INTRODUCTION

Under the authority and approval of Governor Brian Kemp, the Governor’s Office of Highway Safety (GOHS) produces an annual Highway Safety Plan (HSP) which serves as Georgia’s programmatic guide for the implementation of highway safety initiatives and an application for federal grant funding from the National Highway Traffic Safety Administration (NHTSA). This document is used to justify, develop, implement, monitor, and evaluate traffic safety activities for improvements throughout the federal fiscal year. National, state and county level crash data along with other information such as safety belt use rates are used to insure that the planned projects are data driven with focus on areas of greatest need.

Mission of GOHS
The Mission of the Governor’s Office of Highway Safety is to educate the public on traffic safety and facilitate the implementation of programs that reduce crashes, injuries and fatalities on Georgia roadways.

The programs and activities of GOHS are designed to:

- Cultivate collaborative working relationships with all governmental agencies, employers and private advocacy groups that strive for public safety in communities and on highways.

- Encourage and enhance traffic enforcement activities by forming and supporting statewide law enforcement coalitions.

- Foster greater public involvement in highway safety programs with direct feedback between the public and the Governor’s Office of Highway Safety.

- Develop local traffic safety coalitions for community outreach.
Procedures for Receiving Highway Safety Funds

Origin and Purpose
The State and Community Highway Safety Grant Program was enacted by the Highway Safety Act of 1966 as Section 402 of Title 23, United States Code. Grant funds are provided to the States, the Indian Nations and the Territories each year according to a statutory formula, based on population and road mileage. The National Highway Traffic Safety Administration (NHTSA) awards performance-based Section 402 formula grants to help states undertake statewide and local programs aimed at reducing highway fatalities and injuries. In receiving Section 402 funds, states must set their own goals, select appropriate programs, and as part of the performance-based agreement, evaluate and report on their results. Section 402 funds provide technical assistance to states and local communities, and are based on national priorities. Over the life cycle of programs funded with Section 402 funds, states and their local municipalities provide the majority of resources to continue programs beyond the start-up phase.

F.A.S.T. ACT

Purpose
On December 4, 2015, the President signed into law the “Fixing America’s Surface Transportation Act” (FAST Act), Public Law 114-94. The FAST Act amended NHTSA’s highway safety grant program (23 U.S.C. 402 or Section 402) and the National Priority Safety Program grants (23 U.S.C 405 or Section 405). Specifically, the FAST Act made limited administrative changes to the Section 402 grant program and made no changes to the contents of the Highway Safety Plan. The interim final rule was published on May 23, 2016 and was open for public comment until the final rule was published and effective on February 26, 2018.

Priority Areas
Through public rule making processes, it was determined that certain highway safety programs funded under Section 402 are most effective in reducing crashes, injuries, and fatalities. These programs, designated as National Priority Program Areas, and more importantly are also Georgia highway safety priority areas. These priority program areas are listed below:

1. Alcohol and Other Drug Countermeasures
2. Occupant Protection
3. Traffic Records
4. Speed Control
5. Police Traffic Services
6. Pedestrian & Bicycle Safety
7. Community Traffic Safety Program (CTSP)
8. Motorcycle Safety
9. Emergency Medical Services
10. Paid Media

In accordance with F.A.S.T., for a state to receive a 402 funding it must provide satisfactory assurances that it will implement activities in support of national highway safety goals that also reflect the primary data-related factors within a state, as identified by the state highway safety planning process including: national traffic safety law enforcement mobilizations; sustained enforcement of impaired driving, occupant protection and speeding-related laws; an annual safety belt use survey conducted in accordance with DOT criteria; and development of statewide data systems.
**Project Funding Period**
The federal government operates on a fiscal year that commences on October 1 and ends on September 30.

Contingent upon congressional allocation of funding and satisfactory performance, projects funded by the Governor's Office of Highway Safety (GOHS) are eligible for continuous funding for a maximum of three (3) years, unless otherwise negotiated. Projects shall be evaluated annually for performance and a renewal application must be submitted and approved each year.

