights Act of 1964 and other non-discrimination requirements (the Age Discrimination Act of 1975, and Section 504 of the Rehabilitation Act of 1973), by restoring the broad, institutional-wide scope and coverage of these nondiscrimination statutes and requirements to include all programs and activities of the Recipient, so long as any portion of the program is Federally assisted.

SPECIFIC ASSURANCES

More specifically, and without limiting the above general Assurance, the Recipient agrees with and gives the following Assurances with respect to its Federally assisted Highway Safety Grant Program:

- 1. The Recipient agrees that each "activity," "facility," or "program," as defined in § 21.23(b) and (e) of 49 CFR part 21 will be (with regard to an "activity") facilitated, or will be (with regard to a "facility") operated, or will be (with regard to a "program") conducted in compliance with all requirements imposed by, or pursuant to the Acts and the Regulations.
- 2. The Recipient will insert the following notification in all solicitations for bids, Requests For Proposals for work, or material subject to the Acts and the Regulations made in connection with all Highway Safety Grant Programs and, in adapted form, in all proposals for negotiated agreements regardless of funding source:

 "The [name of Recipient], in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 U.S.C 2000d to 2000d-4) and the Regulations, hereby notifies all bidders that it will affirmatively ensure that in any contract entered into pursuant to this advertisement, disadvantaged business enterprises will be afforded full and fair opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of race, color, or national origin in consideration for an award."
- 3. The Recipient will insert the clauses of appendix A and E of this Assurance (also referred to as DOT Order 1050.2A) [1] in every contract or agreement subject to the Acts and the Regulations.
- 4. The Recipient will insert the clauses of appendix B of DOT Order 1050.2A, as a covenant running with the land, in any deed from the United States effecting or recording a transfer of real property, structures, use, or improvements thereon or interest therein to a Recipient.
- 5. That where the Recipient receives Federal financial assistance to construct a facility, or part of a facility, the Assurance will extend to the entire facility and facilities operated in connection therewith.
- 6. That where the Recipient receives Federal financial assistance in the form of, or for the acquisition of, real property or an interest in real property, the Assurance will extend to rights to space on, over, or under such property.
- 7. That the Recipient will include the clauses set forth in appendix C and appendix D of this DOT Order 1050.2A, as a covenant running with the land, in any future deeds, leases, licenses, permits, or similar instruments entered into by the Recipient with other parties:
 - a. for the subsequent transfer of real property acquired or improved under the applicable activity, project, or program; and
 - b. for the construction or use of, or access to, space on, over, or under real property acquired or improved under the applicable activity, project, or program.
- 8. That this Assurance obligates the Recipient for the period during which Federal financial assistance is extended to the program, except where the Federal financial assistance is to provide, or is in the form of, personal property, or real property, or interest therein, or

structures or improvements thereon, in which case the Assurance obligates the Recipient, or any transferee for the longer of the following periods:

- a. the period during which the property is used for a purpose for which the Federal financial assistance is extended, or for another purpose involving the provision of similar services or benefits; or
- b. the period during which the Recipient retains ownership or possession of the property.
- 9. The Recipient will provide for such methods of administration for the program as are found by the Secretary of Transportation or the official to whom he/she delegates specific authority to give reasonable guarantee that it, other recipients, sub-recipients, sub-grantees, contractors, subcontractors, consultants, transferees, successors in interest, and other participants of Federal financial assistance under such program will comply with all requirements imposed or pursuant to the Acts, the Regulations, and this Assurance.
- 10. The Recipient agrees that the United States has a right to seek judicial enforcement with regard to any matter arising under the Acts, the Regulations, and this Assurance.

By signing this ASSURANCE, the State highway safety agency also agrees to comply (and require any sub-recipients, sub-grantees, contractors, successors, transferees, and/or assignees to comply) with all applicable provisions governing NHTSA's access to records, accounts, documents, information, facilities, and staff. You also recognize that you must comply with any program or compliance reviews, and/or complaint investigations conducted by NHTSA. You must keep records, reports, and submit the material for review upon request to NHTSA, or its designee in a timely, complete, and accurate way. Additionally, you must comply with all other reporting, data collection, and evaluation requirements, as prescribed by law or detailed in program guidance.