Submission of a project application for a new or renewal project does not assure approval and absolutely no authorization exists to expend funds or obtain reimbursement from GOHS until on or after the effective date indicated on the signed approval letter by the Director of GOHS. In order to comply with federal regulations, grantees must assure that federal funds are not substituted for state and local highway safety program expenditures.

Applications will be reviewed against identified statewide problem areas and existing plans for program activities. They will also be judged on probable impact on crashes, decreasing injuries and fatalities, opportunities for enhancing highway safety delivery systems, and improvement in using existing resources to increase cost effectiveness of highway safety endeavors.

Governor’s Office of Highway Safety (GOHS) generally funds innovative traffic safety projects at the rate of 100% the first year, with the second and third year level of funding discussed and approved during the review team scoring process with final approval from the GOHS Director. The diminishing levels of funding are designed to encourage the grantee to become self-sufficient, allowing the project to develop into an ongoing part of the agency. At the discretion of the Governor’s Office of Highway Safety (GOHS) Director and a Governor’s Office of Highway Safety (GOHS) application review committee, a project may be funded beyond 3 years and at different rates. The local agency is expected to establish precedents and develop procedures that support continued operation of the traffic safety program using local funding.

**Equipment Purchases**
Under the provisions of Section 402, the purchase of equipment cannot be approved unless it is an actual component of a highway safety program. Cost of purchase for new or replacement equipment with a useful life of one year or more and an acquisition cost of $5,000 or more, must be pre-approved by the grant approving officials. Equipment must go through the bid process and have prior approval from the Governor’s Office of Highway Safety and/or NHTSA.

**DOT LEP Guidance**
The Georgia Governor's Office of Highway Safety will comply and inform its sub-recipient to comply with the “Policy Guidance Concerning Recipients’ Responsibilities to Limited English Proficient (LEP) Persons” (DOT LEP Guidance).

**Note:** Please reference the enclosed Grant Terms and Conditions (pages 15 to 33) for detailed requirements for the program.
HIGHWAY SAFETY PLANNING PROCESS

1. Define highway safety problems through data analysis
2. Submit HSP for NHTSA review and approval
3. Identify and involve partners in planning process
4. Identify, prioritize and select strategies and projects
5. Coordinate HSP and data collection with the State SHSP
6. Develop performance measures/targets for program areas
**Problem Identification Process**

Problem analysis is completed by Governor’s Office of Highway Safety (GOHS), law enforcement, Department of Transportation, Department of Health Promotion and Behavior/Traffic Safety Research and Evaluation Group, Georgia Data Driven Approaches to Crime and Traffic Safety (DDACTS), contracted epidemiologist with the Governor’s Office of Highway Safety, and other involved agencies and groups. The Performance Identification process for performance measures and targets are evidence-based and is consistent with the “Traffic Safety Performance Measures for States and Federal Agencies” (DOT HS 811 025). Governor’s Office of Highway Safety (GOHS) will regularly review the performance measures and coordinate with other above mentioned agencies for input and update on our performance measures. A state-level analysis was completed, using the most recent data available (currently 2016 FARS data). Motor vehicle crash data, occupant protection survey results, roadway fatality data, and other data on traffic safety problems are analyzed statewide and on county levels. Program level evaluation findings for major issues (impaired driving, safety belts, and pedestrian/bicycle safety) were also included in the problem identification process. Surveillance data along with evaluation findings were used directly to link the identified crash issues, statewide performance goals, strategic partners, the State Strategic Highway Safety Plan, funding opportunities, and capacity to implement sound programs to address the problem.

**Highway Safety Planning Process Participants**

In developing the Highway Safety Plan, The Governor’s Office of Highway Safety collaborates and received input from the following agencies: Strategic Highway Safety Plan Task Teams (Aggressive Driving, Impaired Driving, Occupant Protection, Serious Crash Type, Age-related Issues, Non-motorized Users, Vehicle Types, Trauma Systems, Traffic/Crash Records Data Analysis, Traffic Incident Management Enhancement), Georgia Department of Driver Services, Georgia Department of Public Safety, Georgia Department of Public Health, Georgia Department of Transportation, Georgia Sheriff’s Association, Administrative Office of the Courts, Prosecuting Attorneys Council, and the University of Georgia.

**Strategies for Project Selection**

The Governor’s Office of Highway Safety provides funding opportunities to police departments, governmental entities, and highway safety advocacy organizations for the purpose of addressing motor vehicle crash problems in local jurisdictions. Grants are received by invitation using a ranking system, through responses to request for proposals (RFP), and through unsolicited submissions where documented highway safety problems exist.

**The Ranking System**

The Governor’s Office of Highway Safety (GOHS) contracts with an epidemiologist to aggregate and correlate motor vehicle related data from the Georgia Department of Driver Services (DDS), Department of Transportation (DOT) and the Fatality Analysis Reporting System (FARS). From the Epidemiologist’s analysis, Georgia highway safety crash data is ranked by county. The areas considered in this analysis could include speed, impaired driving, restraint use, pedestrian, motorcycles, and bicycle. Governor’s Office of Highway Safety (GOHS) utilizes this information to identify a list of jurisdictions with high numbers of traffic safety crashes, injuries, and fatalities. Governor’s Office of Highway Safety (GOHS) purges the lists and contacts jurisdictions to seek interest/support in addressing the problems/gaps identified in the analysis.

**Request for Proposals (RFP)**

As innovative programs are developed, specific requests for proposals are distributed to communities, special interest groups, governmental agencies and other stakeholders through electronic mediums (i.e. the Governor’s Office of Highway Safety (GOHS) Website, GATEN, Georgia Association of Chiefs of Police, Sheriff’s Association, Atlanta Regional Commission, Georgia Municipal Association, ACCG, GAMPO and GPSTC). The request for proposals (RFP) provides an introduction to the specific problem(s), eligibility criteria, program targets and objectives, suggested activities, and methods of evaluation. Upon receipt of all applicants responding to the request for proposals (RFP), a review team of planning and
finance representatives is assigned the task of assessing applications to determine if the proposed projects are viable via the Governor's Office of Highway Safety (GOHS) online reporting system, Electronic Grants of Highway Safety (eGOHS Plus).

**Discretionary Grants**

Funds are also used to support governmental entities furthering Governor's Office of Highway Safety's mission. In these instances, the purpose, scope, and funding requirements are subjected to Governor's Office of Highway Safety (GOHS) staff review and scoring prior to Governor's Office of Highway Safety (GOHS) Director Approval. Milestones and performance objectives are tailored to the specific project/purpose and established prior to any commitment of funds. All prospective applicants must follow Governor's Office of Highway Safety (GOHS) procedures in applying for highway safety funds.

**Governor’s Office of Highway Safety (GOHS) Renewal Process**

Projects that have been deemed vital to the Governor's Office of Highway Safety (GOHS) mission by the Director may receive funding for multiple years based on the availability of funds. All renewal applications are reviewed along with other potential funding requests.
Grant Application Process

Who Can Apply

The Governor’s Office of Highway Safety accepts grant applications from law enforcement agencies, governmental entities, and highway safety advocacy organizations for the purpose of addressing motor vehicle crash problems in local jurisdictions.

When to Apply

Applications for federal funds are generally accepted six to nine months prior to the beginning of each federal fiscal year, which begins October 1. Dependent upon the time frame of the identified problem, subsequent applications for funding may also be submitted anytime during the fiscal year.

How to Apply

Prospective grantees must submit an application using Electronic Grants of Highway Safety (eGOHS Plus) using quantitative data pertinent to their jurisdiction’s identified traffic safety problem(s). The Governor’s Office of Highway Safety (GOHS) Grant Application consists of the following three (3) major parts. The need to complete all major parts varies according to Program emphasis areas.