The State highway safety agency gives this ASSURANCE in consideration of and for obtaining any Federal grants, loans, contracts, agreements, property, and/or discounts, or other Federal-aid and Federal financial assistance extended after the date hereof to the recipients by the U.S. Department of Transportation under the Highway Safety Grant Program. This ASSURANCE is binding on the State highway safety agency, other recipients, sub-recipients, sub-grantees, contractors, subcontractors and their subcontractors', transferees, successors in interest, and any other participants in the Highway Safety Grant Program. The person(s) signing below is/are authorized to sign this ASSURANCE on behalf of the Recipient.

THE DRUG-FREE WORKPLACE ACT OF 1988 (41 U.S.C. 8103)

The State will provide a drug-free workplace by:

- a. Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace, and specifying the actions that will be taken against employees for violation of such prohibition;
- b. Establishing a drug-free awareness program to inform employees about:
 - 1. The dangers of drug abuse in the workplace;
 - 2. The grantee's policy of maintaining a drug-free workplace;

- 3. Any available drug counseling, rehabilitation, and employee assistance programs;
- 4. The penalties that may be imposed upon employees for drug violations occurring in the workplace;
- 5. Making it a requirement that each employee engaged in the performance of the grant be given a copy of the statement required by paragraph (a);
- c. Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will—
 - 1. Abide by the terms of the statement;
 - 2. Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after such conviction;
- d. Notifying the agency within ten days after receiving notice under subparagraph (c)(2) from an employee or otherwise receiving actual notice of such conviction;
- e. Taking one of the following actions, within 30 days of receiving notice under subparagraph (c)(2), with respect to any employee who is so convicted—
 - 1. Taking appropriate personnel action against such an employee, up to and including termination;
 - 2. Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;
- f. Making a good faith effort to continue to maintain a drug-free workplace through implementation of all of the paragraphs above.

POLITICAL ACTIVITY (HATCH ACT)

(applies to subrecipients as well as States)

The State will comply with provisions of the Hatch Act (<u>5 U.S.C. 1501-1508</u>), which limits the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

CERTIFICATION REGARDING FEDERAL LOBBYING

(applies to subrecipients as well as States)

CERTIFICATION FOR CONTRACTS, GRANTS, LOANS, AND COOPERATIVE AGREEMENTS

The undersigned certifies, to the best of his or her knowledge and belief, that:

- 1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement;
- 2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a

- Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;
- 3. The undersigned shall require that the language of this certification be included in the award documents for all sub-awards at all tiers (including subcontracts, subgrants, and contracts under grant, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

RESTRICTION ON STATE LOBBYING

(applies to subrecipients as well as States)

None of the funds under this program will be used for any activity specifically designed to urge or influence a State or local legislator to favor or oppose the adoption of any specific legislative proposal pending before any State or local legislative body. Such activities include both direct and indirect (*e.g.*, "grassroots") lobbying activities, with one exception. This does not preclude a State official whose salary is supported with NHTSA funds from engaging in direct communications with State or local legislative officials, in accordance with customary State practice, even if such communications urge legislative officials to favor or oppose the adoption of a specific pending legislative proposal.

CERTIFICATION REGARDING DEBARMENT AND SUSPENSION

(applies to subrecipients as well as States)

INSTRUCTIONS FOR PRIMARY TIER PARTICIPANT CERTIFICATION (STATES)

- 1. By signing and submitting this proposal, the prospective primary tier participant is providing the certification set out below and agrees to comply with the requirements of <u>2</u> <u>CFR parts 180</u> and <u>1200</u>.
- 2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. The prospective primary tier participant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with the department or agency's determination whether to enter into this transaction. However, failure of the prospective primary tier participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
- 3. The certification in this clause is a material representation of fact upon which reliance was placed when the department or agency determined to enter into this transaction. If it is later determined that the prospective primary tier participant knowingly rendered an