Grant Application Components ( Applicant to Complete in eGOHS Plus)

Part I: - Programmatic Section

- **Problem Identification**
  
  The problem statement must clearly define the problem(s) planned to be addressed. The statement must provide a concise description of the problem(s), where it is occurring; the population affected, how and when the problem is occurring, etc. It must include consecutive years of the most recent data to establish the conditions and the extent of the problem(s). (Charts, graphs and percentages are effective ways of displaying the required data).

- **Program Assessment**
  
  The applicant must identify the resources that the community/jurisdictions are currently using to address the problem(s) identified under the problem identification section mentioned above. This section will (1) review and note activities and results of past and current efforts, indicating what did or did not work (2) assess resources to determine what is needed to more effectively address the problem(s) and (3) identify local laws, policies, safety advocate groups and organizations that may supports/inhibit the success of the project.

- **Project Objectives, Activities and Evaluation**
  
  The objectives must clearly relate to the target problem(s) identified in the Problem Identification section mentioned above. The activities identify the steps needed to accomplish each objective. Finally, a comprehensive evaluation plan must be developed to explain how to measure the outcome of each proposed activity listed.

- **Milestone Chart**
  
  This chart must provide a summary of the projected activities to be accomplished on a monthly basis. This section reflects the activities described in the Project Objectives, Activities and Evaluation Section mentioned above.
• **Media Plan**

  The applicant must describe a plan for announcing the award of the grant to the local community and what media outlets are available. A discussion of how the public will be informed of grant activities throughout the entire project period is also included.

• **Resource Requirements**

  This section must list the resources needed in order to accomplish the objectives. Requirements may include but not be limited to personnel, equipment, supplies, training needs and public information/educational materials. A brief description of how and by whom the resources will be used is also required.

• **Self Sufficiency**

  This statement must reflect a plan of action that explains how the activities of the project will be continued after federal funds are no longer available to implement the project. The self-sufficiency plan must identify potential sources of non-federal funds.

**Part II: – Budget Section**

Each budget item(s) must be allowable, reflect a reasonable cost and be necessary to carry out the objectives and activities of the project. Potential budget categories include:

- Personnel Services (Salaries, Pay Schedule and Benefits)
- Regular Operating Expenses
- Travel
- Equipment Purchases
- Contractual Services
- Per Diem and Fees
- Computer Charges and Equipment
- Telecommunications
- Motor Vehicle Purchases
- Rent/Real Estate

**Part III: - Grant Terms, Conditions and Certification**

This section contains certain legal and regulatory requirements pertaining to the receipt of federal grant funds with which the grantee must agree to comply. Additionally, individuals responsible for the financial aspects of the grant are identified. The application for funding must be submitted by the appropriate Authorizing Official or Agency Administrator who may be either an elected official and/or agency head. Upon approval, the application is made part of the executed grant agreement between the Governor’s Office of Highway Safety (GOHS) and the applicant.
Grant Review Process

All grant applications are submitted through the Electronic Grants for the Office of Highway Safety (eGOHS Plus) System.

eGOHS Plus Application Review Workflow

Applications are assigned to a review panel which includes one planner and a staff member from the finance division. For new applications there is also an external reviewer assigned to review and score the application. During the review phase local, county, and state data is included in the review of applications. The Electronic Grants of Highway Safety (eGOHS Plus) system maintains the information and issues the notifications regarding each step. Each member of the review panel completes scoring based on established guidelines and eGOHS Plus calculates each score. Once the review panel, along with the Division Director of Planning and Programs, Deputy Director and the Agency Director complete their review, accepted applications receive a grant number and the grant is executed.