- erroneous certification, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default or may pursue suspension or debarment.
- 4. The prospective primary tier participant shall provide immediate written notice to the department or agency to which this proposal is submitted if at any time the prospective primary tier participant learns its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
- 5. The terms **covered transaction, civil judgment, debarment, suspension, ineligible, participant, person, principal, and voluntarily excluded,** as used in this clause, are defined in <u>2 CFR parts 180</u> and <u>1200</u>. You may contact the department or agency to which this proposal is being submitted for assistance in obtaining a copy of those regulations.
- 6. The prospective primary tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency entering into this transaction.
- 7. The prospective primary tier participant further agrees by submitting this proposal that it will include the clause titled "Instructions for Lower Tier Participant Certification" including the "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transaction," provided by the department or agency entering into this covered transaction, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions and will require lower tier participants to comply with 2 CFR parts 180 and 1200.
- 8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant is responsible for ensuring that its principals are not suspended, debarred, or otherwise ineligible to participate in covered transactions. To verify the eligibility of its principals, as well as the eligibility of any prospective lower tier participants, each participant may, but is not required to, check the System for Award Management Exclusions website (https://www.sam.gov/).
- 9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
- 10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency may terminate the transaction for cause or default.

CERTIFICATION REGARDING DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS—PRIMARY TIER COVERED TRANSACTIONS

- 1. The prospective primary tier participant certifies to the best of its knowledge and belief, that it and its principals:
 - a. Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in covered transactions by any Federal department or agency;
 - b. Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
 - c. Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and
 - d. Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.
- 2. Where the prospective primary tier participant is unable to certify to any of the Statements in this certification, such prospective participant shall attach an explanation to this proposal.

INSTRUCTIONS FOR LOWER TIER PARTICIPANT CERTIFICATION

- 1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below and agrees to comply with the requirements of 2 CFR parts 180 and 1200.
- 2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension or debarment.
- 3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
- 4. The terms **covered transaction, civil judgment, debarment, suspension, ineligible, participant, person, principal, and voluntarily excluded,** as used in this clause, are defined in <u>2 CFR parts 180</u> and <u>1200</u>. You may contact the person to whom this proposal is submitted for assistance in obtaining a copy of those regulations.

- 5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.
- 6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Instructions for Lower Tier Participant Certification" including the "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transaction," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions and will require lower tier participants to comply with 2 CFR parts 180 and 1200.
- 7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant is responsible for ensuring that its principals are not suspended, debarred, or otherwise ineligible to participate in covered transactions. To verify the eligibility of its principals, as well as the eligibility of any prospective lower tier participants, each participant may, but is not required to, check the System for Award Management Exclusions website (https://www.sam.gov/).
- 8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
- 9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension or debarment.

CERTIFICATION REGARDING DEBARMENT, SUSPENSION, INELIGIBILITY AND VOLUNTARY EXCLUSION—LOWER TIER COVERED TRANSACTIONS

- 1. The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in covered transactions by any Federal department or agency.
- 2. Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

BUY AMERICA

(applies to subrecipients as well as States)

The State and each subrecipient will comply with the Buy America requirement (23 U.S.C. 313) when purchasing items using Federal funds. Buy America requires a State, or subrecipient, to purchase with Federal funds only steel, iron and manufactured products produced in the United States, unless the Secretary of Transportation determines that such domestically produced items would be inconsistent with the public interest, that such materials are not reasonably available and of a satisfactory quality, or that inclusion of domestic materials will increase the cost of the overall project contract by more than 25 percent. In order to use Federal funds to purchase foreign produced items, the State must submit a waiver request that provides an adequate basis and justification for approval by the Secretary of Transportation.

CERTIFICATION ON CONFLICT OF INTEREST

(applies to subrecipients as well as States)

GENERAL REQUIREMENTS

No employee, officer, or agent of a State or its subrecipient who is authorized in an official capacity to negotiate, make, accept, or approve, or to take part in negotiating, making, accepting, or approving any subaward, including contracts or subcontracts, in connection with this grant shall have, directly or indirectly, any financial or personal interest in any such subaward. Such a financial or personal interest would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or personal interest in or a tangible personal benefit from an entity considered for a subaward. Based on this policy:

- 1. The recipient shall maintain a written code or standards of conduct that provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents.
 - a. The code or standards shall provide that the recipient's officers, employees, or agents may neither solicit nor accept gratuities, favors, or anything of monetary value from present or potential subawardees, including contractors or parties to subcontracts.
 - b. The code or standards shall establish penalties, sanctions, or other disciplinary actions for violations, as permitted by State or local law or regulations.
- 2. The recipient shall maintain responsibility to enforce the requirements of the written code or standards of conduct.

DISCLOSURE REQUIREMENTS

No State or its subrecipient, including its officers, employees, or agents, shall perform or continue to perform under a grant or cooperative agreement, whose objectivity may be impaired because of any related past, present, or currently planned interest, financial or otherwise, in

organizations regulated by NHTSA or in organizations whose interests may be substantially affected by NHTSA activities. Based on this policy:

- 1. The recipient shall disclose any conflict of interest identified as soon as reasonably possible, making an immediate and full disclosure in writing to NHTSA. The disclosure shall include a description of the action which the recipient has taken or proposes to take to avoid or mitigate such conflict.
- 2. NHTSA will review the disclosure and may require additional relevant information from the recipient. If a conflict of interest is found to exist, NHTSA may (a) terminate the award, or (b) determine that it is otherwise in the best interest of NHTSA to continue the award and include appropriate provisions to mitigate or avoid such conflict.
- 3. Conflicts of interest that require disclosure include all past, present, or currently planned organizational, financial, contractual, or other interest(s) with an organization regulated by NHTSA or with an organization whose interests may be substantially affected by NHTSA activities, and which are related to this award. The interest(s) that require disclosure include those of any recipient, affiliate, proposed consultant, proposed subcontractor, and key personnel of any of the above. Past interest shall be limited to within one year of the date of award. Key personnel shall include any person owning more than a 20 percent interest in a recipient, and the officers, employees or agents of a recipient who are responsible for making a decision or taking an action under an award where the decision or action can have an economic or other impact on the interests of a regulated or affected organization.

<u>PROHIBITION ON USING GRANT FUNDS TO CHECK FOR HELMET USAGE</u> (applies to subrecipients as well as States)

The State and each subrecipient will not use 23 U.S.C. Chapter 4 grant funds for programs to check helmet usage or to create checkpoints that specifically target motorcyclists.

POLICY ON SEAT BELT USE

In accordance with Executive Order 13043, Increasing Seat Belt Use in the United States, dated April 16, 1997, the Grantee is encouraged to adopt and enforce on-the-job seat belt use policies and programs for its employees when operating company-owned, rented, or personally-owned vehicles. The National Highway Traffic Safety Administration (NHTSA) is responsible for providing leadership and guidance in support of this Presidential initiative. For information and resources on traffic safety programs and policies for employers, please contact the Network of Employers for Traffic Safety (NETS), a public-private partnership dedicated to improving the traffic safety practices of employers and employees. You can download information on seat belt programs, costs of motor vehicle crashes to employers, and other traffic safety initiatives at www.trafficsafety.org. The NHTSA website (www.nhtsa.gov) also provides information on statistics, campaigns, and program evaluations and references.

POLICY ON BANNING TEXT MESSAGING WHILE DRIVING

In accordance with Executive Order 13513, Federal Leadership On Reducing Text Messaging While Driving, and DOT Order 3902.10, Text Messaging While Driving, States are encouraged to adopt and enforce workplace safety policies to decrease crashes caused by distracted driving, including policies to ban text messaging while driving company-owned or rented vehicles, Government-owned, leased or rented vehicles, or privately-owned vehicles when on official Government business or when performing any work on or behalf of the Government. States are also encouraged to conduct workplace safety initiatives in a manner commensurate with the size of the business, such as establishment of new rules and programs or re-evaluation of existing programs to prohibit text messaging while driving, and education, awareness, and other outreach to employees about the safety risks associated with texting while driving.