As new applications are reviewed, they are placed in “Application Funding Required” or “Application Determination Required” status until the availability of federal funding is verified, as well as the need for special programs, based on ‘data’ for new projects. Once amounts are verified, the applications are executed and become a grant.
Preliminary Application Training

After extending request for proposals (RFPs), a grant funding procedures application training is arranged during which the Governor’s Office of Highway Safety (GOHS) grant application and reporting documents are explained and the grant application submission date is established. The Preliminary application training is required and facilitated for potential agencies that have never received Governor’s Office of Highway Safety (GOHS) grant funding, does not have a grant with GOHS for the previous fiscal year, or does have a current grant with GOHS but is seeking funds for a new project. Requests for proposals (RFP) are only extended to new agencies based on the availability of federal funds. If sufficient funding is not available to consider the addition of new grants, the Preliminary training will not be held. If a potential grant project is established after the preliminary conference is held, GOHS can set up an individual meeting with the potential grantee.

Grant Selection Notification

The Authorizing Official and the Agency Administrator of the awarded grants receives written notification of grant award which includes the Governor’s Office of Highway Safety (GOHS) Grant Terms, Conditions and Certifications. The applicant is notified electronically via eGOHS Plus and hard copy via U.S. Mail of the approval or denial of the Highway Safety Grant Application. Upon receiving notification of the grant award, the grantee is authorized to implement the grant activities during the current FFY effective October 1st through September 30th.

Agency Training (Grant Training)

Following grant award notification, grantees are invited to attend training to learn about GOHS procedures. This training is intended to inform grantees, especially new grantees of GOHS’ expectations for the grant year. This activity may be conducted via webinar, in a group setting or individually, based on the number registered for training. At this time, grantees are trained on the use of eGOHS Plus for the submission of claims, progress reports, travel requests, amendments, and final reports. GOHS’ Grant Terms and Conditions are also highlighted.

Funding Formula

The Section 402 formula is:

75% based on the ratio of the State’s population in the latest Federal census to the total population in all States.

25% based on the ratio of the public road miles in the State to the total public road miles in all States.

In addition, it requires that at least 40% of the total federal annual obligation limitation must be used by or for the benefit of political subdivision of the State.

Project Funding Period

The federal government operates on a fiscal year that commences on October 1 and ends on September 30. Generally, projects will only be funded during this time span. Occasionally, prior year funds are rolled over into the current fiscal year to continue a project, but this practice is neither encouraged nor frequent.

Governor’s Office of Highway Safety (GOHS) generally funds innovative traffic safety projects at the rate of 100% the first year, with the second and third year level of funding discussed and approved during the review team scoring process with final approval from the GOHS Director. The diminishing levels of funding are designed to encourage the grantee to become self-sufficient, allowing the project to develop into an ongoing part of the agency. At the discretion of the Governor’s Office of Highway Safety (GOHS) Director and a Governor’s Office of Highway Safety (GOHS) application review committee, a project may be funded beyond 3 years and at different rates. The local agency is expected to establish precedents and develop procedures that support continued operation of the traffic safety program using local funding.
Equipment Purchases
Under the provisions of Section 402, the purchase of equipment cannot be approved unless it is an actual component of a highway safety program. Cost of purchase for new or replacement equipment with a useful life of one year or more and an acquisition cost of $5,000 or more, must be pre-approved by the grant approving officials. Equipment must have prior approval from both The Governor’s Office of Highway Safety (GOHS) and National Highway Traffic Safety Administration (NHTSA), comply with Buy America, AND go through the applicants’ procurement policy.

DOT LEP Guidance
The Georgia Governor's Office of Highway Safety (GOHS) will comply and inform its sub-recipient to comply with the “Policy Guidance Concerning Recipients’ Responsibilities to Limited English Proficient (LEP) Persons” (DOT LEP Guidance).

Grant Monitoring
Process evaluation is continual throughout the grant year. The Governor’s Office of Highway Safety (GOHS) utilizes an evaluation team to complete data sheets for each application as they are submitted as well as throughout the course of the grant. The evaluation team reviews applications to make certain that stated objectives and activities are reasonable and attainable. Grants can then be revised if updates are necessary. The evaluation team continues to work with grantees throughout the grant year to ensure an accurate evaluation is ongoing within each grant. At the completion of the grant year, the evaluation team reviews the accomplishments of each grant to determine the overall outcome obtained from Governor’s Office of Highway Safety (GOHS) grantees.