SECTION 402 REQUIREMENTS

- 1. To the best of my personal knowledge, the information submitted in the annual grant application in support of the State's application for a grant under <u>23 U.S.C. 402</u> is accurate and complete.
- 2. The Governor is the responsible official for the administration of the State highway safety program, by appointing a Governor's Representative for Highway Safety who shall be responsible for a State highway safety agency that has adequate powers and is suitably equipped and organized (as evidenced by appropriate oversight procedures governing such areas as procurement, financial administration, and the use, management, and disposition of equipment) to carry out the program. (23 U.S.C. 402(b)(1)(A))
- 3. At least 40 percent of all Federal funds apportioned to this State under 23 U.S.C. 402 for this fiscal year will be expended by or on behalf of political subdivisions of the State in carrying out local highway safety programs (23 U.S.C. 402(b)(1)(C)) or 95 percent by and on behalf of Indian tribes (23 U.S.C. 402(h)(2)), unless this requirement is waived in writing. (This provision is not applicable to the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.)
- 4. The State's highway safety program provides adequate and reasonable access for the safe and convenient movement of physically handicapped persons, including those in wheelchairs, across curbs constructed or replaced on or after July 1, 1976, at all pedestrian crosswalks. (23 U.S.C. 402(b)(1)(D))
- 5. As part of a comprehensive program, the State will support a data-based traffic safety enforcement program that fosters effective community collaboration to increase public safety, and data collection and analysis to ensure transparency, identify disparities in traffic enforcement, and inform traffic enforcement policies, procedures, and activities. (23 U.S.C. 402(b)(1)(E))
- 6. The State will implement activities in support of national highway safety goals to reduce motor vehicle related fatalities that also reflect the primary data-related crash factors within the State, as identified by the State highway safety planning process, including:

- Participation in the National high-visibility law enforcement mobilizations as identified annually in the NHTSA Communications Calendar, including not less than 3 mobilization campaigns in each fiscal year to
 - o Reduce alcohol-impaired or drug-impaired operation of motor vehicles; and
 - o Increase use of seat belts by occupants of motor vehicles;
- Sustained enforcement of statutes addressing impaired driving, occupant protection, and driving in excess of posted speed limits;
- An annual statewide seat belt use survey in accordance with 23 CFR part 1340 for the measurement of State seat belt use rates, except for the Secretary of Interior on behalf of Indian tribes;
- Development of statewide data systems to provide timely and effective data analysis to support allocation of highway safety resources;
- Coordination of triennial Highway Safety Plan, data collection, and information systems with the State strategic highway safety plan, as defined in 23 U.S.C. 148(a); and
- Participation in the Fatality Analysis Reporting System (FARS), except for American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, or the United States Virgin Islands
- 7. The State will actively encourage all relevant law enforcement agencies in the State to follow the guidelines established for vehicular pursuits issued by the International Association of Chiefs of Police that are currently in effect. (23 U.S.C. 402(j))
- 8. The State will not expend Section 402 funds to carry out a program to purchase, operate, or maintain an automated traffic enforcement system, except in a work zone or school zone. (23 U.S.C. 402(c)(4))

I understand that my statements in support of the State's application for Federal grant funds are statements upon which the Federal Government will rely in determining qualification for grant funds, and that knowing misstatements may be subject to civil or criminal penalties under 18 U.S.C. 1001. I sign these Certifications and Assurances based on personal knowledge, and after appropriate inquiry.

Appendix B to Part 1300—Application Requirements for Section 405 and Section 1906 Grants

[Each fiscal year, to apply for a grant under 23 U.S.C. 405] or Section 1906, Public Law 109-59, as amended by Section 25024, Public Law 117-58, the State must complete and submit all required information in this appendix, and the Governor's Representative for Highway Safety must sign the Certifications and Assurances.]

State: Georgia Fiscal Year: 2024	
----------------------------------	--

Instructions: Check the box for each part for which the State is applying for a grant, fill in relevant blanks, and identify the attachment number or page numbers where the requested information appears in the Highway Safety Plan. Attachments may be submitted electronically.

1

PART 1: OCCUPANT PROTECTION GRANTS (23 CFR 1300.21)

[Check the box above only if applying for this grant.]

ALL STATES

[Fill in all blanks below.]

- The State's occupant protection program area plan for the upcoming fiscal year is provided in the annual grant application at 70-104 (location).
- The State will participate in the Click it or Ticket national mobilization in the fiscal year of the grant. The description of the State's planned participation is provided in the annual grant application at 75-78 (location).
- Projects demonstrating the State's active network of child restraint inspection stations are provided in the annual grant application at 20-22 79-92 (location). Such description includes estimates for: (1) the total number of planned inspection stations and events during the upcoming fiscal year; and (2) within that total, the number of planned inspection stations and events serving each of the following population categories: urban, rural, and at-risk. The planned inspection stations/events provided in the annual grant application are staffed with at least one current nationally Certified Child Passenger Safety Technician.
- Projects, as provided in the annual grant application at
 20-22 93-97 (location), that include estimates of
 the total number of classes and total number of technicians to be trained in the upcoming
 fiscal year to ensure coverage of child passenger safety inspection stations and inspection
 events by nationally Certified Child Passenger Safety Technicians.

LOWER SEAT BELT USE STATES ONLY

[Check at least 3 boxes below and fill in all blanks under those checked boxes.]

	vehicle and las	ate's primary seat belt use law, requiring all occupants riding in a passenger motor eto be restrained in a seat belt or a child restraint, was enacted on $\frac{7/1/81}{}$ (date) at amended on $\frac{7/1/20}{}$ (date), is in effect, and will be enforced during the fiscal of the grant. Legal citation(s): 40-8-76.1
	age-ap \$25, w	ate's occupant protection law, requiring occupants to be secured in a seat belt or propriate child restraint while in a passenger motor vehicle and a minimum fine of as enacted on (date) and last amended on (date) and is in and will be enforced during the fiscal year of the grant. Legal citation(s): Requirement for all occupants to be secured in seat belt or age-appropriate child restraint;
		 Coverage of all passenger motor vehicles; Minimum fine of at least \$25;
		■ Exemptions from restraint requirements.
/	grant a	ts demonstrating the State's seat belt enforcement plan are provided in the annual pplication at (location).
/	The pr	ojects demonstrating the State's high risk population countermeasure program are ed in the annual grant application at 4-54 104 (location).
	The St	ate's comprehensive occupant protection program is provided as follows: Date of NHTSA-facilitated program assessment conducted within 5 years prior to the application date: (date); Multi-year strategic plan: annual grant application or triennial HSP at
	0	(location); The name and title of the State's designated occupant protection coordinator is
	0	The list that contains the names, titles, and organizations of the statewide occupant protection task force membership: annual grant application at (location).

	The State's NHTSA-facilitated occupant protection program assessment of all elements
	of its occupant protection program was conducted on (date) (within 5 years of the application due date);
✓	PART 2: STATE TRAFFIC SAFETY INFORMATION SYSTEM IMPROVEMENTS GRANTS (23 CFR 1300.22)
	[Check the box above only if applying for this grant.]
	ALL STATES
	The State has a functioning traffic records coordinating committee that meets at least 3 times each year. The State has designated a TRCC coordinator. The State has established a State traffic records strategic plan, updated annually, that has been approved by the TRCC and describes specific quantifiable and measurable improvements anticipated in the State's core safety databases, including crash, citation or adjudication, driver, emergency medical services or injury surveillance system, roadway, and vehicle databases.
	[Fill in the blank below.] Written description of the performance measure(s), and all supporting data, that the State is relying on to demonstrate achievement of the quantitative improvement in the preceding 12 months of the application due date in relation to one or more of the significant data program attributes is provided in the annual grant application at 140-142 150-156 (location).
/	PART 3: IMPAIRED DRIVING COUNTERMEASURES (23 CFR 1300.23(D)-(F))
	[Check the box above only if applying for this grant.]
	ALL STATES
	The State will use the funds awarded under <u>23 U.S.C. 405(d)</u> only for the implementation of programs as provided in <u>23 CFR 1300.23(j)</u> .
	MID-RANGE STATES ONLY
	[Check one box below and fill in all blanks under that checked box.]
	The State submits its statewide impaired driving plan approved by a statewide impaired driving task force on (date). Specifically:

	Annual grant application at
0	Annual grant application at (location)
	describes the authority and basis for operation of the statewide impaired driving
	task force;

PART 7: MOTORCYCLIST SAFETY GRANTS (23 CFR 1300.25)	
[Check the box above only if applying for this grant.]	
[Check at least 2 boxes below and fill in all blanks under those checked boxes only.]	
Motorcycle Rider Training Course	
The name and organization of the head of the designated State authority over motorcyclist safety issues is	r

- The head of the designated State authority over motorcyclist safety issues has
- approved and the State has adopted one of the following introductory rider curricula:

[Check at least one of the following boxes below and fill in any blanks.]