The Governor’s Office of Highway Safety (GOHS) conducts desktop reviews of all grantees as a means of ensuring compliance with state and federal regulations. By the 20th of each month during the grant cycle, grantees are required to submit a monthly progress report and financial claim documenting the previous month’s activities. Beginning in Federal Fiscal Year (FFY) 2008, Governor’s Office of Highway Safety (GOHS) accepted electronic signatures to expedite the claim process. Currently, reimbursement for claims is delivered within 30 days from receipt of the claim and programmatic reports. Effective January 1, 2012, grantees are encouraged to receive their claim for reimbursement payment electronically via Automatic Clearing House (ACH).

Governor’s Office of Highway Safety (GOHS) planners complete a Grant Status Report on all awarded grants to document the progress of the project. Planners then make a recommendation for continued and future funding based on the overall performance and reach of the grant. Governor’s Office of Highway Safety (GOHS) Planners must also conduct a minimum of one onsite visit per year with each grantee receiving more than $25,000 in grant funds. Additionally, 50% of grants up to $24,999.99 must have one onsite visit. During the onsite visit, planners discuss problems identified, progress of the project, record keeping and support documents, accountability of equipment, budget, as well as verifying that funds obligated were spent in accordance with the grant agreement.

**Application**

1. Problem ID
2. Must have and be able to show there is a highway safety problem in your area

**PROBLEM IDENTIFICATION**

Instructions:

- All required fields are marked with *.
- Use the **B** button to save information and calculate data on each page.
- **B** button every 30 minutes to avoid losing data.

The problem identification should clearly present the **Who**, **What**, **When**, **Where**, and **Why** of the traffic-related issues that are affecting the community and causing crashes, injuries, and fatalities. The statement should provide a concise description for the defined geographic area or jurisdiction. Include stories or statistics of the most recent local and statewide data, as well as local demographic information. Include charts, graphs, and percentages in the statement of each page. Chart and graph documents can be uploaded as attachments on the next page.
Problem Identification

• Describe your community:
  – Major roadways
  – Demographics/Socioeconomic Characteristics
  – Largest employers
  – Rural or urban
  – Special events that correspond with significant highway safety problems

Problem Identification

• Crash Data (5 Years):
  – Fatalities
  – Serious Injuries
  – All crashes

• Other Problems

Resource Links for Crash Data:
FARS: https://cdan.nhtsa.gov/519l.htm#
Crash Stats: https://crashstats.nhtsa.dot.gov/#
For Local Government Crash Data: Refer to your GEARS Data Access
Problem Identification

- Percentage of crashes/fatalities attributed to:
  - Speed
  - Impaired drivers
  - Occupant protection
  - Distracted driving
  - Pedestrian/bicyclists

- Compare your community’s crash rates to:
  - State rates
  - Surrounding communities’ rates

Application

1. Document Attachment
2. Attach graphs, photos, crash data, etc
3. Program Assessment next

**Note: Reference all documentation in the narrative section of the Problem Identification.”
Application

1. Program Assessment

2. What are you doing now to reduce the highway safety problem?

3. Current Activities, previous activities

4. Did it work?

5. Local support?

Program Assessment helps determine the resources a community currently has in place to address the problem. Include a review of current activities and results of past and current efforts, indicating what did or did not work. Assess resources to determine what is needed to more effectively address the problem. Identify local laws, policies, groups, and organizations that support or inhibit the success of the project.

Program Assessment Chart

Instructions:
- All required fields are marked with an *.
- Use the SAVE button to save information and calculate data on each page.
- Save at least every 30 minutes to avoid losing data.

For Law Enforcement Agencies only. (If not law enforcement, please enter zeros in the chart below.)

Please provide the current level of enforcement activity for the entire department for the three (3) previous calendar years (January 1 through December 31). If data is not available for a particular activity/year combination, enter 0.