- Motorcycle Safety Foundation Basic Rider Course;
- TEAM OREGON Basic Rider Training;
- Idaho STAR Basic I;
- California Motorcyclist Safety Program Motorcyclist Training Course;
- Other curriculum that meets NHTSA's Model National Standards for Entry-Level Motorcycle Rider Training and that has been approved by NHTSA.

grant AND number of registered motorcycles in each such county or political subdivision according to official State motor vehicle records.

Moto	rcyclist Awareness Program
0	The name and organization of the head of the designated State authority over
	motorcyclist safety issues is Commissioner Spencer Moore, GA Dept of Driver Services .
0	The State's motorcyclist awareness program was developed by or in coordination
	with the designated State authority having jurisdiction over motorcyclist safety
	issues.
0	In the annual grant application at 170-174
	(location), performance measures and corresponding performance targets
	developed for motorcycle awareness that identify, using State crash data, the
	counties, or political subdivisions within the State with the highest number of
	motorcycle crashes involving a motorcycle and another motor vehicle.
0	In the annual grant application at 170-174
	(location), the projects demonstrating that the State will implement data-driven
	programs in a majority of counties or political subdivisions where the incidence of
	crashes involving a motorcycle and another motor vehicle is highest, and a list
	that identifies, using State crash data, the counties or political subdivisions within
	the State ranked in order of the highest to lowest number of crashes involving a
	motorcycle and another motor vehicle per county or political subdivision.
Helm	et Law
0	The State's motorcycle helmet law, requiring the use of a helmet for each
	motorcycle rider under the age of 18, was enacted on (date) and last
	amended on (date), is in effect, and will be enforced during the fiscal
	year of the grant.
	• Legal citation(s):
Redu	ction of Fatalities and Crashes Involving Motorcycles
0	Data showing the total number of motor vehicle crashes involving motorcycles is
	provided in the annual grant application at
	(location).
0	Description of the State's methods for collecting and analyzing data is provided in
	the annual grant application at (location).
Impai	red Motorcycle Driving Program
0	In the annual grant application or triennial HSP at
	175-177 (location), performance measures
	and corresponding performance targets developed to reduce impaired motorcycle
	operation.
0	In the annual grant application at 178-180
	(location), countermeasure strategies and projects demonstrating that the State
	will implement data-driven programs designed to reach motorcyclists and
	motorists in those jurisdictions where the incidence of motorcycle crashes
	Helm C Reduct C Impai

involving an impaired operator is highest (i.e., the majority of counties or political

		livisions in the State with the highest numbers of motorcycle crashes
		lving an impaired operator) based upon State data.
		of Fatalities and Crashes Involving Impaired Motorcyclists
ш	Data	showing the total number of reported crashes involving alcohol-impaired
	and	drug-impaired motorcycle operators are provided in the annual grant
	appl	ication at (location).
	o Desc	cription of the State's methods for collecting and analyzing data is provided in
	the a	nnual grant application at (location).
	Use of Fees	Collected From Motorcyclists for Motorcycle Programs
ш	[Check one	box only below and fill in all blanks under the checked box only.]
	☐ App	lying as a Law State—
	LJ ^^	The State law or regulation requires all fees collected by the State from motorcyclists for the purpose of funding motorcycle training and safety
		programs are to be used for motorcycle training and safety programs. <i>Legal citation(s):</i>
		AND
		The State's law appropriating funds for FY demonstrates that all fees collected by the State from motorcyclists for the purpose of funding motorcycle training and safety programs are spent on motorcycle training and safety programs. Legal citation(s):
	☐ Ann	Iving as a Data Stata
	App	lying as a Data State— Data and/or documentation from official State records from the previous fiscal year showing that <i>all</i> fees collected by the State from motorcyclists for the purpose of funding motorcycle training and safety programs were used for motorcycle training and safety programs is provided in the annual grant application at
		(location).

▶ PART 8: NONMOTORIZED SAFETY GRANTS (23 CFR 1300.26)

[Check the box above only if applying for this grant and only if NHTSA has identified the State as eligible because the State annual combined nonmotorized road user fatalities exceed 15 percent of the State's total annual crash fatalities based on the most recent calendar year final FARS data, then fill in the blank below.]

	The list of project(s) and subrecipient(s) information that the State plans to conduct under this program is provided in the annual grant application at (location(s)).
✓	PART 9: PREVENTING ROADSIDE DEATHS GRANTS (23 CFR 1300.27)
	[Check the box above only if applying for this grant, then fill in the blank below.]
	The State's plan describing the method by which the State will use grant funds is provided in the annual grant application at
	182-184 (location(s)).
	PART 10: DRIVER AND OFFICER SAFETY EDUCATION GRANTS (23 CFR 1300.28)
	[Check the box above only if applying for this grant.]
	[Check one box only below and fill in required blanks under the checked box only.]
	Driver Education and Driving Safety Courses [Check one box only below and fill in all blanks under the checked box only.] Applying as a law State— The State law requiring that driver education and driver safety courses include instruction and testing related to law enforcement practices during traffic stops was enacted on (date) and last amended on (date), is in effect, and will be enforced during the fiscal year of the grant. Legal citation(s):
	 Applying as a documentation State— The State has developed and is implementing a driver education and driving safety course throughout the State that require driver education and driver safety courses to include instruction and testing related to law enforcement practices during traffic stops. Curriculum or course materials, and citations to grant required topics within, are provided in the annual grant application at
	Peace Officer Training Programs
	[Check one box only below and fill in all blanks under the checked box only.] Applying as a law State— The State law requiring that the State has developed and implemented a training program for peace officers and reserve law enforcement officers with respect to proper interaction with civilians during traffic stops was

•	enacted on (date) and last amended on (date), is in effect, and will be enforced during the fiscal year of the grant. <i>Legal citation(s):</i>
Apply •	ring as a documentation State— The State has developed and is implementing a training program for peace officers and reserve law enforcement officers with respect to proper interaction with civilians during traffic stops. Curriculum or course materials, and citations to grant required topics within, are provided in the annual grant application at
Apply _	(location). Fing as a qualifying State— A proposed bill or planning or strategy documents that identify meaningful actions that the State has taken and plans to take to develop and implement a qualifying law or program is provided in the annual grant application at (location).
•	A timetable for implementation of a qualifying law or program within 5 years of initial application for a grant under this section is provided in the annual grant application at (location).
	e only if applying for this grant.]
[Check one box only	below and fill in all blanks under the checked box only.]
Governor or of inspection of vehicle stop is	locument(s) (<i>i.e.</i> , a law, regulation, binding policy directive, letter from the court order) demonstrates that the State maintains and allows public statistical information on the race and ethnicity of the driver for each motor made by a law enforcement officer on all public roads except those classified nor rural roads are provided in the annual grant application at
	(location).

In my capacity as the Governor's Representative for Highway Safety	y, I hereby provide the
I have reviewed the above information in support of the State 23 U.S.C. 405 and Section 1906 grants, and, based on my reaccurate and complete to the best of my personal knowledge. As condition of each grant awarded, the State will use these with the specific statutory and regulatory requirements of the with all applicable laws, regulations, and financial and programmer Federal grants. I understand and accept that incorrect, incomplete, or untime support of the State's application may result in the denial of	eview, the information is e. grant funds in accordance at grant, and will comply rammatic requirements for ely information submitted in

Brian P. Kemp GOVERNOR Allen Poole DIRECTOR

August 1, 2023

Ms. Carmen Hayes, Regional Administrator Atlanta Federal Center 61 Forsyth Street, SW Suite 17T30 Atlanta, GA 30303

The GA Governor's Office of Highway Safety (GOHS) is requesting your approval to purchase the equipment from the list attached. Upon approval, the equipment will be purchased and used to provide educational and traffic enforcement initiatives to increase the public's awareness on safe driving and the need to reduce the number of crashes, injuries and fatalities occurring on Georgia's roadways.

As always, thank you for the assistance you and your staff continue to provide this office. Should you have any questions regarding the equipment approval request, please contact me at 404.656.6996 or at allen.poole@gohs.ga.gov

Sincerely

Allen Poole Director
